Market Competition And Democracy:

Competition Law and Democracy Elias Deutscher,2023 This book asks how competition and its protection through competition law are linked with democracy It finds that the supposed symbiosis between competition law and democracy rests on a republican understanding of liberty as the absence of domination which originates in ancient Roman thought

Competition Law and Democracy Elias Deutscher,2024-11-28 Examining the normative foundations of US antitrust and EU competition law Elias Deutscher argues that the idea of a competition democracy nexus rests on a commitment to a republican understanding of economic liberty The book uses this republican concept of economic liberty to analyse how US antitrust and EU competition law embodied a competition democracy nexus and explains how the turn of competition law toward a more economic approach has led to its decline The book offers proposals for how the nexus can be revived to allow competition law to address contemporary concerns about the concentration of corporate power   *Populism and Antitrust* Maciej Bernatt,2022-02-24 Competition law is designed to promote a consumer friendly economy but for the law to work in practice competition agencies and the courts who oversee them must enforce it effectively and impartially Today however the rule of populist governments is challenging the foundations of competition law in unprecedented ways In this comprehensive work Maciej Bernatt analyses these challenges and describes how populist governments have influenced national and regional EU competition law systems Using empirical findings from Poland and Hungary Bernatt proposes a new theoretical framework that will allow the illiberal influence of populism on competition law systems to be better measured and understood Populism and Antitrust will be of interest not only to antitrust and constitutional law scholars but also to those concerned about the future of liberal democracy and free markets   **Democracy's Values** Ian Shapiro,Casiano Hacker-Cordón,1999-08-19 Democracy has been a flawed hegemony since the fall of communism Its flexibility its commitment to equality of representation and its recognition of the legitimacy of opposition politics are all positive features for political institutions But democracy has many deficiencies it is all too easily held hostage by powerful interests it often fails to advance social justice and it does not cope well with a number of features of the political landscape such as political identities boundary disputes and environmental crises Although democracy is valuable it fits uneasily with other political values and is in many respects less than equal to the demands it confronts In this volume and its companion Democracy s Edges prominent political theorists and social scientists present original discussions of such central issues Democracy s Values deals with the nature and value of democracy particularly the tensions between it and such goods as justice equality efficiency and freedom   **Marketing, Competition and the Public Sector** Henry Tam,1994 This text is aimed at a manager who requires a good all round view of marketing in the public sector It examines how the discipline of marketing can be applied to management in the public sector Case studies are included This text is aimed at a manager who requires a good all round view of marketing in the public sector It examines how the discipline of marketing can be applied to

management in the public sector It should help politicians mangers and students of public sector management understand potential benefits and harm of exposing the public sector to market forces Case studies are included **Experimentalist Competition Law and the Regulation of Markets** Yane Svetiev,2020-11-26 This book charts the emergence of experimentalist governance in the implementation of EU competition law as a response to uncertainty and the limits of hierarchical enforcement in an increasingly dynamic and heterogeneous economic environment It contributes to ongoing debates about the current state of EU competition law and provides an innovative account of emergent enforcement trends and its future direction It also argues that an experimentalist evolution of competition law and market regulation attenuates concerns about the competitive strictures of EU law on national economic and regulatory institutions Through its focus on experimentalist governance the book provides guidance on completing experimentalist infrastructures for market regulation as well as on the role of courts in triggering and sustaining experimentalist solutions As such it offers a novel perspective on implementing competition law in the EU and beyond Democracy's Arsenal Jacques S. Gansler,2013-08-16 An expert explains why the security needs of the twenty first century require a transformation of the defense industry of the twentieth century New geopolitical realities including terrorism pandemics rogue nuclear states resource conflicts insurgencies mass migration economic collapse and cyber attacks have created a dramatically different national security environment for America Twentieth century defense strategies technologies and industrial practices will not meet the security requirements of a post 9 11 world In Democracy s Arsenal Jacques Gansler describes the transformations needed in government and industry to achieve a new more effective system of national defense Drawing on his decades of experience in industry government and academia Gansler argues that the old model of ever increasing defense expenditures on largely outmoded weapons systems must be replaced by a strategy that combines a healthy economy effective international relations and a strong but affordable national security posture The defense industry must remake itself to become responsive and relevant to the needs of twenty first century security **The Chinese Model of Modern Development** Tian Yu Cao,2005 This study examines the Chinese model of modern development reflecting on the historical experience of China s reform and highlighting theoretical issues that are crucial for understanding the reform in its historical and global contexts Bringing together articles from scholars including designers of and active participants in the reform opinion setters in the current debates on the nature and future of the reform and Western scholars whose ideas have had great impact on Chinese intellectuals the book considers the goals of China s reforms and the ways in which these goals may be achieved the most urgent issues now facing China and globalization and its impact on China **The Evolving Governance of EU Competition Law in a Time of Disruptions** Carlo Maria Colombo,Kathryn Wright,Mariolina Eliantonio,2024-02-08 This book develops a timely analysis of the complex trends and transformations emerging in EU competition law in the current turbulent times Repeated economic crises the climate emergency digitalisation and geopolitical and democratic threats are

all having profound societal and economic effects on the EU In light of its fundamental role in the Treaties EU competition law has been called upon to play an important role in responding to this state of turbulence This brings about significant governance and constitutional challenges firstly by questioning how the governance of EU competition law is being transformed to respond and adapt Secondly these crisis induced transformations probe the logic and constitutional limits of EU competition law within the framework of EU law This collection brings together EU institutional and competition lawyers to reflect on the governance and constitutional challenges emerging from the post modernisation evolution of EU competition law against the backdrop of the recent multiple crises in the EU The essays focus on the substantive and procedural developments across the three main policy areas of EU competition law antitrust merger control and State aid EU constitutional and competition lawyers will be interested in this important new collection **Research Handbook on Asian Competition Law** Steven Van Uytsel,Shuya Hayashi,John O. Haley,2020-04-24 This timely Research Handbook provides a comprehensive overview and discussion of the substantive competition law provisions of the ASEAN Plus Three region including Hong Kong and Taiwan Taking a unique comparative perspective chapters examine Asian competition laws in relation to the existing laws that served as models for them analysing how and why they deviate <u>Competition, Diversity and Economic Performance</u> C. A. Tisdell,2013-02-01 Ecological and economic systems share some fundamental characteristics that Clem Tisdell has beautifully illuminated He has given us a much better handle on the roles of competition diversity evolution and sustainability in complex interdependent ecological and economic systems Our ability to build a sustainable and desirable future fundamentally depends on this integrated understanding Robert Costanza Portland State University US This thought provoking book explores the influences of market competition and diverse behaviours of economic agents on economic performance particularly dynamic economic performance Clem Tisdell illustrates within evolutionary dynamic and static contexts how diversity can improve or impede economic performance He addresses the fact the role of diversity in improving economic performance has been neglected by economic theorists by making economic diversity a focal point of economic analysis In particular special attention is given to the value of economic diversity and economic imperfections in improving the performance of economic processes in particular identified situations Limitations of using market like mechanisms for managing public bodies and business firms are discussed and the value of business cooperation economic mutualism as a means for improving economic performance is examined It is also observed that as economies develop different forms of economic competition and business cooperation evolve Challenging yet accessible this book will prove a stimulating read for academics and students in the fields of economics industrial organization and business and management **Hyperdemocracy** S. Welch,2013-10-24 This book argues that a well educated citizenry and freer flow of information has contributed to a state of hyperdemocracy which impedes itself This book applies the idea of reflexive modernization to democratic theory setting out a new perspective on the challenges democracy faces *Antitrust and*

Upstream Platform Power Plays A. K. von Moltke,2023-11-29 In recent years large digital platforms have been in the doghouse of antitrust decision makers worldwide Antitrust regulators agree urgent intervention is needed Interestingly it is the plight of victimized suppliers of merchants app developers publishers platform labourers and the like who are upstream in the value chain that has topped the policy agenda prompting scrutiny of an almost unprecedented intensity Amid such anxieties Antitrust and Upstream Platform Power Plays asks a somewhat provocative question are upstream platform power plays really competition problems and ones for antitrust at that The obvious answer yes is deceptively simple for a number of reasons First it contradicts contemporary antitrust s single minded focus on consumers which has all but erased supplier exploitation in the brick and mortar economy from the policy s radar Second the wider antitrust community remains bitterly divided when it comes to judging platform practices In addition if any consensus could be had it would almost certainly confirm the long standing tenet that antitrust cannot be about supplier welfare as such These paradoxes call for a policy introspection precisely what this book provides The analysis offered in Antitrust and Upstream Platform Power Plays is altogether normative theoretical and practical Normative because it engages in a supplier mindful soul searching exercise which advances our understanding of antitrust s foundations theoretical as it sheds multidisciplinary insights on upstream effects in the platform economy and develops new frameworks for rationalizing them and practical since it takes a deep dive into the complex antitrust machinery while staying attuned to other available levers of public action Answering a compelling question with an equally compelling answer this work will appeal to scholars and policymakers worldwide with a particular interest in platform regulation antitrust and powerful digital platforms   *Innovative Computing and Information* Minli Dai,2011-09-06 This six volume set CCIS 231 232 233 234 235 236 constitutes the refereed proceedings of the International Conference on Computing Information and Control ICCIC 2011 held in Wuhan China in September 2011 The papers are organized in two volumes on Innovative Computing and Information CCIS 231 and 232 two volumes on Computing and Intelligent Systems CCIS 233 and 234 and in two volumes on Information and Management Engineering CCIS 235 and 236

Lynn,Christopher Pollitt,2007 The public sector continues to play a strategic role across the world and in the last thirty years there have been major shifts in approaches to its management This text identifies the trends in public management and the effects these have had as well as providing a broad overview to each topic
