Journey of the Mind Ogi Ogas, Sai Gaddam, 2022-03-08 Two neuroscientists reveal why consciousness exists and how it works by examining eighteen increasingly intelligent minds from microbes to humankind and beyond Why do you exist How did atoms and molecules transform into sentient creatures that experience longing regret compassion and even marvel at their own existence What does it truly mean to have a mind to think Science has offered few answers to these existential questions until now Journey of the Mind is the first book to offer a unified account of the mind that explains how consciousness language self awareness and civilization arose incrementally out of chaos The journey begins three billion years ago with the emergence of the universe's simplest possible mind From there the book explores the nanoscopic archaeon whose thinking machinery consists of a handful of molecules then advances through amoebas worms frogs birds monkeys and humans explaining what each new mind could do that previous minds could not Though they admire the triumph of human consciousness Ogi Ogas and Sai Gaddam argue that humans are hardly the most sophisticated minds on the planet The same physical principles that produce human self awareness are leading cities and nation states to develop superminds and perhaps planting the seeds for even higher forms of consciousness Written in lively accessible language accompanied by vivid illustrations Journey of the Mind is a mind bending work of popular science the first general book to share the cutting edge mathematical basis for consciousness language and the self It shows how a unified theory of the mind can explain the mind's greatest mysteries and offer clues about the ultimate fate of all minds in the universe

a universal journey with which nonimmigrants even native born can easily empathize Our common humanity makes it universal As Dante well put it when he began the narration of his life's journey In the middle of the journey of our lives I found myself in a dark wood As Dante begins the journey guided by Virgil and Beatrice he finds out that indeed the journey is universal beyond the purely personal As Michelangelo said Ancor imparo I am still learning He uttered such a statement at the venerable age of eighty nine a few days before he died He was still sculpting and learning Likewise if we dare to begin the journey at whatever age we may find ourselves we may soon find out that we too are still learning and the journey may well have a common purpose and destination
