Transforming Asian Governance M Ramesh,Scott Fritzen,2009-01-13 There are a multitude of hazards that confront attempts to change institutional or political orders in pursuit of good governance Even seemingly technical prescriptions run up against local political and social realities which make their adoption difficult and if adopted require significant modification of the original prescriptions Moreover the technical rationalist and or normative language employed in the good governance discourse masks contests over power rights resources and actors conflicting interests There is a definite need to situate the good governance debate in the local context rather than reflexively adopting a universalistic positing of the fact or

desirability of governance convergence across countries and sectors because the reality is that the world wide deployment of good governance rhetoric is not accompanied by convergence in thinking or practices across nations Transforming Asian Governance asks How do good governance principles translate into local settings How do local settings influence the conception of what is good governance and how the debate over good governance is deployed as a political or administrative strategy Using case studies in governance from Thailand the Philippines Pakistan Malaysia India Indonesia Korea and Japan this book will be essential reading for anyone interested in the public and social policy of Asia and international and comparative governance more generally **Leadership in a Challenging World** Barbara Shipka, 2012-08-06 Leadership in a Challenging World is about a journey to wholeness The whole self is sacred and required in order to lead well in the complex world of today and tomorrow Divided into 3 parts the book begins with the metaphor of the forest for the world with both its demanding challenges and its magnificent possibilities Part 2 uses the metaphor of walking on a path to suggest eight subjective human powers that are essential to leading in business today and tomorrow Finally part 3 describes an ancient basis for the powers and shows how they can serve to bring balance to each other that results in human wholeness

Normative Justification of a Global Ethic Uchenna B. Okeja, 2013 The focus of this book is the normativity of global ethic Over the years different cultures and civilizations have been brought closer than never before by globalization This trend has both its negative and positive dimensions Overall the main problem of this present trend of societal organization and human interaction called globalization is a moral issue namely the question how should we treat one another Okeja's global ethic seeks to answer this question It underscores that we should treat one another in our current age of globalization in accordance with the Golden Rule principle The suggestion of this ethic is therefore that we should not treat others the way we would not want to be treated This sounds simple enough The problem however is that it is not exactly clear what this principle of moral conduct would suggest in both simple and complex moral situations Most importantly it is not clear why it is reasonable to treat people the way we would not want to be treated Why in other words should we act in accordance with the Golden Rule principle What is the justification of the demand the Golden Rule makes on us This book answers these and other questions about the normative plausibility of the Golden Rule and thus global ethic from the comparative perspective of ethics in African philosophy It analyzes three stages of the possible normative justification of the moral imperative of global ethic and proposes a deliberative form of justification *A Corporate Solution to Global Poverty* George Lodge, Craig Wilson, 2016-06-28 World leaders have given the reduction of global poverty top priority And yet it persists Indeed in many countries whose governments lack either the desire or the ability to act poverty has worsened This book a joint venture of a Harvard professor and an economist with the International Finance Corporation argues that the solution lies in the creation of a new institution the World Development Corporation WDC a partnership of multinational corporations MNCs international development agencies and nongovernmental organizations NGOs In *A Corporate Solution to Global Poverty*

George Lodge and Craig Wilson assert that MNCs have the critical combination of capabilities required to build investment grow economies and create jobs in poor countries and thus to reduce poverty Furthermore they can do so profitably and thus sustainably But they lack legitimacy and risk can be high and so a collective approach is better than one in which an individual company proceeds alone Thus a UN sponsored WDC owned and managed by a dozen or so MNCs with NGO support will make a marked difference At a time when big business has been demonized for destroying the environment enjoying one sided benefits from globalization and deceiving investors the book argues MNCs have much to gain from becoming more effective in reducing global poverty This is not a call for philanthropy Lodge and Wilson believe that corporate support for the World Development Corporation will benefit not only the world s poor but also company shareholders as a result of improved MNC legitimacy and stronger markets and profitability
