Handbook of Family and Marital Therapy Sharon A. Shueman, Benjamin B. Wolman, 2012-12-06 Family and marital therapies are rapidly becoming highly used methods of treatment of mental disorders and are no longer ancillary methods to individual psychotherapy The last few decades have brought about an increasing awareness of the fact that excluding organic etiology practically all mental disorders are caused, fostered and/or related to faulty interpersonal relations As a rule the earlier in life one is exposed to noxious factors the more severe is the damage Thus early child parents and child siblings interactions are highly relevant determinants of mental health and mental disorder Moreover parents themselves do not live in a vacuum Their marital interaction significantly contributes to their own mental health or to its decline and parent child relationships are greatly influenced by the nature of intraparental relationships Parental discord, conflicts and abandonment affect the child's personality development Thus family and marital therapy is more than therapy it is an important contribution to the prevention of mental disorder The present volume is comprised of three parts The first primarily theoretical analyzes the fundamental aspects of marital and family therapy The second part describes the various therapeutic techniques and the last deals with several specific issues It gives me great pleasure to acknowledge my gratitude to my coeditor Dr George Stricker Without his thorough and devoted efforts this volume could not have come into being I am also profoundly indebted to our consulting editors Dr James Framo Dr

Mhlanga, 2021-04-21 This book is the epitome of marriage and family in which the author captures the original idea of God of an ideal family with the children as a blessing from God He narrates the fall of humankind and providing the redemptive solution of their fall He puts into perspective the family worship God s family business parents responsibility for their children s career guidance He also discusses about the parents and children in diaspora about the disconnect and he points out the symptoms of mental illnesses that can affect both the children and parents such as bipolar codependent obsessive compulsive

disorder anxiety addiction suicidal thoughts and the symptoms effects of depression Winnicott and 'Good Enough' Couple Therapy Claire Rabin, 2014-04-03 Claire Rabin innovatively applies the Winnicottian theory of the good enough mother to couple therapy redirecting attention to the therapeutic relationship and the therapist's self awareness regardless of the methods used Using this lens even the therapist's mistakes become an opportunity for repairing both the therapeutic relationship and the partners own personal maturity The intensity and pressure of couple therapy can make each case a test of the therapist's competence The need for neutrality constitutes on going pressure on the therapist and the proliferation of therapeutic methods can cause confusion about which might be most useful in each situation Applying theory effectively is easier said than done within the context of the powerful emotions unleashed in sessions which can result in a catastrophic atmosphere These factors can make it hard for therapists to utilise their own skills and knowledge within sessions of couple therapy The book explores how therapists and couples can unintentionally further false selves without realising how the very tools of change may counter authenticity Featuring interviews with an international range of couple therapists and case studies from the author's own experiences the key aspects of the good enough concept are elaborated Rabin shows how these ideas can strengthen therapists sense of security and safety in using their lived experience and intuition Winnicott and Good Enough Couple Therapy is the ideal book for clinicians seeking an overarching framework for working with couples or families as well as those concerned with the importance of the client helper relationship *The Oxford Handbook of Cognitive and Behavioral Therapies* Christine M.
