Remembering Los Alamos World War II:

Nuclear Nuevo México Myrriah Gómez, 2022-11-22 Nuclear Nuevo Mexico recovers the voices and stories that have been lost or ignored in the telling of U S nuclear history By recuperating these narratives Myrriah Gómez tells a new story of New Mexico one in which the nuclear history is not separate from the collective colonial history of Nuevo Mexico but instead demonstrates how earlier eras of settler colonialism laid the foundation for nuclear colonialism in New Mexico *Querencia* Vanessa Fonseca-Chávez, Levi Romero, Spencer R. Herrera, 2020-06-15 This collection of both deeply personal reflections and carefully researched studies explores the New Mexico homeland through the experiences and perspectives of Chicanx and indigenous Gen zaro writers and scholars from across the state [The First Atomic Bomb](#) Janet Farrell Brodie, 2023-06 2024 Southwest Book of the Year On July 16 1945 just weeks before the atomic bombing of Hiroshima and Nagasaki that brought about the surrender of Japan and the end of World War II the United States unleashed the world's first atomic bomb at the Trinity testing site located in the remote Tularosa Valley in south central New Mexico Immensely more powerful than any weapon the world had seen the bomb's effects on the surrounding and downwind communities of plants animals birds and humans have lasted decades In [The First Atomic Bomb](#) Janet Farrell Brodie explores the history of the Trinity test and those whose contributions have rarely if ever been discussed the men and women who constructed served and witnessed the first test as well as the downwinders who suffered the consequences of the radiation Concentrating on these ordinary people laborers ranchers and Indigenous peoples who lived in the region and participated in the testing Brodie corrects the lack of coverage in existing scholarship on the essential details and everyday experiences of this globally significant event [The First Atomic Bomb](#) also covers the environmental preservation of the Trinity test site and compares it with the wide range of atomic sites now preserved independently or as part of the new Manhattan Project National Historical Park Although the Trinity site became a significant node for testing the new weapons of the postwar United States it is known today as an officially designated National Historic Landmark Brodie presents a timely important and innovative study of an explosion that carries special historical weight in American memory [109 East Palace](#) Jennet Conant, 2007-11-01 From the bestselling author of *Tuxedo Park* the extraordinary story of the thousands of people who were sequestered in a military facility in the desert for twenty seven intense months under J Robert Oppenheimer where the world's best scientists raced to invent the atomic bomb and win World War II In 1943 J Robert Oppenheimer the brilliant charismatic head of the Manhattan Project recruited scientists to live as virtual prisoners of the U S government at Los Alamos a barren mesa thirty five miles outside Santa Fe New Mexico Thousands of men women and children spent the war years sequestered in this top secret military facility They lied to friends and family about where they were going and what they were doing and then disappeared into the desert Through the eyes of a young Santa Fe widow who was one of Oppenheimer's first recruits we see how for all his flaws he developed into an inspiring leader and motivated all those involved in the Los Alamos project to make a supreme effort

Remembering the Cold War David Lowe, Tony Joel, 2014-01-21 Remembering the Cold War examines how more than two decades since the collapse of the Soviet Union Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe Given the Cold War's blurred definition it has neither a widely accepted commencement date nor unanimous conclusion what is to be remembered This book illustrates that there is in fact a huge body of remembrance and that it is more pertinent to ask what should be included and what can be overlooked Over five sections this richly illustrated volume considers case studies of Cold War remembering from different parts of the world and engages with growing theorisation in the field of memory studies specifically in relation to war David Lowe and Tony Joel afford careful consideration to agencies that identify with being victims of the Cold War In addition the concept of arenas of articulation which envelops the myriad spaces in which the remembering commemorating memorialising and even revising of Cold War history takes place is given prominence

The Last Voice José Ignacio Latorre, María Teresa Soto-Sanfiel, 2023-10-02 Most human beings don't manage to achieve fame Roy J Glauber did so for two different reasons Glauber was not only a Nobel Prize winning physicist but also one of the last surviving scientists who worked in Los Alamos in the Theoretical Division of the Manhattan Project He was a witness to all the events and knew all the scientists associated with the creation and launch of the first atomic bombs This book is the product of a series of long interviews held with Roy over three years in Benasque Spain in 2011 and later in Singapore and Cambridge USA Its pages give a first hand account of a true protagonist one who is independent lucid sagacious and committed to the truth The authors have respectfully preserved his spirit his voice is the one that matters The authors asked the questions and they relay his answers Their comments are confined to the footnotes and to brief explanatory paragraphs added simply to provide certain relevant details The importance of the events that Glauber describes here is indisputable as therefore is the book itself The events narrated in its pages will remain part of world history perhaps for centuries or even millennia We live today in the shadow of the decisions made at that time
