Droits Judiciaires en Europe Marcel Storme, 2003 Procedural law is of vital importance in Europe Nowadays people and companies that intend to settle in Europe still are being confronted with a huge amount of different national procedures and a hallucinating number of regulations in the procedural field Just consider the different procedural costs strict time limits prescription periods notices of appeal Unlike other branches of law historical or cultural impediments to the harmonisation of European procedural laws play a far more inferior role than technical aspects Eventually all comes down to the question How can one lead a case to a result on a fast way and without high costs In this publication Europe's leading proceduralists share their views on the approximation of procedural laws A specific in depth analysis is made concerning enforcement summary proceedings fast track proceedings and complex litigation In 4 languages English Dutch French and German

Attachment of Assets Lawrence W. Newman, 2014-03-01 Practitioners from leading firms in over 90 countries provide practical information about procedural and substantive issues regarding attachment of assets Because the availability of attachments in advance of judgments can make the difference between success and failure in a lawsuit for money damages and because attachments may often be obtained in places far removed from the venues of proceedings on the merits it is important for

litigation counsel to be aware of the potential for multi jurisdictional assaults on the assets of their clients or of their clients adversaries Attachment of Assets is designed to give practical information and guidance to lawyers and businessmen who are interested in securing expected future judgments and in making strategic decisions concerning the deployment of moveable assets in the face of possible attachments of them The chapters each discussing the requirements of a separate country are written by lawyers with practical expertise in this field The procedure by which attachments are obtained vary ranging from court orders authorizing a court official to take custody of a defendant s assets to orders restraining the defendant from transferring his assets The effects of such orders differ as well some create a lien superior to those of other creditors and others do no more than immobilize the debtor s assets leaving them open to being levied upon by later arriving judgment creditors Countries vary in the ways in which they permit attachments to be carried out whether for example all of the banks in a given city may be served with attachment notices or orders They vary as well with respect to the information that is imparted to the attaching creditor after attachment orders have been served Some rules make available to creditor information concerning the value of assets on which they have successfully levied while others leave creditors in the dark or dependent on informal hints from garnishees as to whether or not pay dirt has been struck Most importantly jurisdictional requirements for the issuance of attachment orders are not similar Some countries permit attachments only if the defendant is subject to the jurisdiction of their courts with respect to the merits of the case Others are less demanding permitting attachments solely on the basis and to the extent of the presence of the assets successfully attached It is probably fair to say that in many foreign jurisdictions the protection of creditors through fraudulent conveyance laws and the like is inadequate or even as a practical matter unavailable The enforcement of judgments is therefore often dependent on a creditor s ability to obtain early even prior to the commencement of a lawsuit a prejudgment attachment or the equivalent of his debtor s assets The extent to which attachments are obtainable in various countries of the world and the basis under which they may be obtained under local law are the focus of Attachment of Assets Format of Publication Organized in a uniform question and answer format that addresses the receptiveness of each country toward the attachment of assets the procedural requirements for filing for attachment reciprocity treaty provisions and defenses Every Chapter is organized with the same special three part arrangement allowing you to quickly and easily locate the information you need for each country Part I contains a survey of the current attitude of each country s courts and government toward the attachment of assets including anticipated changes and recent cases Part II discusses procedure the judgment creditor must follow to file for the attachment of assets in the other country including translation of the judgment currency conversion attorneys fees and recovery of interest Part III summarizes the requirements the judgment creditor must meet for attachment and the defense the judgment and the defenses the judgment debtor must establish to prevent attachment

Recognition and Enforcement of Judgments in Civil and Commercial Matters Anselmo Reyes,2019-09-19 This collection offers a study of the regimes for the recognition and enforcement of foreign commercial judgments in 15 Asian jurisdictions mainland China Hong Kong Taiwan Japan Korea Malaysia Singapore Thailand Vietnam Cambodia Myanmar the Philippines Indonesia Sri Lanka and India For practising

lawyers the book is intended as a practical guide to current law and procedures for enforcing judgments in the selected jurisdictions. However, it does not stop at describing current law and practice. Of interest to academics and students, it also analyses the common principles of the enforcement regimes across the jurisdictions and identifies what should be regarded as the norm for enforcement in Asian countries for the purpose of attracting foreign direct investment and catalysing rapid economic development. In light of the common principles identified, the book explores how laws in Asia may generally be improved to enable judgments to be more readily enforced while ensuring that legitimate concerns over indirect jurisdiction, due process and domestic public policy are respected and addressed. With this in mind, the book discusses the potential impact that the adoption of the 2005 Hague Convention on Choice of Court Agreements might have on Asian jurisdictions; it also considers the potential impact of the convention for the enforcement of judgments in civil and commercial matters presently being drafted by the Hague Conference on Private International Law. This timely book argues that it is imperative to adopt a uniform system for the recognition and enforcement of judgments throughout Asia if there is to be traction for the enhanced cross border commerce that is expected to result from endeavours such as the ASEAN Economic Community (AEC), the Belt and Road Initiative (BRI), CPTPP (also known as TPP 11) and RCEP.

Freezing and Search Orders Mark Hoyle, 2017-09-25. This book provides a solid, accurate and helpful practical reference to those seeking interim relief orders or fighting them, and to show how they can be flexible to protect legal rights and achieve a cost-effective practical result in litigation and arbitration. Litigation and any other form of dispute resolution is redundant if the winning party cannot enforce its judgment or award or cannot hold the position between the parties in the interim before a decision is made. The theory of who should win needs to give way to the practical but often complicated task of ensuring that all relevant evidence is before the decision maker (judge or arbitrator) and that the potential fruits of a favourable decision are not dissipated to leave the winner without financial or practical recourse. This practitioner's guide enables you to protect your client's position in litigation or arbitration and ensures that success in court is not hampered by destruction of evidence or does not lead to an expensive hollow victory because no funds or assets are available.

Fraud and Risk in Commercial Law Paul S Davies, Hans Tjio, 2024-08-08. This book focuses on contemporary problems related to fraud and risk in commercial law. It has been said by some that we are in a golden age of fraud. In part, this has been caused by globalisation, technological changes and the financialisation of business. This has resulted in the creation of automated linkages with integrated supply chains and the creation of systemic risks which have been exacerbated by new forms of intangible assets like tokens and their ease of movement. While regulation has ebbed and flowed given the desire of governments to generate economic growth as well as the distrust of their coercive powers, the courts have sought to strike a balance between considerations such as commercial certainty and fairness. The book provides an analysis of key contemporary issues on the theme of fraud and risk in commercial law, including technology and fraud, secondary liability and failure to prevent economic crime, abuse of business
