change Carter's engaging case study approach encourages students to question motives consider alternatives and analyze outcomes *Globalization* Howard J. Wiarda, 2007 The definitive volume on globalization from a comparative politics perspective **Russia, China and the Revisionist Assault on the Western Liberal International Order** Gerlinde Groitl, 2023-05-22 This book analyzes Russian and Chinese revisionism in the face of US and Western post Cold War liberal international order building and asks why both powers have turned revisionist in the late 2000s The study develops a neoclassical realist model of international order building and contestation and posits to view revisionism as a strategic choice States go revisionist if the status quo international order threatens their vital security needs broadly defined not only as territorial security but also political economic normative and ontological and if they have the means to challenge the undesirable status quo Russia and China were both unhappy with the post Cold War international order of American designs but had to opt for accommodation in the 1990s and early 2000s strategic accommodation in the Chinese case resentful accommodation in the Russian case before revisionism became even more of a necessity and a real policy option from the late 2000s onward constructive revisionism in the Chinese case destructive revisionism in the Russian case The author calls for a policy of neo containment to counter Moscow's and Beijing's efforts to game and erode the international order [China and America: Destined for Conflict?](#) Wenzhao Tao, 2022-09-25 This book explores the possibility and feasibility of building a new model of major country relations between China and the United States which is of great significance to the sound interaction between the two countries and the preservation of peace and stability of the world In early June 2013 Chinese President Xi Jinping and US President Barack Obama reached a consensus on building a new model of major country relations at the historical Sunny lands meeting in California In the years that followed the two leaders were committed to that goal despite the different interpretations in its substance How is the new model of major country relations conceptualized and developed What renders it possible Is the major country conflict inevitable These are the basic issues addressed in this book Now China US relations are at a critical juncture The international community is watching the world's two largest economies and is quite concerned about the future of one of the world's most complicated bilateral relationships This timely publication of Professor Tao Wenzhao provides us with a realistic approach to managing this vital relationship in a candid and balanced way **American Grand Strategy from Obama to Trump** Zeno Leoni, 2021-03-01 This book maintains that the theory of imperialism should incorporate the concept of an operational code of political elites to account for agencies actions This concept would explain the strategic continuity and tactical change in US grand strategy from Obama to Trump While both presidents pursued a strategy of off shore balancing their competing worldviews led to tangible differences in the way they sought to restore American power after Bush and to contain the rise of China This book offers an important contribution after the departure of Bush concluded the 21st century debate on imperialism at a time when an increasingly post American world order has undermined the end of the state thesis Indeed over the last twelve years US grand strategy has emphasized inter

state competition rather than the annihilation of rogue regimes These events require renewed efforts for the theory of imperialism to contribute to Globalisation Theory at this crucial historical junction **Globalization, Political Economy, Business and Society in Pandemic Times** Tony Fang, John Hassler, 2021-12-08 Globalization Political Economy Business and Society in Pandemic Times contributes to the growing literature on COVID 19 through a multidisciplinary approach by helping build a holistic understanding of the impact of the COVID 19 pandemic on politics economies business and society in a globalized world **Congressional Record** United States. Congress, 2001 **China's Rise in the Age of Globalization** Jianyong Yue, 2018-01-12 This book deconstructs a series of myths surrounding China s economic rise The first myth is that globalization led directly to China s rise the second is that China is another East Asian developmental state the third that China s market reform had been implemented in an incremental way and fourth that China s resilient authoritarianism has been effective in ensuring the country s economic and political transformation Yue argues that the China model is one of crony comprador capitalism that has hindered the country s attempts at economic and political modernity It is argued that the United States strategy of integrating China into the international system is self defeating in the long run not because such an approach has created a restless empire capable of challenging US primacy but because the Chinese miracle has subsequently backfired on the liberal order created after World War Two Covering the entire reform period from the end of the Cultural Revolution in 1976 to the present day the author calls for readers to rethink globalization and leave more policy space for China and the developing nations to pursue national development through internal integration which is more conducive to democratic transition and global peace **China, New Zealand, and the Complexities of Globalization** Tim Beal, Yuanfei Kang, 2016-12-12 The book examines the expansion of investment and trade between China and New Zealand and its changing composition within the political framework especially the 2008 Free Trade Agreement Particular attention is paid to China s volatile agrifood market where New Zealand dairy products play an important role for both countries The New Zealand China economic relationship asymmetrical and complementary but with increasing competition from domestic production is a case study of the complexities of globalization and the interplay of economic imperatives political pressures and cultural factors China is now New Zealand s main economic partner and a major source of migrants tourists and students This proposed study on how New Zealand and China manage their grave dissimilarities and disparities in growing ever close economic ties will be of interest to academics policy analysts economic trade decision makers and business practitioners **China's Globalization from Below** Theodor Tudoroiu, 2021-09-09 This book analyzes the Chinese centered globalization from below brought about by China s entrepreneurial migrants and conceived of as a projection of Chinese power in the Belt and Road Initiative partner states It identifies the features of this globalization from below scrutinizes its mutually reinforcing relationship with China s globalization from above and shows that these two globalizations are intrinsically related to the construction of a new international order It outlines how the actors in China s

globalization from below include Chinese emigrants who are located in informal transnational economic networks. It reveals that Beijing has enacted many laws that compel these emigrants to contribute to the development of their country of origin but also influences them through the successful promotion of a specific type of deterritorialized nationalism and that China is ready to impose harsh punitive actions on political elites in partner states which fail to protect its migrants or limit their economic activities. Finally, it argues that China's globalization from below is fundamentally different from the non-hegemonic globalization from below represented by, among others, Lebanese and East Indian traders and that China's globalization from below is rather a self-interested national strategy intended to support the construction of a Chinese-centered international order.

Constructing Human Rights in the Age of Globalization Mahmood Monshipouri, Neil Englehart, Andrew J. Nathan, Kavita Philip, 2015-06-01

Both human rights and globalization are powerful ideas and processes capable of transforming the world in profound ways. Notwithstanding their universal claims, however, the processes are constructed and they draw their power from the specific cultural and political contexts in which they are constructed. Far from bringing about a harmonious cosmopolitan order, they have stimulated conflict and opposition. In the context of globalization, as the idea of human rights has become universal, its meaning has become one more terrain of struggle among groups with their own interests and goals. Part I of this volume looks at political and cultural struggles to control the human rights regime that is the power to construct the universal claims that will prevail in a territory with respect to property, the state, the environment, and women. Part II examines the dynamics and counterdynamics of transnational networks in their interactions with local actors in Iran, China, and Hong Kong. Part III looks at the prospects for fruitful human rights dialogue between competing universalisms that by definition are intolerant of contradiction and averse to compromise.

Communication, Public Opinion, and Globalization in Urban China Francis L.F. Lee, Chin-Chuan Lee, Mike Z. Yao, Tsan-Kuo Chang, Fen Jennifer Lin, Chris Fei Shen, 2013-10-08

As China is increasingly integrated into the processes of economic, political, social, and cultural globalization, important questions arise about how Chinese people perceive and evaluate such processes. At the same time, international communication scholars have long been interested in how local national and transnational media communications shape people's attitudes and values. Combining these two concerns, this book examines a range of questions pertinent to public opinion toward globalization in urban China: To what degree are the urban residents in China exposed to the influences from the outside world? How many transnational social connections does a typical urban Chinese citizen have? How often do they consume foreign media? To what extent are they aware of the notion of globalization and what do they think about it? Do they believe that globalization is beneficial to China, to the city where they live, and to them personally? How

do people's social connections and communication activities shape their views toward globalization and the outside world This book tackles these and other questions systematically by analyzing a four city comparative survey of urban Chinese residents demonstrating the complexities of public opinion in China Media consumption does relate though by no means straightforwardly to people's attitudes and beliefs and this book provides much needed information and insights about Chinese public opinion on globalization It also develops fresh conceptual and empirical insights on issues such as public opinion toward US China relations Chinese people's nationalistic sentiments and approaches to analyze attitudes toward globalization

The Politics of China's Accession to the World Trade Organization Hui Feng,2006-01-16 Grounded on a series of first hand interviews with Chinese government officials this book examines China's accession to the World Trade Organization providing an inside look at Chinese WTO accession negotiations Presenting a systematic political economy model in analyzing Beijing's decision making mechanisms the book argues that China's WTO policy making is a state led leadership driven and top down process Feng explores how China's determined political elite partly bypassed and partly restructured a largely reluctant and resistant bureaucracy under constant pressure from an increasingly globalized international system By addressing China's accession to the WTO from a political analysis perspective the book provides a theoretically informed and intriguing examination of China's foreign economic policy making regime The book highlights contemporary debates relating to state and institutionalist theory and provides new and useful insights into a significant development of this century

Latin America and the Shifting Sands of Globalization Sean W. Burges,2016-01-22 Latin America occupies an increasingly prominent position within the global political economic and cultural consciousness with intra regional governance structures and multilateral processes now a key topic of interest to foreign policy and international business

circles It has become abundantly clear that outside of Latin America there is a poor understanding of how the shifting sands of regional power are impacting not only on how regional countries fit into the global system but also on how intra regional relations are viewed and managed The contributions to this collection investigate these issues examining how changing global power dynamics are in turn impacting on national foreign policies and regional governance structures The book focuses first and foremost on the Latin American view outwards not the US or European view to the south This book was originally published as a special issue of the Journal of Iberian and Latin American Research
