Maritime Provinces Prehistory James A. Tuck, 1984 The author reconstructs the appearance and ways of life of the prehistoric Micmacs and Malecites Numerous photographs and drawings of archaeological sites and the artifacts discovered there help the reader to understand what life must have been like in the Maritimes in the distant past Prehistoric Archaeology in the Maritime Provinces : Past and Present Research Council of Maritime Premiers (Canada). Maritime Committee on Archaeological Cooperation, Deal, Michael, Susan Blair, New Brunswick. Archaeological Services, 1991 This document includes 13 papers which are arranged according to time period There is an overview paper for each period and a number of theme papers which focus on current research related to the Archaic and Ceramic periods Overview chapters include a summary of previous research a discussion of specific topics of debate among researchers and a brief reconstruction of aboriginal lifeways The papers address important questions concerning the nature of the surviving archaeological record and current reconstructions of cultural change and interactions in the Maritimes The final paper discusses approaches to the management of archaeological resources in Nova Scotia **Diversity and Complexity in Prehistoric Maritime Societies** Bruce J. Bourque, 2007-09-04 New England archaeology has not always been everyone's cup of tea only late in the Golden of nineteenth century archaeology as archaeology's focus turned westward did a few pioneers look northward as well causing a brief flurry of investigation and excavation Between 1892 and 1894 Charles C Willoughby did some exemplary excavations at three small burial sites in Bucksport Orland and Ellsworth Maine and made some models of that activity for exhibition at the Chicago World's Fair These activities were encouraged by E Putnam director of the Harvard Peabody Museum and head of anthropology at the Columbian Exposition Even earlier another director of the Peabody Jeffries Wyman spawned some real interest in the shellheaps of the Maine coast but that did not last very long Twentieth century New England archaeology specifically in Maine was for its first fifty years rather low key too with short lived but important activity by Arlo and Oric a Bates Harvard student prior to World War Later I another Massachusetts institution the Peabody Foundation at Andover took some minor but responsible steps toward further understanding of the area's prehistoric past Ceramics in Circumpolar Prehistory Peter Jordan, Kevin Gibbs, 2019-03-07 Throughout prehistory the Circumpolar World was inhabited by hunter gatherers Pottery making would have been extremely difficult in these cold northern environments and the craft should never have been able to disperse into this region However

archaeologists are now aware that pottery traditions were adopted widely across the Northern World and went on to play a key role in subsistence and social life This book sheds light on the human motivations that lay behind the adoption of pottery the challenges that had to be overcome in order to produce it and the solutions that emerged Including essays by an international team of scholars the volume offers a compelling portrait of the role that pottery cooking technologies played in northern lifeways both in the prehistoric past and in more recent ethnographic times The Cambridge World Prehistory Colin Renfrew, Paul Bahn, 2014-06-09 The Cambridge World Prehistory provides a systematic and authoritative examination of the prehistory of every region around the world from the early days of human origins in Africa two million years ago to the beginnings of written history which in some areas started only two centuries ago Written by a team of leading international scholars the volumes include both traditional topics and cutting edge approaches such as archaeolinguistics and molecular genetics and examine the essential questions of human development around the world The volumes are organised geographically exploring the evolution of hominins and their expansion from Africa as well as the formation of states and development in each region of different technologies such as seafaring metallurgy and food production The Cambridge World Prehistory reveals a rich and complex history of the world It will be an invaluable resource for any student or scholar of archaeology and related disciplines looking to research a particular topic tradition region or period within prehistory The Archaeology of the Atlantic Northeast Matthew W. Gabriel Hrynck, 2022-03-22 *The Far Northeast 3000 BP to Contact* is the first volume to synthesize archaeological research from across Atlantic Canada and northern New England for the period spanning from 3000 years ago to European contact Recently notions of the Woodland period in the broader Northeast have drawn scrutiny from experts due to increasing awareness that its hallmarks such as horticulture village formation mortuary ceremonialism and the advent of various technologies appear to be less synchronous than once thought By paying particular attention to the Far Northeast and its unique yet sometimes marginal position in Woodland discourse this work offers a much needed in depth look at one of the best documented cases of hunter gatherer persistence and adaptation at the eve of European contact Penned by academic government and cultural resource management archaeologists the seventeen chapters in *The Far Northeast 3000 BP to Contact* draw on decades of research in considering this period both in terms of variability within the region and integration with broader cultural patterns in the Northeast and beyond
