provides new analyses and insights on the process of evolving Japanese political economy including Japan's current economic policy known as Abenomics. The first three chapters look at evolutions at the corporate level characterised in recent years by increasing firm heterogeneity. The authors apply theoretically driven analyses to the complex subject of corporate governance, human resource management and corporate reporting by discussing new developments in context of their economic opportunities as well as of their institutional contradictions with continuities in Japanese business practices. The second group of chapters deals with institutional changes and evolving economic reforms on the macro level of political economy. The two chapters focus on the financial system regulation and economic growth policies as two central elements of Japan's political economy and key drivers in the evolution of its economy. Their analysis allows us to better understand the interplay between reforms and change in consumption credit and to reinterpret Abenomics as a manifestation of ongoing contradictions within the Japanese political economy. The chapters were originally published in a special issue in *Japan Forum*.
