Fortune Burkhardt Wolf, 2020-10-12 Sea fortune has always been an issue of good faith and good navigation While in antiquity fortuna gubernatrix was praised for shielding the seaborne trade in the Renaissance fortuna symbolized the conquest of chance and danger Under such auspices while relying on risk technologies modern seafaring has never lost its adventurous dimension Understanding their origin remains a challenge for the history of science and the history of literature

The Persistence of Sail in the Age of Steam Donna J. Souza, 2013-06-29 In *Archaeology Under Water* 1966 19 pioneer nautical archaeologist George Bass pointed out how much easier it is to train someone who is already an archaeologist to become a diver than to take trained divers and teach them to do archaeology While this is generally true there have also been occasions when well trained and enthusiastic sport divers have been willing to accept the training and discipline necessary to conduct good archaeological science becoming first rate scholars in the process Dr Donna Souza's book is the product of just such a transition It shows how a sport diver and volunteer fieldworker can proceed through a rigorous graduate program to achieve research results that are convincing in their own right and point toward new directions in the discipline as a whole What is new in this book for maritime archaeology Perhaps the most obvious and important feature of Dr Souza's archaeological and historical analysis of the wreck at Pulaski Reef and its contemporaries in the Dry Tortugas National Park Florida is the way it serves as a means to a larger end namely an understanding of the social history of the transition from sail to steam in late nineteenth century maritime commerce in America The relationship between changes in technology and culture is a classic theme in anthropology and this study extends the theme into the domain of underwater archaeology **The**

Material Culture of Steamboat Passengers Annalies Corbin, 2005-11-28 For many years one of my favorite classroom devices in historical archaeology was to ask the students to imagine that they had to make the choice between saving from some unnamed calamity all master's theses or all doctoral dissertations in anthropology but not both Like good students they usually looked to their Ph.D. holding professor and chose the dissertations Much to their surprise

I would respond that the theses would win without even taking time to ponder the issue The issue is clearly one of often naive and rarely eloquent theses full of good primary data versus sometimes more sophisticated and better written works full of irrelevant theory and meaningless statistics Perhaps this is an overstatement of the situation but it is not too far off the mark The University Microfilms International efforts to make the titles of dissertations in North America and the English speaking portions of Europe available through Dissertation Abstracts is commendable With only one minor exception dissertations in historical and underwater archaeology in the United States are to be found listed in Dissertation Abstracts and thus are available for purchase
