Policing Space Territoriality And The Los Angeles Police Department:

Policing Space Steve Herbert, 1996-11-15 *Policing Space* is a fascinating firsthand account of how the Los Angeles Police Department attempts to control its vast heterogeneous territory. As such, the book offers a rare ground level look at the relationship between the control of space and the exercise of power. Author Steve Herbert spent eight months observing one patrol division of the LAPD on the job. A compelling story in itself, his fieldwork with the officers in the Wilshire Division affords readers a close view of the complex factors at play in how the police define and control territory, how they make and mark space. A remarkable ethnography of a powerful police department underscored throughout with telling on the scene vignettes, this book is also an unusually intensive analysis of the exercise of territorial power and of territoriality as a key component of police power. Unique in its application of fieldwork and theory to this complex subject, it should prove valuable to readers in urban and political geography, urban and political sociology, and criminology, as well as those who wonder about the workings of the LAPD.

Policing Space Steven Kelly Herbert, 1997 *Policing Space* is a fascinating firsthand account of how the Los Angeles Police Department attempts to control its vast heterogeneous territory. Author Steve Herbert spent eight months observing one patrol division of the LAPD on the job. A compelling story in itself, his fieldwork with the officers in the Wilshire Division affords readers a close view of the complex factors at play in how the police define and control territory, how they make and mark space. Unique in its application of fieldwork and theory to this complex subject, *Policing Space* should prove valuable to readers in urban and political geography, urban and political sociology, and criminology, as well as those who wonder about the workings of the LAPD.

Police, Power, and the Production of Racial Boundaries

Ana Muñiz, 2015-08-03 Based on five years of ethnography, archival research, census data analysis, and interviews, *Police Power and the Production of Racial Boundaries* reveals how the LAPD, city prosecutors, and business owners struggled to control who should be considered dangerous and how they should be policed in Los Angeles. Sociologist Ana Muñiz shows how these influential groups used policies and everyday procedures to criminalize behaviors commonly associated with blacks and Latinos and to promote an exceedingly aggressive form of policing. Muñiz illuminates the degree to which the definitions of gangs and deviants are politically constructed labels born of public policy and court decisions, offering an innovative look at the process of criminalization and underscoring the ways in which a politically powerful coalition can define deviant behavior. As she does so, Muñiz also highlights the various grassroots challenges to such policies and the efforts to call attention to their racist effects. Muñiz describes the fight over two very different methods of policing: community policing, in which the police and the community work together, and the broken windows or zero tolerance approach, which aggressively polices minor infractions such as loitering to deter more serious crime. *Police Power and the Production of Racial Boundaries* also explores the history of the area to explain how Cadillac Corning became viewed by outsiders as a violent neighborhood and how the

city's first gang injunction a restraining order aimed at alleged gang members solidified this negative image. As a result, Muiz shows Cadillac Corning and other sections became a test site for repressive practices that eventually spread to the rest of the city.

A Companion to Political Geography John A. Agnew, Katharyne Mitchell, Gerard Toal, 2008-04-15 A Companion to Political Geography presents students and researchers with a substantial survey of this active and vibrant field. Introduces the best thinking in contemporary political geography. Contributions written by scholars whose work has helped to shape the discipline. Includes work at the cutting edge of the field. Covers the latest theoretical developments.

Making the San Fernando Valley Laura R. Barraclough, 2011 In the first book-length scholarly study of the San Fernando Valley home to one third of the population of Los Angeles, Laura R. Barraclough combines ambitious historical sweep with an on-the-ground investigation of contemporary life in this iconic western suburb. She is particularly intrigued by the Valley's many rural elements such as dirt roads, tack and feed stores, horse-keeping districts, citrus groves, and movie ranches. Far from natural or undeveloped spaces, these rural characteristics are, she shows, the result of deliberate urban planning decisions that have shaped the Valley over the course of more than a hundred years. The Valley's entwined history of urban development and rural preservation has real ramifications today for patterns of racial and class inequality and especially for the evolving meaning of whiteness. Immersing herself in meetings of homeowners' associations, equestrian organizations, and redistricting committees, Barraclough uncovers the racial biases embedded in rhetoric about open space and western heritage. The Valley's urban cowboys enjoy exclusive semirural landscapes alongside the opportunities afforded by one of the world's largest cities. Despite this enviable position, they have at their disposal powerful articulations of both white victimization and, with little contradiction, color-blind politics.

Transnational Environmental Crime Rob White, 2017-07-05 The essays selected for this volume illustrate the growing interest in and importance of crime that is both environmental and transnational in nature. The topics covered range from pollution and waste to biodiversity and wildlife crimes and from the violation of human rights associated with the exploitation of natural resources through to the criminogenic implications of climate change. The collection provides insight into the nature and dynamics of this type of crime and examines in detail who is harmed and what can be done about it. Differential victimisation and contemporary developments in environmental law enforcement are also considered. Collectively, these essays lay the foundations for a criminology that is forward-looking, global in its purview, and that deals with the key environmental issues of the present age.

Understanding Police Culture John P. Crank, 2014-09-25 Police culture has been widely criticized as a source of resistance to change and reform and is often misunderstood. This book seeks to capture the heart of police culture, including its tragedies and celebrations, and to understand its powerful themes of morality, solidarity, and common sense by systematically integrating a broad literature on police culture into middle-range theory and developing original perspectives about many aspects of police work.

Police Ethics Tom Barker (Ph. D.), Thomas Barker, 2011 This third edition has been comprehensively revised expanding the information in the previous edition on the long standing challenge of implementing effective responsible and acceptable practices in ethical police work The author's unique perspective provides insights not found elsewhere and presents them in an informative fact filled and encouraging way The text is based on the premise that ethical crisis has always existed in law enforcement and stresses that policing is and always has been a morally dangerous occupation The moral dangers of policing are discussed in detail and emphasize how crucial ethical standards are for police officers Four critical and primary questions

addressed in the text are Is law enforcement a profession Can law enforcement officers be professional What forms of behavior are the major law enforcement ethical violations Can police ethical violations be controlled Several chapters also thoroughly review the Law Enforcement Code of Ethics and include very up to date examples of notable violations by individual officers and police departments Additional topics include major police corruption issues including corrupt practices and corruption control abuse of authority and getting effective control of unethical behavior The goal of this timely new edition is to provide officers law enforcement managers and city administrators with only the most current information tools and skills in identifying and dealing with unethical police behavior It is valuable to both new and seasoned officers in a significant effort to make policing a true profession that is real and not rhetoric Provided by publisher A Theory of ISIS Mohammad-Mahmoud Ould Mohamedou,2017-11-20 The Islamic State of Iraq and Syria has been the subject of intense scrutiny in the West Considered by many to be the most dangerous terrorist organisation in the world it has become shrouded in numerous myths and narratives many emanating from the US which often fail to grasp its true nature Against these narratives Mohammad Mahmoud Ould Mohamedou presents a bold new theory of ISIS By tracing its genealogy and documenting its evolution in Iraq and Syria he argues that ISIS has transcended Osama Bin Laden s original project of Al Qaeda mutating into an unprecedented hybrid form that distils postcolonial violence postmodernity and the emerging post globalisation international order This book analyses ISIS from a social sciences perspective and unpacks its dynamics by looking beyond superficial questions such as its terrorist nature and religious rhetoric It transforms our understanding of ISIS and its profound impact on the very nature of contemporary political violence Urban and Regional Planning and Development Rajiv R. Thakur,Ashok K. Dutt,Sudhir K. Thakur,George M. Pomeroy,2020-02-10 This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed It addresses questions such as What are the factors affecting planning dynamics at local regional national and global scales With the push to adopt a market paradigm in land development and infrastructure the relationship between resource management sustainable development and the role of governance has been transformed Centralized planning is giving way to privatization not only in the traditional regions but also in newly emerging regions of Asia Africa and Latin America Further attempts are being made to bring planning related decision making closer to the people who are most affected by it Presenting a collection of studies from scholars around the world and highlighting recent advances in the field the book is a valuable reference guide for those engaged in urban transformations whether as graduate students researchers practitioners or policymakers The Police and Society Victor E. Kappeler,Brian P. Schaefer,2018-09-11 The most productive route to understanding the dynamic interrelationships of the police with society is to examine the recurring central themes in policing The articles in this anthology represent some of the best scholarship on compelling issues Selected for both their complementary and competing natures the articles serve as touchstones for one another often challenging

previous conceptions Many selections question the methods by which information was acquired the practices that evolved from that information and the background assumptions behind the construction of practices Some of the many issues and conflicts addressed in this collection include What is the nature of the police role and function Who benefits from police service Who is harmed How are public safety and social order secured while maintaining individual rights and freedoms To what extent do our expectations about the police and society reflect our values and demands Are the police a society unto themselves Is policing at a critical crossroads The editors assembled this volume with the goal of helping readers to identify underlying assumptions to dissect how values influence inquiries and to discover connections A better understanding of the role of the police in society provides a solid foundation for assessing the efficacy of future police society relationships

The SAGE Handbook of Qualitative Geography Dydia DeLyser, 2010 The process of learning qualitative research has altered dramatically and this Handbook explores the growth change and complexity within the topic and looks back over its history to assess the current state of the art and indicate possible future directions Moving beyond textbook rehearsals of standard issues the book examines key methodological debates and conflicts approaching them in a critical discursive manner

On the Frontlines of the Welfare State Barry Goetz, 2017-02-17 Although public safety agencies protect our well being they also shape social problems and community inequities Public safety protections promote what T H Marshall called social rights of equitable citizenship Frontlines of Welfare State shows how public safety agencies function as welfare state agencies responsible for a range of essential public functions including emergency service criminal investigation regulatory oversight and social service outreach Furthermore this volume shows how public safety agencies are being asked to absorb more social welfare functions amidst cut backs in other areas of the welfare state Two areas of public safety are examined arson control and fire prevention especially within the contexts of urban change and gentrification and community policing especially as a mechanism of expanding drug treatment service and prevention programs Facilitating a greater understanding of institutional biases within the state built around organizational structures procedures and cultures and their impact on social outcomes this original and exciting book will be of interest to researchers practitioners and undergraduate and postgraduate students in the fields of Policing and Fire Control Public Policy and Administration Drugs and Substance Abuse and White Collar Crime

Handbook on the Geographies of Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some

hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war Citizens and borderwork in contemporary Europe Chris Rumford,2013-10-31 The extent to which ordinary people can construct shift and dismantle borders is seriously neglected in the existing literature The book explores the ability of citizens to participate in the making of borders and the empowerment that can result from this bordering and debordering activity Borderwork is the name given to the ways in which ordinary people can make and unmake borders Borderwork is no longer only the business of nation states it is also the business of citizens and indeed non citizens This study of borderwork extends the recent interest in forms of bordering which do not necessarily occur at the state s external borders However the changing nature of borders cannot be reduced to a shift from the edges to the interior of a polity To date little research has been conducted on the role of ordinary people in envisioning constructing maintaining shifting and erasing borders creating borders which facilitate mobility for some while creating barriers to mobility for others appropriating the political resources which bordering offers contesting the legitimacy of or undermining the borders imposed by others This book makes an original contribution to the literature and stands to set the agenda for a new dimension of border studies This book was published as a special issue of Space and Polity The Prison Boundary Jennifer Turner,2016-07-13 This book explores the idea of the prison boundary identifying where it is located which processes and performances help construct and animate it and who takes part in them Although the relationship between prison and non prison has garnered academic interest from various disciplines in the last decade the cultural performance of the boundary has been largely ignored This book adds to the field by exploring the complexity of the material and symbolic connections that exist between society and carceral space Drawing on a range of cultural examples including governmental legislation penal tourism prisoner work programmes and art by offenders Jennifer Turner attends to the everyday practised manifestations and negotiations of the prison boundary The book reveals how prisoners actively engage with life outside of prison and how members of the public may cross the boundary to the inside In doing so it shows the prison boundary to be a complex patchwork of processes people and parts The book will be of great interest to scholars and upper level students of criminology carceral geography and cultural studies **The Wiley-Blackwell Companion to Human Geography** John A. Agnew,James S. Duncan,2016-08-08 This volume provides an up to date authoritative synthesis of the discipline of human geography Unparalleled in scope the companion offers an indispensable overview to the field representing both historical and contemporary perspectives Edited and written by the world s leading authorities in the discipline Divided into three major sections Foundations the history of human geography from Ancient Greece to the late nineteenth century The Classics the roots of modern human geography Contemporary Approaches current issues and themes in human geography Each

contemporary issue is examined by two contributors offering distinctive perspectives on the same theme
