Olivier Chapuis

Marine Lencyclopédie Diderot D'Alembert:

The Wor(l)ds of Neapolitan Arts and Crafts Raffaella Antinucci, Carolina Diglio, Maria Giovanna Petrillo, 2019-07-19 This collection of essays investigates the terminology of traditional Neapolitan arts and crafts analyzed from a novel linguistic and cultural perspective With some exceptions the trades examined in the contributions including pizza and pastry making the art of presepio crib lute making and coral dealing among others still exist in Naples and in the Campania region They represent an important component of the cultural heritage of the area that this volume brings to light by furthering current research in the fields of terminology history and cultural anthropology The book is divided into two sections corresponding to the two languages in which the articles are written English and French although the terminological analyses also focus on Italian Neapolitan and Spanish This choice is expressly demanded by the political legacy of Naples which for six centuries was alternately dominated by French Spanish and Austrian rulers whose lasting influence on the city's traditions and language the essays explore

The History of Cartography, Volume 4 Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987 the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship Cartography in the European Enlightenment the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans Russians and the Ottomans both at home and in overseas territories from 1650 to 1800 The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world even as large scale cartographic projects became possible under the aegis of powerful states Yet older mapping practices persisted Enlightenment cartography encompassed a wide variety of processes for making circulating and using maps of different types The volume's more than four hundred encyclopedic articles explore the era's mapping covering topics both detailed such as geodetic surveying thematic mapping and map collecting and broad such as women and cartography cartography and the economy and the art and design of maps Copious bibliographical references and nearly one thousand full color illustrations complement the detailed entries

A Cultural History of Work in the Age of Enlightenment Anne Montenach, Deborah Simonton, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities The Enlightenment led to revised ideas about work together with new social attitudes toward work and workers Coupled with dynamism in the economy and the rise of the middling orders work was more frequently perceived positively as a commodity and as a source of social respectability This volume explores the cultural implications of the transition from older systems based on privilege control and embedded practices to a more open society increasingly based on merit and ability It examines how guild controls broke down and political and commercial systems loosened It also considers the theoretical justifications that brought new binding ideas such as the strengthening of ideology on home domesticity for the female and work and politics for the male North America embodied the extremes of these transitions with

free workers able to make their way in a society based on ability and initiative while solidifying the ravages of the slavery system A Cultural History of Work in the Age of Enlightenment presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure **Ensemble de** Miranda Luis de Miranda,2020-01-07 Esprit de corps has played a significant role in the cultural and political history of the last 300 years Through several historical case studies Luis de Miranda shows how this phrase acts as a combat concept with a clear societal impact He also reveals how interconnected yet distinct French English and American modern intellectual and political thought is In the end this is a cautionary analysis of past and current ideologies of ultra unified human ensembles a recurrent historical and theoretical fabulation the author calls ensemble **French Accounting History** Yves Levant,Olivier de la Villarmois,2014-02-25 French Accounting History New Contributions illustrates the lively research activity in the field of accounting and management history in France thus contributing to the dissemination of French research on an international scale Based on a collection of diverse papers by French historians in this field which have been presented at various congresses contributing authors give an overview of French accounting the advent of the auditing profession and management control in France This book aims to further strengthen the development of the community and knowledge base of accounting historians not only in France but also internationally This book is based on a special issue of the journal Accounting History Review The Anatomy of Blackness Andrew S. Curran,2011-09-19 This volume examines the Enlightenment era textualization of the Black African in European thought Andrew S Curran rewrites the history of blackness by replicating the practices of eighteenth century readers Surveying French and European travelogues natural histories works of anatomy pro and anti slavery tracts philosophical treatises and literary texts Curran shows how naturalists and philosophes drew from travel literature to discuss the perceived problem of human blackness within the nascent human sciences He also describes how a number of now forgotten anatomists revolutionized the era s understanding of black Africans and charts the shift of the slavery debate from the moral mercantile and theological realms toward that of the black body itself In tracing this evolution he shows how blackness changed from a mere descriptor in earlier periods into a thing to be measured dissected handled and often brutalized A definitive statement on the complex painful and richly revealing topic of how the major figures of the French Enlightenment reacted to the enslavement of black Africans often to their discredit The fields of race studies and of Enlightenment studies are more than ready to embrace the type of analysis in which Curran engages and all the more so in that his book is beautifully written and illustrated Symposium This is an important contribution to an important topic But it is also a model of how intellectual history should be done New Books in History The breadth of Andrew Curran s knowledge about the Enlightenment is astonishing The book makes the convincing point not only that Africa is a major focus in the Enlightenment s imagination but also that natural history and anthropology are central to understanding not only its scientific agenda but also its humanitarian politics Centaurus Curran s Francotropism and medical

background enable him to develop insights that should prove important to the ongoing transnationalization and discipline blurring of literary and cultural studies Interdisciplinary Studies in Literature and Environment Curran s ability to dissect and explain complicated arguments of the period s major thinkers is impressive Choice *The Mandate of Heaven* Adam Parr,2019-10-07 The Mandate of Heaven examines the first European version of Sunzi s Art of War which was translated from Chinese by Joseph Amiot a French missionary in Beijing and published in Paris in 1772 His work is presented in English for the first time Amiot undertook this project following the suppression of the Society of Jesus in France with the aim of demonstrating the value of the China mission to the French government He addressed his work to Henri Bertin minister of state beginning a thirty year correspondence between the two men Amiot framed his translation in order to promote a radical agenda using the Chinese doctrine of the mandate of heaven This was picked up within the sinophile and radical circle of the physiocrats who promoted China as a model for revolution in Europe The work also arrived just as the concept of strategy was emerging in France Thus Amiot s Sunzi can be placed among seminal developments in European political and strategic thought on the eve of the revolutionary era **Encyclopédie Méthodique, Ou Par Ordre De Matieres** ,1783 *The Discovery of Jeanne Baret* Glynis Ridley,2011-12-06 The year was 1765 Eminent botanist Philibert Commerson had just been appointed to a grand new expedition the first French circumnavigation of the world As the ships official naturalist Commerson would seek out resources medicines spices timber food that could give the French an edge in the ever accelerating race for empire Jeanne Baret Commerson s young mistress and collaborator was desperate not to be left behind She disguised herself as a teenage boy and signed on as his assistant The journey made the twenty six year old known to her shipmates as Jean rather than Jeanne the first woman to ever sail around the globe Yet so little is known about this extraordinary woman whose accomplishments were considered to be subversive even impossible for someone of her sex and class When the ships made landfall and the secret lovers disembarked to explore Baret carried heavy wooden field presses and bulky optical instruments over beaches and hills impressing observers on the ships decks with her obvious strength and stamina Less obvious were the strips of linen wound tight around her upper body and the months she had spent perfecting her masculine disguise in the streets and marketplaces of Paris Expedition commander Louis Antoine de Bougainville recorded in his journal that curious Tahitian natives exposed Baret as a woman eighteen months into the voyage But the true story it turns out is more complicated In *The Discovery of Jeanne Baret* Glynis Ridley unravels the conflicting accounts recorded by Baret s crewmates to piece together the real story how Baret s identity was in fact widely suspected within just a couple of weeks of embarking and the painful consequences of those suspicions the newly discovered notebook written in Baret s own hand that proves her scientific acumen and the thousands of specimens she collected most famously the showy vine bougainvillea Ridley also richly explores Baret s awkward sometimes dangerous interactions with the men on the ship including Baret s lover the obsessive and sometimes prickly naturalist a fashion plate prince who with his elaborate wigs and

velvet garments was often mistaken for a woman himself the ship's surgeon who despised Baret and Commerson even a Tahitian islander who joined the expedition and asked Baret to show him how to behave like a Frenchman But the central character of this true story is Jeanne Baret herself a working class woman whose scientific contributions were quietly dismissed and written out of history until now Anchored in impeccable original research and bursting with unforgettable characters and exotic settings The Discovery of Jeanne Baret offers this forgotten heroine a chance to bloom at long last

A la mer comme au ciel Olivier Chapuis, 1999 **Julien-David Leroy and the Making of Architectural History** Christopher Drew Armstrong, 2013-04-15 This book examines the career and publications of the French architect Julien David Leroy 1724 1803 and his impact on architectural theory and pedagogy Despite not leaving any built work Leroy is a major international figure of eighteenth century architectural theory and culture Considering the place that Leroy occupied in various intellectual circles of the Enlightenment and Revolutionary period this book examines the sources for his ideas about architectural history and theory and defines his impact on subsequent architectural thought This book will be of key interest to graduate students and scholars of Enlightenment era architectural history **Displaying Art in the Early Modern Period** Pamela Bianchi, 2022-08-23 From aesthetic promenades in noble palaces to the performativity of religious apparatus this edited volume reconsiders some of the events habits and spaces that contributed to defining exhibition practices and shaping the imagery of the exhibition space in the early modern period The contributors encourage connections between art history exhibition studies and architectural history and explore micro histories and long term changes in order to open new perspectives for studying these pioneering exhibition making practices Aiming to understand what spaces have done and still do to art the book explores an underdeveloped area in the field that has yet to trace its interdisciplinary nature and understand its place in the history of art The book will be of interest to scholars working in art history museum studies exhibition history and architectural history **The French Book Trade in Enlightenment Europe I** Mark Curran, 2018-08-09 This volume is a ground breaking contribution to enlightenment studies and the international and cross cultural history of print The result of a five year research project the volume traces the output and dissemination of books and how reading tastes changed in the years 1769 1794 Mapping the book trade of the Soci t  Typographique de Neuch tel STN a Swiss publisher wholesaler which operated throughout Europe the authors reconstruct the cosmopolitan elite culture of the later enlightenment incorporating many engaging case studies The STN's archives are uniquely rich in both detail and range and while these archives have long attracted book historians notably Robert Darnton a leading scholar of the Enlightenment existing work is fragmentary and limited in scope By means of comparative study the author considers the entire book market across Europe making local regional and chronological nuances based on advanced taxonomies of subject content author information markers of illegality and much more This volume is in short the most diverse and detailed study of the late 18th century book trade yet while offering fresh insights into the enlightenment **Commerce and Its**

Discontents in Eighteenth-Century French Political Thought Anoush Fraser Terjanian, 2013 This book uncovers the ambivalence towards commerce in eighteenth century France questioning the assumption that commerce was widely celebrated in the era of Adam Smith

Geography and Revolution David N. Livingstone, Charles W. J. Withers, 2010-08-15 A term with myriad associations revolution is commonly understood in its intellectual historical and sociopolitical contexts Until now almost no attention has been paid to revolution and questions of geography Geography and Revolution examines the ways that place and space matter in a variety of revolutionary situations David N Livingstone and Charles W J Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions Here scientific revolutions Copernican Newtonian and Darwinian ordinarily thought of as placeless are revealed to be rooted in specific sites and spaces Technical revolutions the advent of print time keeping and photography emerge as inventions that transformed the world s order without homogenizing it Political revolutions in France England Germany and the United States are notable for their debates on the nature of political institutions and national identity Gathering insight from geographers historians and historians of science Geography and Revolution is an invitation to take the where as seriously as the who and the when in examining the nature shape and location of revolutions

Rethinking the Enlightenment Henry Martyn Lloyd, Geoff Boucher, 2017-12-29 One of the most persistent troubling and divisive of the ideological divisions within modernity is the struggle over the Enlightenment and its legacy Much of the difficulty is owed to a general failure among scholars to consider how history philosophy and politics work together Rethinking the Enlightenment bridges these disciplinary divides Recent work by historians has now called into question many of the clichés that still dominate scholarly understandings of the Enlightenment s literary philosophical and political culture Yet this work has so far had little impact on the reception of the Enlightenment its key players debates and ideas in the disciplines that most rely on its legacy namely philosophy and political science Edited by Geoff Boucher and Henry Martyn Lloyd Rethinking the Enlightenment makes the case for connecting new work in intellectual history with fresh understandings of Continental philosophy and political theory In doing so in this collection moves towards a critical self understanding of the present

Theodore Gericault, Painting Black Bodies Albert Alhadeff, 2020-04-07 This book examines Theodore Gericault s images of black men women and children who suffered slavery s trans Atlantic passage in the late eighteenth and early nineteenth centuries including his 1819 painting The Raft of the Medusa The book focuses on Gericault s depiction of black people his approach towards slavery and the voices that advanced or denigrated them By turning to documents essays and critiques both before and after Waterloo 1815 and most importantly Gericault s own oeuvre this study explores the fetters of slavery that Gericault challenged alongside a growing number of abolitionists overtly or covertly This book will be of interest to scholars in art history race and ethnic studies and students of modernism

Dictionary of Woodworking Tools R. A. Salaman, 1997-07-01 Since its first publication in 1975 R A Salaman s Dictionary of Woodworking Tools has come to be

recognized as a definitive pioneering reference work one of unparalleled value to craftsmen collectors antique dealers and all who are interested in the subject of woodworking tools and their uses His rich language describes and explains the tools not only of the more obvious woodworking trades such as the cabinetmaker chairmaker joiner coachbuilder cooper shipwright plane maker wheelwright and instrument maker but of the less obvious trades as well such as broom and brush makers tree feller hoop maker upholsterer millwright coffin maker and window maker The present edition is a substantial enlargement of the original work revised and updated by Philip Walker himself an authoritative historian collector of tools

Oceanic Histories David Armitage, Alison Bashford, Sujit Sivasundaram, 2018 Freshly presents world history through its oceans and seas in uniquely wide ranging original chapters by leading experts in their fields

Nineteenth Century Businesswomen Charlotte Le Chapelain, 2024-06-30 The book examines female entrepreneurship in the nineteenth century Economic history has long accorded women entrepreneurs a very minor place relegating them to the status of historical anecdotes The hypothesis of women's withdrawal from the business sphere after the eighteenth century has long dominated However this view has recently been subject to a fundamental questioning Women did in fact actively contribute to economic development by occupying key positions in the business sphere as independent workers investors and entrepreneurs Businesswomen were no exception in the nineteenth century They ran businesses of all sizes and in a wide range of industrial sectors This book helps to bring nineteenth century women entrepreneurs out of invisibility by examining their entrepreneurial practices and shedding light on the role of the legal framework in which they operated This interdisciplinary book will appeal to students scholars and researchers of economic history business history history of law and economics and management sciences in general interested in a better understanding of female entrepreneurship in the nineteenth century
