Mode In Javanese Music:

Mode in Javanese Music Susan Pratt Walton, 1987 One of the most controversial aspects of Javanese gamelan music is its musical mode *pathet*. From her experience as a performer of *sindhengan* or female singing Walton analyses the melodies and defines the basic laws of mode for *sindhengan*. She explains more convincingly than previous authors how two systems of mode operate simultaneously in gamelan music to enhance its aesthetic appeal

The Bedhaya Court Dances of Central Java Clara Brakel-Papenhuijzen, 2023-11-27 The ritual *bedhaya* dances of the Central Javanese courts form a highly valued expression of Javanese culture. These stately dance forms comprising complex choreographies executed to the accompaniment of archaic songs and gamelan music are part of the cultural tradition of the Mataram dynasty. They have been preserved in the two main court centres of Central Java Surakarta and Yogyakarta. The contents of the book range from a relatively general introduction to a detailed analysis of structural formal features of the dances. Included are theories on the origin, social context and esoteric meaning as well as 19th and 20th century scores of performances. The two main components of the art form choral singing and group dancing have each been discussed in a separate chapter. A number of song texts and choreographies transcribed from palace manuscripts are published for the first time. These songs represent an archaic singing style which holds important information on the development of Javanese vocal and instrumental music. An analysis of *bedhaya* choreographies which are seldom performed nowadays may serve to prevent the impending disappearance of this beautiful and stylized art form. The choreographic discussion has been visualized on a 60 minute video tape produced from research material which was filmed between 1983-1985. This video tape may be ordered from the author.

Part I deals with the intellectual trends that contributed to the birth of the discipline in the period before World War II. Organized by national schools of scholarship, the influence of 19th century anthropological theories on the new field of comparative musicology is described. In the second half of the book regional experts provide detailed reviews by geographical areas of the current state of ethnomusicological research.

Gamelan Sumarsam, 1995-12-15 *Gamelan* is the first study of the music of Java and the development of the gamelan to take into account extensive historical sources and contemporary cultural theory and criticism. An ensemble dominated by bronze percussion instruments that dates back to the twelfth century in Java, the gamelan as a musical organization and a genre of performance reflects a cultural heritage that is the product of centuries of interaction between Hindu, Islamic, European, Chinese and Malay cultural forces. Drawing on sources ranging from a twelfth century royal poem to the writing of

a twentieth century nationalist Sumarsam shows how the Indian inspired contexts and ideology of the Javanese performing arts were first adjusted to the Sufi tradition and later shaped by European performance styles in the eighteenth and nineteenth centuries He then turns to accounts of gamelan theory and practice from the colonial and postcolonial periods Finally he presents his own theory of gamelan stressing the relationship between purely vocal melodies and classical gamelan composition

Gender in Solomon's Song of Songs Alastair Ian Haines, 2016-12-14 The thesis shows that the Song of Songs can be read as a circular sequence of sub poems that follow logically from one another if they are understood as contributing to two main points made in a woman's voice The woman urges men to take romantic initiative to be committed exclusively and for life and urges women three times to wait until they are approached by such men If this reading is the best explanation of the text of the Song then the Song is a unified work centered on a woman singing about human romantic love from a woman's perspective
