Financial Market Bubbles and Crashes Harold L. Vogel, 2021-12-17 Economists broadly define financial asset price bubbles as episodes in which prices rise

with notable rapidity and depart from historically established asset valuation multiples and relationships Financial economists have for decades attempted to study and interpret bubbles through the prisms of rational expectations efficient markets equilibrium arbitrage and capital asset pricing models but they have not made much if any progress toward a consistent and reliable theory that explains how and why bubbles and crashes evolve and are defined measured and compared This book develops a new and different approach that is based on the central notion that bubbles and crashes reflect urgent short side rationing which means that as such extreme conditions unfold considerations of quantities owned or not owned begin to displace considerations of price

Framing Finance Alex Preda, 2009-08-01 As the banking crisis and its effects on the world economy have made plain the stock market is of colossal importance to our livelihoods In Framing Finance Alex Preda looks at the history of the market to figure out how we arrived at a point where investing is not only commonplace but critical as market fluctuations threaten our plans to send our children to college or retire comfortably As Preda discovers through extensive research the public was once much more skeptical For investing to become accepted a deep seated prejudice against speculation had to be overcome and Preda reveals that over the course of the eighteenth and nineteenth centuries groups associated with stock exchanges in New York London and Paris managed to redefine finance as a scientific pursuit grounded in observational technology But Preda also notes that as the financial data in which they trafficked became ever more difficult to understand charismatic speculators emerged whose manipulations of the market undermined the benefits of widespread investment And so Framing Finance ends with an eye on the future proposing a system of public financial education to counter the irrational elements that still animate the appeal of finance
