While America Sleeps Donald Kagan, Frederick Kagan, 2014-09-30 In *While England Slept* Winston Churchill revealed in 1938 how the inadequacy of Britain s military forces to cope with worldwide responsibilities in a peaceful but tense era crippled its ability to deter or even adequately prepare for World War II In *While America Sleeps* historians Donald and Frederick Kagan retrace Britain s international and defense policies during the years after World War I leading up to World War II showing in

persuasive detail how self delusion and an unwillingness to face the inescapable responsibilities on which their security and the peace of the world depended cost the British dearly The Kagans then turn their attention to America and argue that our nation finds itself in a position similar to that of Britain in the 1920s For all its emergency interventions the U S has not yet accepted its unique responsibility to take the lead in preserving the peace Years of military cutbacks the peace dividend following the buildup and triumph over Communism of the Reagan years have weakened our armed forces and left us with too few armed forces to cover too many possible threats This has caused us to bank everything on high tech smart weapons some of which have not yet been invented and others that we are not acquiring or deploying as opposed to the long term commitment of money fighting men and women and planning that the deterrence of a major war would require This failure to shape a policy and to commit the resources needed to maintain peace has cost valuable time in shaping a peaceful world and has placed America s long term security in danger The policies of the Bush and Clinton administrations have left us in a position where we cannot avoid war and keep the peace in areas vital to our security Neither have the post Cold War policies sent clear signals to would be aggressors that the U S can and will resist them Tensions in the Middle East instability in eastern Europe and the former Soviet Union the nuclear confrontation between India and Pakistan the development of nuclear weapons and missiles by North Korea and the menacing threats and actions of China with its immense population resentful sense of grievance and years of military buildup all hint that the current peaceful era will not last forever Can we make it last as long as possible Are we prepared to face its collapse While America Sleeps is a sobering fascinating work of history that poses a thoughtful challenge to policy makers and will interest military buffs as well as readers interested in history and international relations **Diplomatic Counterinsurgency** Philippe Leroux-Martin,2014 This book provides an eyewitness account of a key political crisis triggered by the international community in Bosnia and Herzegovina in 2007

The Bush Administration (1989-1993) and the Development of a European Security Identity Sophie Vanhoonacker,2017-11-22 This title was first published in 2001 This compelling study draws insightful conclusions about US foreign policy towards Europe at a critical juncture in the post Cold War period An absorbing and illuminating account this material will be useful to non specialists and student readers of US foreign policy European integration and international relations alike *The Global Arms Trade* Andrew T. H. Tan,2014-05-22 The Global Arms Trade is a timely comprehensive and in depth study of this topic a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001 It provides a clear description and analysis of the demand for and supply of modern weapons systems and assess key issues of concern This book will be especially useful to scholars policy analysts those in the arms industry defence professionals students of international relations and security studies media professionals government officials and those generally interested in the arms trade **Engineering Peace** Garland H. Williams,2005 In practically all the peacekeeping operations of the 1990s a postconflict reconstruction gap of almost one

year separates the end of military peacekeepers mission of halting mass violence from the start of removing mines as well as rebuilding and repairing the host country's physical infrastructure roads and bridges public utilities and buildings In this timely work Colonel Garland Williams analyzes the postconflict reconstruction gap in three case studies Bosnia Kosovo and Afghanistan and shows how military engineering brigades accompanying peacekeeping contingents can be put to use immediately after the conflict ends to restore vital infrastructure and social institutions In the book's concluding chapter Williams proposes changes in U S national security decision making to integrate military engineering brigades into postconflict reconstruction thus making U S military officials less wary of mission creep and nation building

Principles of Global Security John D. Steinbruner, 2001-09-19 From the earliest human records warfare has been both an organizing focus and a prime source of political motivation Countless battles have been fought in the course of colonizing the planet and the experience has created a legacy of military confrontation that many people consider immutable Since preparations for war and the occasional conduct of it have been central preoccupations for virtually all the major states throughout time it is widely assumed that the pattern is rooted in human nature and will endure indefinitely But contemporary civilization is undergoing a monumental transformation affecting its most basic features The combined effects of information technology population dynamics and the globalization of economic activity are altering some of the critical operating conditions of human societies and appear to be inducing a new pattern of interaction Correspondingly fundamental changes in the practice of war or what is now more politely called international security can be expected to follow Principles of Global Security anticipates the major implications of this massive transformation for security policy John D Steinbruner one of the nation's leading specialists on defense issues identifies formative problems and organizing principles relating to the predictable issues of security He examines in sequence how the configuration of nuclear and conventional forces might be affected how the problems of communal violence and dangers of technical proliferation might be managed and how security relationships among the major states might be altered One of the fundamental implications of globalization in a post cold war environment is a shift in security policy from deterrence to reassurance from active confrontation to cooperative engagement Without an opponent to justify preparation for large scale traditional

missions nations must establish safer and less volatile patterns of deployment Maintaining global security in the twenty first century calls for a reconfiguration of basic relationships among historical opponents as well as revisions in military practices This visionary work will stimulate productive thinking among policymakers seeking to reshape the legacies of the cold war with a new conceptualization of international security NATO and the Former Yugoslavia Joyce P. Kaufman,2002 Focusing on NATO s continued crisis of identity Joyce P Kaufman argues that the conflicts in Croatia Bosnia Herzegovina and Kosovo have proven to be critical to an alliance that has not been able to define its roles and missions in the post Cold War world While on the one hand NATO was enlarging by inviting former adversaries in Central and Eastern Europe and the former Soviet Union to join on the other hand it has been woefully unprepared to deal with the ethnic conflicts that erupted on its borders and that could undermine the peace and stability of Europe The author contends that the conflicts in the former Yugoslavia have potentially threatened the essence of NATO by forcing the alliance to take on the new role of peacekeeper without adequately allowing the members to examine the role the alliance wants to or should play in a largely postcommunist world Despite ongoing discussion in NATO ministerial summits the alliance has made little progress to date and public questions about the role and even the viability of NATO after the Cold War continue to grow The inability to address these issues leaves NATO facing a number of pressing questions that this book tries to answer What role can and should the alliance play in the future And why have the ongoing conflicts in the Balkans proven to be a challenge that the alliance has been unwilling or unable to resolve Counterfactual History and Bosnia-Herzegovina Stian Nordengen Christensen,2018-07-11 **The President and His Inner Circle** Thomas Preston,2001-02-14 Few would argue that presidential policies and performance would have been the same whether John F Kennedy or Richard Nixon became president in 1960 or if Jimmy Carter instead of Ronald Reagan had won the White House in 1980 Indeed in recent elections the character prior policy experience or personalities of candidates have played an increasing role in our assessments of their fit for the Oval Office Further these same characteristics are often used to explain an administration s success or failure in policy making Obviously who the president is and what he is like matters This book a new approach to the study of the personal presidency links the characteristics of six modern American presidents their personalities and their prior policy making experience to their leadership styles advisory arrangements and decision making in the White House Thomas Preston uses M G Hermann s Personality Assessment at a Distance PAD profiling technique as well as exhaustive archival research and interviews with former advisors to develop a leadership style typology He then compares his model s expectations against the actual policy record of six past presidents using foreign policy episodes Korea 1950 for Truman Dien Bien Phu 1954 for Eisenhower Cuba 1962 for Kennedy Vietnam 1967 68 for Johnson the Gulf War 1990 91 for Bush and North Korea Haiti Bosnia 1994 95 for Clinton Introduction to Political Psychology Martha L. Making War, Thinking History Jeffrey Record, 2014-02-15 In examining the influence of historical analogies on decisions to use or not use force military strategist Jeffrey Record assesses every major application of U S force from the Korean War to the NATO war on Serbia Specifically he looks at the influence of two analogies the democracies appeasement of Hitler at Munich and America s defeat in the Vietnam War His book judges the utility of these two analogies on presidential decision making and finds considerable misuse of them in situations where force was optional He points to the Johnson administration s application of the Munich analogy to the circumstances of Southeast Asia in 1965 as the most

egregious example of their misuse but also cites the faulty reasoning by historical analogy that prevailed among critics of Reagan's policy in Central America and in Clinton's use of force in Haiti and the former Yugoslavia. The author's findings show generational experience to be a key influence on presidential decision making. Munich persuaded mid twentieth century presidents that force should be used early and decisively while Vietnam cautioned later presidents against using force at all. Both analogies were at work for the Gulf War with Munich urging a decision for war and Vietnam warning against a graduated and highly restricted use of force. Record also reminds us of the times when presidents have used analogies to mobilize public support for action they have already decided to take. Addressing both the process of presidential decision making and the wisdom of decisions made, this well reasoned book offers timely lessons to a broad audience that includes political scientists, military historians, defense analysts and policy makers as well as those simply curious about history's influence.
