## **Market Reforms In Socialist Societies Comparing China And Hungary:**

**Market Reforms in Socialist Societies** Peter Van Ness, 2023 In this book eminent Chinese and Hungarian scholars evaluate the present status of market reforms in their countries and assess their own and each other's problems and achievements

Market Reforms in Socialist Societies George Barany, 1989 **China's Transition from Socialism?** Dorothy J. Solinger, 2016-06-16 The essays in this volume address the industrial commercial urban and regional reforms of China's planned economy during the 1980s. The emphasis is on the dominating institutional and bureaucratic presence of the state even as it sought to loosen the pre 1979 vertically structured centralised command system and to introduce some market principles to stimulate economic activity. The essays fall into four categories: theoretical and policy discussions and debates at the central leadership level; reform of the urban economy and of inter regional relations; industrial and commercial reforms and the rise and position of the new entrepreneurial class. Many of the essays draw on interviews with Chinese economic officials in the Central China city of Wuhan and therefore this is the only study that uses local data on actual operations of reforms from a Chinese city. The other sources are the Chinese press and Chinese official and scholarly journals. In each of the categories there are pieces from different points in the chronological process of reform. This study begins with the first theoretical discussions among China's economists and top political leaders in the late 1970s and concludes with experiments with bankruptcy and stock markets in the late 1980s. The countervailing heavy presence of the state at both the policy and the practical levels throughout the reform decade is its unifying theme. **Comparative Economic**

**Transformations** Yu-Shan Wu, 1994 This pathbreaking work attempts to understand China's economic policies by examining the political logic behind economic reforms in authoritarian command economy states from the wholly original perspective of property rights. **Perspectives on Accounting and Finance in China (RLE Accounting)** John Blake, Simon S.

Gao, 2013-12-04 The rush of entrepreneurial activity in China has been watched with interest by the financial world. This book the result of an international symposium on Chinese accounting and financial management assesses the little known accounting scene in China which up until 1978 remained behind closed doors. Divided into four sections the volume covers Chinese perspectives on accounting the business and financial structure of China including the re emergence of a Chinese stock market the regulatory framework of accounting in China and comparisons with international accounting standards the impact of current reforms in Chinese accounting practice the emergence of a new accounting profession in China. The concluding chapter provides an overview of the cultural context of the reforms which took place in the 1990s. By using comparisons with other Asian countries accounting systems like Taiwan the contributors to the volume give an analysis of the state of accountancy in China during the 1990s. The Prospects for Liberal Nationalism in Post-Leninist States Cheng

Chen, 2010-11-01 Why Market Socialism? Frank Roosevelt, David Belkin, Robert L. Heilbroner, 2016-09-16 A collection of essays on market socialism originally published in Dissent between 1985 and 1993. Among other topics they take issue with

the traditional view that socialism means rejecting the use of markets to organise economic activities and question the reliance upon markets

**Beyond the Kremlin's Reach?** Jan Zofka, Péter Vámos, Sören Urbansky, 2023-05-29 This volume examines relations between the People's Republic of China PRC and socialist Eastern European states during the Cold War. The chapters take previous findings on government policy and China's role as a global player in the Cold War game as a starting point to locate the PRC in the socialist world and assess levels of interaction beyond diplomatic and governmental relations. By focusing on transfers and interconnections and the social dimension of governmental interactions, the primary goal of this book is to explore structures, institutions and spaces of interaction between China and Eastern Europe and their potential autonomy from political conjunctures. The guiding question that the book raises is: To what extent did Chinese and Eastern European players outside the range of the power centres have room to manoeuvre beyond the agendas of the Kremlin, national governments or party leaderships? The question of the relative autonomy becomes especially vibrant against the backdrop of the development of Sino-Soviet relations from alliance to split to reconciliation through the Cold War era. This book contributes to the growing scholarship on East-South and intra-bloc relations from the perspective of global and transnational history and will be of interest to researchers, students and policy makers in the fields of History, East European and Russian studies, International Relations and politics. The chapters in this book were originally published as a special issue of Cold War History.

**Perestroika in Eastern Europe** Gabor Revesz, 2019-05-28 In this analytical history of the reform process in Hungary, Gabor Revesz traces the country's efforts to transform a planned economy into a system of market socialism. He covers the assumptions, objectives, political pressures and limitations that have shaped the reform.

**Contemporary Chinese Politics in Historical Perspective** Brantly Womack, 1991-11-29 Eight distinguished China specialists provide broad-gauged original essays that attempt to explain the dynamics of contemporary Chinese politics by analyzing the preceding patterns of development.

Urban Land Reform in China L. Hin, 1999-05-10 Provides an authoritative account of urban land reform in China, which is unique in merging the existing socialist landowner system with market mechanisms. The book starts with an historical account of the land tenure system in China, followed by discussions of the reform within its legal, administrative and financial frameworks.

**The Dual Developmental State** Ming Xia, 2017-12-01 This title was first published in 2000. The developmental state model, which originated in Japan, has ascended to the status of the leading paradigm for the East Asian political economy. This text explores the proposition of many specialists that China has emulated the model and become part of the 'flying geese' pattern of development.

**Comparative Economics in a Transforming World Economy** John Barkley Rosser, 2004 The second edition of an innovative undergraduate textbook in Comparative Economic Systems that goes beyond the traditional dichotomies.

**Bulletin of the Atomic Scientists**, 1990-11

**Chinese Law** Jianfu Chen, 2023-09-25 Law, in particular its actual functioning in any given society, is above all a part of the culture of that society, a part of its historical, political, social and intellectual creation. If a

black letter approach towards law in the West is under increasing criticism it is particularly unhelpful if not misleading in understanding Chinese law its nature and developments Rather to understand Chinese law its nature and developments we need to examine the Chinese legal traditions the prevailing political and economic situations Party policies on economic reform and tolerance towards political liberalisation and scholarly discussions and debate This is the approach of this book Its aim is to put Chinese law in context to outline the nature and present status of its development and to analyse the meaning of the law within the Chinese context However this monograph does not ignore the practical needs for determining the precise contents of the black letter law either A study of this kind necessarily involves a process of topic selection However to avoid over generalisation and over simplification it also demands a considerable degree of comprehensiveness in coverage For this reason the book covers what the Chinese scholars term fundamental law and basic branches of law while other topics are covered because they are either crucial for the understanding of the law such as legal traditions in China or of practical importance such as foreign investment and trade Chapter One provides an historical background to traditional Chinese legal culture and modern law reforms The historical background of specific topics is examined as the topics are analysed in the following chapters Chapter Two deals with the changing fate of law under Communist rule Its focus is on the underlying factors and justifications for such changes Chapter Three introduces discussions on specific branches of law from public law constitutional law law making administrative law criminal law criminal procedure law to private law civil law family law contracts law on business entities and law on foreign investment and trade Each of these is dealt with in a separate chapter After the analysis of these substantial topics certain conclusions are drawn which attempt to define the nature of Chinese law and its developments in present day China Bulletin of the Atomic Scientists ,1990-11 Journal of Economic Literature ,1991 *From Family to Market* Fei-Ling Wang,1998 This book analyzes Chinese history politics and economic development through the lens of labor allocation within the world s largest workforce Capturing the peculiarities continuities and changes in the PRC s institutional structure Fei Ling Wang examines the segmented nature of China s labor force today He points to the rare coexistence of four labor allocation patterns the traditional family based system authoritarian state allocation community based labor markets and the emerging national labor market China s enduringly stable yet backward institutional structure was based firmly on a mix of family and state institutions now the addition of market forces highlights the PRC s transitional state Bolstered with rich case study detail and Chinese source material this study argues that the development of labor allocation patterns will profoundly influence China s political and economic development in the coming century **Confronting the Bush Doctrine** Melvin Gurtov,Peter Van Ness,2005 Accessibly written and including satirical cartoons this remarkable book focuses on the Bush Doctrine in Asia and examines how the Bush initiatives are received and reacted to in Asia Institutions and Institutional Change in China F. Wang,2016-01-18 Wang proposes and applies an innovative analytical framework to study the institutional continuity and changes in China

More specifically this study examines and explains the peculiar premodernity and the profound modernization process of China. On the track of a state led modernization the dragon of China is found to be institutionally entering the nets of the market economy. An inquiry of China's labour allocation patterns and their changes serves as the indicator for the institutional analysis.
