Writings on Art Mark Rothko, 2006-01-01 The first collection of Mark Rothko's writings which range the entire span of his career While the collected writings of many major 20th century artists including Barnett Newman Robert Motherwell and Ad Reinhardt have been published Mark Rothko's writings have only recently come to light beginning with the critically acclaimed The Artist's Reality Philosophies of Art Rothko's other written works have yet to be brought together into a major publication Writings on Art fills this significant void it includes some 90 documents including short essays letters statements and lectures written by Rothko over the course of his career The texts are fully annotated and a chronology of the artist's life and work is also included This provocative compilation of both published and unpublished writings from 1934-69 reveals a number of things about Rothko the importance of writing for an artist who many believed had renounced the written word the meaning of transmission and transition that he experienced as an art teacher at the Brooklyn Jewish Center Academy his deep concern for meditation and spirituality and his private relationships with contemporary artists including Newman Motherwell and Clyfford Still as well as journalists and curators As was revealed in Rothko's The Artist's Reality what emerges from this collection is a more detailed picture of a sophisticated deeply knowledgeable and philosophical artist who was also a passionate and articulate writer

Binding the Absent Body in Medieval and Modern Art Emily Kelley, 2017-07-05 This collection of essays considers artistic works that deal with the body without a visual representation It explores a range of ways to represent this absence of the figure from abject elements such as bodily fluids and waste to surrogate forms including reliquaries manuscripts and cloth The collection focuses on two eras medieval and modern when images referencing the absent body have been far more prolific in the history of art In medieval times works of art became direct references to the absent corporal essence of a divine being like Christ or were used as devotional aids By contrast in the modern era artists often reject depictions of the physical body in order to distance themselves from the history of the idealized human form Through these essays it becomes apparent even when the body is not visible in a work of art it is often still present tangentially Though the essays in this volume bridge two historical periods they have coherent thematic links dealing with abjection embodiment and phenomenology Whether figurative or abstract sacred or secular medieval or modern the body maintains a presence in these works even when it is not at first apparent

Stoker, 2012-01-01 Art has always been important for religion or spirituality Secular art displayed in museums can also be spiritual and it is this art that is the subject of this book Many of the works of art produced by Wassily Kandinsky Mark Rothko Andy Warhol and Anselm Kiefer are spiritual in nature These works reveal their own spirituality which often has no connection to official religions Wessel Stoker demonstrates that these artists communicate religious insights through images and shows how they depict the relationship between heaven and earth between this world and a transcendent reality thus clearly drawing the contours of the spirituality these works evince **Theories and Documents of Contemporary Art** Kristine Stiles, 1996

The Enchantments of Mammon Eugene McCarraher, 2019-11-12 An extraordinary work of intellectual history as well as a scholarly tour de force a bracing polemic and a work of Christian prophecy McCarraher challenges more than 200 years of post Enlightenment assumptions about the way we live and work The Observer At least since Max Weber capitalism has been understood as part of the disenchantment of the world stripping material objects and social relations of their mystery and magic In this magisterial work Eugene McCarraher challenges this conventional view Capitalism he argues is full of sacrament whether one is prepared to acknowledge it or not First flowering in the fields and factories of England and brought to America by Puritans and evangelicals whose doctrine made ample room for industry and profit capitalism has become so thoroughly enmeshed in the fabric of our society that our faith in the market has become sacrosanct Informed by cultural history and theology as well as management theory The Enchantments of Mammon looks to nineteenth century Romantics whose vision of labor combined reason creativity and mutual aid for salvation In this impassioned challenge to some of our most firmly held assumptions McCarraher argues that capitalism has hijacked our intrinsic longing for divinity and urges us to break its hold on our souls A majestic achievement It is a work of great moral and spiritual intelligence and one that invites contemplation about things we can't afford not to care about deeply Commonweal More brilliant more capacious and more entertaining page by page than his most ardent fans dared hope The magnitude of his accomplishment an account of American capitalism as a religion will stun even skeptical readers Christian Century

Charles Olson and American Modernism Mark Byers, 2018-04-27 This volume situates the work of American poet Charles Olson 1910-1970 at the centre of the early post war American avant garde It shows Olson to have been one of the major advocates and theorists of American modernism in the late 1940s and early 1950s a poet who responded fully and variously to the political ethical and aesthetic urgencies driving innovation across contemporary American art Reading Olson's work alongside that of contemporaries associated with the New York Schools of painting and music as well as the exiled Frankfurt School the book draws on Olson's published and unpublished writings to establish an original account of early post war American modernism The development of Olson's work is seen to illustrate two primary drivers of formal innovation in the period the evolution of a new model of political action pivoting around the radical individual and relatedly a powerful new critique of instrumental reason and the Enlightenment tradition Drawing on extensive archival research and featuring readings of a wide range of artists including prominently Barnett Newman Mark Rothko David Smith Wolfgang Paalen and John Cage Charles Olson and American Modernism offers a new reading of a major American poet and an original account of the emergence of post war American modernism

The New York Schools of Music and the Visual Arts Steven Johnson, 2012-11-12 Musicians and artists have always shared mutual interests and exchanged theories of art and creativity This exchange climaxed just after World War II when a group of New York based musicians including John Cage Morton Feldman Earle Brown and David Tudor formed friendships with a group of painters The latter group now known collectively as either the New York School or the Abstract Expressionists included Jackson Pollock Willem deKooning Robert Motherwell Mark Rothko Barnett Newman Clyfford Still Franz Kline Phillip Guston and William Bazotes The group also included a younger generation of artists particularly Robert Rauschenberg and Jasper Johns that stood somewhat apart from the Abstract Expressionists This group of painters created what is arguably the first significant American movement in the visual arts Inspired by the artists the New York School composers accomplished a similar feat By the beginning of the 1960s the New York Schools of art and music had assumed a position of leadership in the world of art For anyone interested in the development of 20th century art music and culture The New York Schools of Music and Art will make for illuminating reading
