Taming Cannabis David A. Guba Jr, 2020-09-23 Despite having the highest rates of cannabis use in the continent France enforces the most repressive laws against the drug in all of Europe Perhaps surprisingly France was once the epicentre of a global movement to medicalize cannabis specifically hashish in the treatment of disease In Taming Cannabis David Guba examines how nineteenth century French authorities routinely blamed hashish consumption especially among Muslim North Africans for behaviour deemed violent and threatening to the social order This association of hashish with violence became the primary impetus for French pharmacists and physicians to tame the drug and deploy it in the homeopathic treatment of mental illness and epidemic disease during the 1830s and 1840s Initially heralded as a wonder

drug capable of curing insanity cholera and the plague hashish was deemed ineffective against these diseases and fell out of repute by the middle 1850s The association between hashish and Muslim violence however remained and became codified in French colonial medicine and law by the 1860s authorities framed hashish as a significant cause of mental illness violence and anti state resistance among indigenous Algerians As the French government looks to reform the nation s drug laws to address the rise in drug related incarceration and the growing popular demand for cannabis legalization *Taming Cannabis* provides a timely and fascinating exploration of the largely untold and living history of cannabis in colonial France

Cannabis as Medicine Betty Wedman-St.Louis,2019-09-26 For hundreds of years cannabis has been used as a therapeutic medicine around the world

Cannabis was an accepted medicine during the second half of the 19th century but its use declined because single agent pain medications were advocated by physicians who demanded standardization of medicines. It was not until 1964 when the chemical structure of THC delta 9 tetrahydrocannabinol was elucidated and its pharmacological effects began to be understood. Numerous therapeutic effects of cannabis have been reviewed but cannabis based medicines are still an enigma because of legal issues. Many patients could benefit from cannabinoids, terpenoids and flavonoids found in *Cannabis sativa* L. These patients suffer from medical conditions including chronic pain, chronic inflammatory diseases, neurological disorders and other debilitating illnesses. As more states are legalizing medical cannabis, prescribers need a reliable source which provides clinical information in a succinct format. This book focuses on the science of cannabis as an antioxidant and anti-inflammatory supplement. It discusses cannabis uses in the human body for bone health, osteoporosis, brain injury and trauma, cancer, diabetes, gastrointestinal conditions, mental health disorders, insomnia, pain, anxiety disorders, depression, migraines, eye disorders and arthritis and inflammation. There is emphasis on using the whole plant from root to raw leaves and flowers, discussing strains, extraction and analysis and use of cannabis infused edibles. Features: Provides an understanding of the botanical and biochemistry behind cannabis as well as its use as a dietary supplement. Discusses endocannabinoid system and cannabinoid receptors. Includes information on antioxidant benefits, pain receptors using cannabinoids and dosage guidelines. Presents research on cannabis treatment plans, drug-cannabis interactions and dosing issues, cannabis vapes, edibles, creams and suppositories. Multiple appendices including a glossary of cannabis vocabulary, how to use cannabis products, a patient guide and recipes as well as information on cannabis for pets.

Subject Catalog Library of Congress, 1982 *National Union Catalog*, 1983. Includes entries for maps and atlases.

Schizophrenia: The Positive Perspective Peter Chadwick, Peter K. Chadwick, 2008-10-09. This fully revised second edition of *Schizophrenia: The Positive Perspective* uses biographical sketches and essays to discuss schizophrenia and related conditions, providing advice on methods of coping, routes to growth, recovery and well-being and how schizophrenia can be viewed in a positive light. It also explores the insights of R. D. Laing and discusses how they can be applied to contemporary ideas and research. In this expanded edition, Peter Chadwick, a previous sufferer, builds on his earlier edition and introduces new topics including Cannabis smoking and schizophrenia, psychoanalytic approaches to psychosis and their extension into the spiritual domain, using cognitive behaviour therapy in the treatment of profound existential distress, how experiences on the edge of madness can be relevant to understanding reality. *Schizophrenia: The Positive Perspective* encourages hope, confidence and increased self-esteem in schizophrenia sufferers and raises new questions about how schizophrenia should be evaluated. It is important reading for anyone working with schizophrenic people, including psychologists, psychiatrists, social workers and other mental health professionals.

Forging the Tortilla Curtain Thomas Torrans, 2000. *Forging the Tortilla Curtain* reveals how the region got to be that way.

BOOK JACKET **Smoke Signals** Martin A. Lee, 2013-08-13. In this book the author, an investigative

journalist traces the social history of marijuana from its origins to its emergence in the 1960s as a defining force in an ongoing culture war. He describes how the illicit marijuana subculture overcame government opposition and morphed into a multibillion dollar industry. In 1996 Californians voted to legalize marijuana for medicinal purposes. Similar laws have followed in several other states but not without antagonistic responses from federal, state, and local law enforcement. The author draws attention to underreported scientific breakthroughs that are reshaping the therapeutic landscape; medical researchers have developed promising treatments for cancer, heart disease, Alzheimer's, diabetes, chronic pain, and many other conditions that are beyond the reach of conventional cures. This book is an examination of the medical, recreational, scientific, and economic dimensions of the world's most controversial plant. **Intoxication** Ronald K. Siegel, 2005-03-29

Psychopharmacologist Ronald K. Siegel draws on 20 years of groundbreaking research to provide countless examples of the intoxication urge in humans and animals. Presenting his conclusions on the biological and cultural reasons for the pursuit of intoxication, Siegel offers recommendations for curbing the negative effects of drug use in Western culture by designing safe intoxicants.
