The Law of the Sea and Maritime Boundary Disputes in Areas of Hydrocarbon Potential Vivek Chandra, 2023-09-22 The United Nations Convention on the Law of Sea UNCLOS is hailed as one of the most significant multilateral legal agreements executed in the past few decades However its shortcomings are neither trivial nor inconsequential especially regarding maritime boundary disputes involving hydrocarbon resources This monograph examines the relationship between UNCLOS and maritime boundaries in five non polar regions encompassing almost 90% of global unresolved disputes involving offshore hydrocarbon development The regions which include the eastern Mediterranean the Caspian Sea the Persian Gulf northeast Asia and the South China Sea were chosen for their oil and gas resources potential and recent military skirmishes that have the potential to lead to wider regional confrontations The book addresses each region s maritime boundary status in the context of specific articles within UNCLOS that have been exploited by disputing states to justify their overlapping claims The history and future applicability of multilateral Joint Development Area agreements for each region are evaluated for their potential to provide a cooperative solution to resolve ongoing tensions Highlighting the limitations of current gun boat diplomacy the monograph makes practical suggestions for new paradigms for resolving outstanding disputes promoting lasting peace and generating economic benefits resulting from resource development

Maritime Power and the Law of the Sea: James Kraska, 2011-01-19 In *Maritime Power and the Law of the Sea* Expeditionary Operations in World Politics Commander James Kraska analyzes the evolving rules governing freedom of the seas and their impact on expeditionary operations in the littoral near shore coastal zone Coastal state practice and international law are developing in ways that restrict naval access to the littorals and associated coastal communities and inshore regions that have become the fulcrum of

world geopolitics Consequently the ability of naval forces to project expeditionary power throughout semi enclosed seas exclusive economic zones EEZs and along the important sea shore interface is diminishing and as a result limiting strategic access and freedom of action where it is most needed Commander Kraska describes how control of the global commons coupled with new approaches to sea power and expeditionary force projection has given the United States and its allies the ability to assert overwhelming sea power to nearly any area of the globe But as the law of the sea gravitates away from a classic liberal order of the oceans naval forces are finding it more challenging to accomplish the spectrum of maritime missions in the coastal littorals including forward presence power projection deterrence humanitarian assistance and sea control The developing legal order of the oceans fuses diplomacy strategy and international law to directly challenge unimpeded access to coastal areas with profound implications for American grand strategy and world politics The Future of Economic Development in the Gulf Cooperation Council States Weshah Razzak,2022-07-22 The Gulf Cooperation Council GCC countries own 30 percent of the world s proven oil reserves and largely depend on oil for their income Yet the GCC faces serious challenges The global demand for oil is expected to continue declining and the average long run oil price could become lower than its historical average in the future This book is a research based structural macroeconomic analysis providing evidence based and future facing policy recommendations for GCC governments First it analyzes historical data to explain the macroeconomic performance and economic policies of the GCC countries from 1970 to 2019 Then it presents ten year dynamic stochastic projections from 2020 to 2030 The book examines debt sustainability and optimal fiscal policies i e government spending and taxation It also analyses structural issues such as savings and productivity from an institutional perspective taking into account education the labor market and pension funds as well as other factors that have a close effect on economic performance The book is comprehensive and thorough it relies on extensive econometric analyses including rigorous time series analysis The author uses both calibration of theoretical models and estimation facilitating projections for the next decade of key economic variables under different policy scenarios The book also assesses what the future of the GCC economies will look like if climate change and the COVID 19 pandemic continue to adversely affect oil supply and demand and the price of oil given their current policies and institutions As well as scholars and researchers of economics and finance the book will engage policymakers in central banks treasury departments planning councils research institutes and think tanks Middle East Contemporary Survey, Vol. 21, 1997 Bruce Maddy-Weitzman,2000 **Oman Oil and Gas Exploration Laws, Regulation Handbook - Strategic Information, Laws and Regulations** IBP, Inc.,2017-12-05 2011 Updated Reprint Updated Annually Oman Oil and Gas Exploration Laws and Regulation Handbook **Lloyd's Maritime and Commercial Law Quarterly** ,1985 **Persian Gulf War Encyclopedia** Spencer C.
