Nieuwenhuis, 2012-12-06 Svend Saxov and J K Nieuwenhuis Laboratory of Geophysics Aarhus University Finlandsgade 6 DK 8200 Aarhus N Denmark Ministry of Transport and Public Works Rijkswaterstaat Deltadienst Van Alkemadelaan 400 2597 AT the Hague The Netherlands The NATO Science Committee Special Programme Panel on Marine Sciences decided in September 1979 that a working group should prepare a document dealing with the problems of marine slides The working group submitted to the Panel a proposal for the arrangement of an interdisciplinary workshop on Marine Slides and other Mass Movements and the Panel decided to fund such a workshop Mass movement of soils and rocks on subaerial slopes is a subject which has been intensely studied over the past fifty years and its literature is becoming extensive The submarine phenomenon although similar in its physical basis is much less studied but has become an important subject particularly during the past decade because of the increase of man's use of the coastal environment and the intensified exploration for oil and minerals on the continental margins and ocean basins Marine Slides and Other Mass Movements S Saxov, J K Nieuwenhuis, 1982-04-01 **Marine Slide and other mass movements**, 1982 **Conference on Continental Margin Mass-wasting and Pleistocene Sea-level Changes, August 13-15, 1980** Geological Survey (U.S.), 1987 See journals under US Geological survey Circular 961 **Developments in Mineral Deposit Modeling**, 1992 U.S. Geological Survey Bulletin, 1983 *Earthquake Hazards in the Offshore Environment* Robert A. J. R. Fasham, 2013-03-09 The impetus for the conference held at Bombannes France in May 1982 arose out of a Scientific Committee on Oceanic Research SCOR Working Group on Mathematical Models in Biological Oceanography This group was

chaired by K H Mann and held two meetings in 1977 and 1979 At both meetings it was felt that although reductionist modelling of marine ecosystems had achieved some successes the future progress lay in the development of holistic ecosystem models The members of the group K H Mann T Platt J M Colebrook D F Smith M J R Fasham J Field G Radach R E Ulanowicz and F Wulff produced a critical review of reductionist and holistic models which was published by the Unesco Press Platt Mann and Ulanowicz 1981 One of the conclusions of this review was that whether holistic or reductionist models are preferred it is critically important to increase the scientific effort in the measurement of physiological rates for the computation of ecological fluxes The Working Group therefore recommended that an international meeting should be organized which would attempt to bring together theoretical ecologists and biological oceanographers to assess the present and future capability for measuring ecological fluxes and incorporating these data into models An approach was made to the Marine Sciences Panel of the NATO Science Committee who expressed an interest in funding such a meeting They awarded a planning grant and a planning group was formed consisting of M J R Fasham M V Angel T Platt R E

**The Role of Solar Ultraviolet Radiation in Marine Ecosystems** John Calkins,2013-03-09 The inspiration for this monograph derived from the realization that human technical capacity has become so great that we can even without malice substantially modify and damage the gigantic and remote outer limit of our planet the stratosphere Above the atmosphere of our ordinary experience the stratosphere is a tenuous layer of gas blocked from rapid exchange with the troposphere some twenty kilometers above the surface of the earth seldom reached by humans and yet a fragile shell which shields life on earth from a band of solar radiation of demonstrable injurious potential It is immediately obvious that if stratospheric ozone were reduced and consequently the intensity of solar ultraviolet radiation reaching the earth s surface were increased then human skin cancer known to be related to solar ultraviolet exposure would also be increased But how does one even begin to estimate the impact of changed solar ultraviolet radiation on such a diverse interacting and complex ecosystem as the oceans Studies which I conducted in Iceland focused on this question and were noted to the Marine Sciences Panel of the Scientific Affairs Committee of NATO by Professor Unnsteinn Stefansson leading to a request to investigate the possibility of organizing a NATO sponsored Advanced Research Institute on this topic
