Mario Botta Irena Sakellaridou, 2000 This volume presents the work of the Swiss born architect who worked as an assistant to such architecture giants as Le Corbusier and Louis I Kahn before starting his own firm in 1970 and achieving international fame Botta's characteristic respect for topographical conditions and regional sensibilities his deft craftmanship and the importance of geometric order in his work are evidenced in thiry projects that range from smaller residential buildings to such grandiose projects as the Church of San Giovanni Battista the Jean Tinguely Museum and most famously the San Francisco Museum of Modern Art This detailed study also includes the designs he created for furniture and the stage Mario Botta Architectural Poetics is a thorough survey of the architectural and design work that launched Botta into the pantheon of modern architecture BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights **Speaking of Buildings** Naomi Stead, Janina Gosseye, Deborah van der Plaat, 2019-10-15 By and large Reserved architectural historians use texts drawings and photographs to craft their narratives Oral testimony from those who actually occupy or construct buildings is rarely taken as seriously Speaking of Buildings offers a rebuttal theorizing the radical potential of a methodology that has historically been cast as unreliable Essays by an international group of scholars look at varied topics from the role of gossip in undermining masculine narratives in architecture to workers accounts of building with cement in midcentury London to a sound art piece created by oral testimonies from Los Angeles public housing residents In sum the authors call for a renewed form of listening to enrich our understanding of what buildings are what they do and what they mean to people Mario Botta Mario Botta, 2001 Architectural and Urban Subsymmetries Jin-Ho Park, 2022-09-24 This book focuses on symmetries in the analysis and synthesis of architectural designs Crucial in the history of architecture principles of symmetry provided the means to achieve balance and harmony of spatial composition in architecture Less well known is the importance of symmetry principles in the analysis of the distinct constituents in a contemporary architectural design which may at first glance appear disorganized or even random The revelation of different hierarchical levels wherein various types of symmetry or subsymmetry are superimposed provides a key for deciphering the underlying structure of spatial logic The interaction between local and global subsymmetries is of particular interest Operating with symmetry concepts in this manner offers architects designers and students an explicit method for understanding the symmetrical logics of sophisticated designs and gaining insights into new designs This book has two complementary objectives to explore the fundamental principles of architectural composition founded on the algebraic structure of symmetry groups in mathematics and to apply the principles in the analysis and synthesis of architectural and urban designs By viewing and decomposing architectural and urban designs in this manner the hidden spatial logic and underlying order in a design become transparent The Greenwood Encyclopedia of Homes through World History James M. Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from

the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three dimensional record of culture Twenty four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available Poetics of Architecture Anthony C. Michael Hays, Marco De Michelis, 2003 Acclaimed as one of the world's foremost modern architects Bernard Tschumi achieved early fame by winning the competition to design the Pare de la Villette on the northeast edge of Paris featuring bright red deconstructivist pavilions Tschumi is widely credited with leading the Graduate School of Architecture Planning and Preservation at New York s Columbia University into the digital age and positioning the school at the forefront of the architectural vanguard During his fifteen year tenure Tschumi has continued to build and the results are amply illustrated in the first monograph to document Tschumi s full career BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Corbusier Alexander Tzonis, 2001 No other architect since Palladio has exercised such an immense influence as Le Corbusier As with Einstein and Picasso Le Corbusier made an impact that was felt within but also outside his special discipline Through numerous buildings urban projects paintings sculptures drawings and publications he succeeded to develop a unique poetics of machine and metaphor revolutionizing the way people see use and make architecture More than a modern architect Le Corbusier was the architect of modern life The present monograph discusses Le Corbusier's oeuvre in a concise global manner in relation to the revolutionary developments of the century in which it was born It shows how Le Corbusier worked within the context of new philosophical ideas the avant garde culture the social economic and political movements and new

technology achieving more than a delicate balance a synthesis But it demonstrates also that Le Corbusier was a creator who conceived enticed and shaped many of these developments As well as being the architect of the twentieth century Le Corbusier is a prototype of human creativity Gae Aulenti Margherita Petranzan, 2003 Italian architect Gae Aulenti is one of the most prominent working in the field today This text presents a richly illustrated survey of Aulenti's body of work including the world famous Musee d Orsay stage designs for theater and opera a villa in St Tropez exhibition designs for the 2001 Milan Triennale and the remodeling of the Palazzo Grassi in Venice Petranzan is the founder of the architectural magazine Anfione Zeto Annotation c 2003 Book News Inc Portland OR booknews com Bibliographie sakrale Gebäude Rudolf Stegers, 2010 **Governance Reform in Africa** Jerome Bachelard, 2013-07-24 Poor governance is increasingly recognized as the greatest impediment to economic development in Sub Saharan Africa Currently some impressive governance reforms are underway in many countries This includes cases such as Nigeria formerly the most corrupt country in the world according to Transparency International Yet other countries such as Chad are still in reform deadlock To account for these differences this book examines governance reform in Sub Saharan Africa based on an analysis of international and domestic pressures and counter pressures It develops a four phase model explaining why governance reforms advance in some instances whilst in others governance reforms stagnate or even relapse No study has sought to systematically examine the political forces both international and domestic behind the successful conduct of governance reform in Sub Saharan Africa Yet coordination collaboration and mutual support between international and domestic actors is critical to push individual governments onto the path of reform This book shows that while international and domestic pro reform pressures are important an analysis of anti reform pressures is also necessary to explain incomplete or failed reform The main theoretical arguments are structured around four hypotheses. The hypotheses are theoretically generated and tested over four case studies Madagascar Kenya Nigeria and Chad On this basis the good governance socialization process is inductively developed in the concluding chapter This model illustrates how governance practices can evolve positively and negatively in all countries of Sub Saharan Africa based on the nature and relative strength of international and domestic pressures and counter pressures
