Religion, Media, and Marginality in Modern Africa Felicitas Becker, Joel Cabrita, Marie Rodet, 2018-02-02 In recent years anthropologists historians and others have been drawn to study the profuse and creative usages of digital media by religious movements At the same time scholars of Christian Africa have long been concerned with the history of textual culture the politics of Bible translation and the status of the vernacular in Christianity Students of Islam in Africa have similarly examined politics of knowledge the transmission of learning in written form and the influence of new media Until now however these arenas Christianity and Islam digital media and old media have been studied separately Religion Media and Marginality in Modern Africa is one of the first volumes to put new media and old media into significant conversation with one another and also offers a rare comparison between Christianity and Islam in Africa The contributors find many previously unacknowledged correspondences among different media and between the two faiths In the process they challenge the technological determinism the notion that certain types of media generate particular forms of religious expression that haunts many studies In evaluating how media usage and religious commitment intersect in the social cultural and political landscapes of modern Africa this collection will contribute to the development of new paradigms for media and religious studies Contributors Heike Behrend Andre Chappatte Maria Frahm Arp David Gordon Liz Gunner Bruce S Hall Sean Hanretta Jorg Haustein Katrien Pype and Asonzeh Ukah

New Media and the Mediatization of Religion Gabriel Faimau, William O. Lesitaokana, 2018-10-01 New media including digital and social media play a central role in producing and reproducing socio cultural and religious practices Its presence has not only resulted in changes to the ways in which religious beliefs are practiced but has also altered the way religious meanings are expressed How has new media technology informed and influenced religious engagement and participation In what ways has new media technology enabled religious groups to practice and preach their religious beliefs to a broader audience To what extent has the emergence of social media and social networking sites shaped religious discourses and religious practices This volume offers a unique Africa centred perspective in response to these questions While presenting new scholarly developments in the fields of media religion and culture in Africa this book also provides empirical and theoretical insights into the intersection between new media and religion

Institutional Change in the Public Sphere Fredrik Engelstad, Håkon Larsen, Jon Rogstad, Kari Steen-Johnsen, 2017-04-24 The main focus of the book is institutional change in the Scandinavian model with special emphasis on Norway There are many reasons to pay closer attention to the Norwegian case when it comes to analyses of changes in the public sphere In the country s political history the arts and the media played a particular role in the processes towards sovereignty at the beginning of the 20th century On a par with the other Scandinavian countries Norway is in the forefront in the world in the distribution and uses of Internet technology As an extreme case the most corporatist society

within the family of the Nordic Model it offers an opportunity both for intriguing case studies and for challenging and refining existing theory on processes of institutional change in media policy and cultural policy It supplements two recent important books on political economy in Scandinavia *Varieties of Liberalization* and *The New Politics of Social Solidarity* Kathleen Thelen 2014 and *The Political Construction of Business Interests* Cathie Jo Martin and Duane Swank 2013 There are further reasons to pay particular attention to the Scandinavian and more specifically the Norwegian cases i They are to varying degrees neo corporatist societies characterized by ongoing bargaining over social and political reform processes From a theoretical perspective this invites reflections which to some extent are at odds with the dominant conceptions of institutional change Neither models of path dependency nor models of aggregate incremental change focus on the continuous social bargaining over institutional change ii Despite recent processes of liberalization common to the Western world as a whole corporatism implies a close connection between state public sphere cultural life and religion This also means that institutions are closely bundled in an even stronger way than assumed for example in the *Varieties of Capitalism* literature Furthermore we only have scarce insight in the way the different spheres of corporatism are connected and interact In the proposed edited volume we have collected historical institutional case studies from a broad set of social fields a detailed outline of contents and contributors is attached Critical assessments of Jürgen Habermas theory of the public sphere Can the public sphere be considered an institution The central position of the public sphere in social and political change in Norway Digital transformations and effects of the growing PR industry on the public sphere Institutionalization of social media in local politics and voluntary organizations Legitimation work in the public sphere freedom of expression and warning in the workplace Return of religion to the public sphere and its effects [The Routledge Handbook of Religion and Journalism](#) Kerstin Radde-Antweiler,Xenia Zeiler,2020-10-29 The Routledge Handbook of Religion and Journalism is an outstanding reference source to the key topics challenges past and present global issues and debates in this exciting subject The first collection of its kind this volume comprises over 25 chapters by a team of international contributors This Handbook is divided into five parts each taking global developments in the field into account Theoretical Reflections Power and Authority Conflict Radicalization and Populism Dialogue and Peacebuilding Trends Within these sections central issues debates and developments are examined including religious and secular press ethics globalization gender datafication differentiation journalistic religious literacy race and religious extremism This volume is essential reading for students and researchers in journalism and religious studies This Handbook will also be very useful for those in related fields such as sociology communication studies media studies and area studies [A Constructive Critique of Religion](#) Mia Lövheim,Mikael Stenmark,2020-02-06 Why do some strategies for critique of religion seem to be more beneficial for constructive engagement whereas others increase intolerance polarization and conflict Through an analysis of the reasons underpinning a critique of religion in institutional contexts of secular democratic societies *A Constructive Critique of Religion* explores how constructive

interaction and critique can be developed across diverse interests. It shows how social and cultural conditions shaping these institutions enable and structure a critical and constructive engagement across diverging worldviews. A key argument running through the book is that to develop constructive forms of critique a more thorough and systematic investigation of resources for criticism located within religious worldviews themselves is needed. Chapters also address how critique of Islam and Christianity in particular is expressed in areas such as academia, the law, politics, media, education, and parenting, with a focus on Northern Europe and North America. The interdisciplinary approach, which combines theoretical perspectives with empirical case studies, contributes to advancing studies of the complex and contentious character of religion in contemporary society.

The Mediatization of Religion Luis Mauro Sa Martino, 2016-03-03. Filling a significant gap in the literature by offering a theoretical framework by which we can understand the issues of media, religion, and politics, Luis Mauro Sa Martino asks how can a religious denomination have any sort of influence on people in a secular age. The author presents data which suggests that the presence and influence of religion in public affairs around the world has been strongly supported by the use of media communication and highlights the way some religions have adopted media communication and drawn on popular culture to build their message. The use of media enables a religion to reach more people, attract more members, and generate more income, but also increases religious influence on public matters. The book offers a number of case studies and contemporary examples to illustrate the theory and will be essential reading for all students and scholars of media, politics, and all those interested in the part religion plays in our society.

Media and Religion Daniel Stout, 2013-06-17. This text examines the history, theory, cultural context, and professional aspects of media and religion. While religion has been explored more fully in psychology, sociology, anthropology, and the humanities, there is no clear bridge of understanding to the communication discipline. Daniel A. Stout tackles this issue by providing a roadmap for examining this understudied area so that discussions about media and religion can more easily proceed. Offering great breadth, this text covers key concepts and historical highlights, world religions, denominations, and cultural religion, and religion and specific media genres. The text also includes key terms and questions to ponder for every chapter and concludes with an in-class learning activity that can be used to encourage students to explore the media-religion interface and review the essential ideas presented in the book. *Media and Religion* is an ideal introduction for undergraduate students in need of a foundation for this emerging field.

Rethinking Media, Religion, and Culture Stewart M. Hoover, Knut Lundby, 1997-01-31. This book links the growing connections between media culture and religion into a coherent theoretical whole. It examines, amongst others, the effect on cultural practices and the increasing autonomy and individualized practice of religion.

Media and Identity in Africa John Middleton, Kimani Njogu, 2010-01-04. What is the role of the media in Africa? How do they work? How do they interact with global media? How do they reflect and express local culture? Incorporating both African and international perspectives, *Media and Identity in Africa* demonstrates how media outlets are used to perpetuate, question, or modify the unequal power relations.

between Africa and the rest of the world Discussions about the construction of old and new social entities which are defined by class gender ethnicity political and economic differences wealth poverty cultural behavior language and religion dominate these new assessments of communications media in Africa This volume addresses the tensions between the global and the local that have inspired creative control and use of traditional and modern forms of media
