associations While acknowledging the pioneering work in word associations among French and English learners this book distinguishes itself by using lexical availability tests to explore word associations and networks in the mental lexicon of English or Spanish learners in classroom contexts Notably it offers lexical data from children and adolescents learning English in primary or secondary schools as well as Spanish learners in high school and university settings filling a gap in research on younger learners and languages other than English The book addresses the need for empirical data on the mental lexicon of English or Spanish learners particularly in primary or secondary classrooms a scarcely investigated educational context
