Reading Lessons The Debate Over Literacy:

Reading Lessons Gerald Coles, 1999-09 The dominant debate over literacy disregards the myriad societal influences that affect teaching and learning influences that are not readily visible in the classroom No debate can adequately understand how literacy is taught and learned what causes literacy achievement and underachievement or how literacy success is defined unless it accounts for these macro influences If the debate over literacy were more about politics economics and power in society and less about the best way to teach literacy we would better understand how to rear literate children Intro p 8 The Great Curriculum Debate Tom Loveless, 2004-05-13 Since the early twentieth century American educators have been engaged in a heated debate over what schools should teach and how they should teach it The partisans education progressives and education traditionalists have usually kept their disagreements within the walls of the nation s schools of education Periodically however arguments have erupted which have generated headlines and attracted public attention making clear the potential for bitterness and rancor in education politics In the 1990s progressives and traditionalists squared off in a dispute over reading and mathematics Arguments over how best to teach these two subjects is detailed in The Great Curriculum Debate How Should We Teach Reading and Math This book includes contributions from distinguished scholars from both sides of the debate as well as influential nonpartisans The proponents of whole language and phonics present their opposing views on reading Advocates and opponents of NCTM math reform the agenda of the National Council of Teachers of Mathematics NCTM discuss their differing opinions about math Although the authors disagree on many of the most important aspects of learning they agree on one point the school curriculum matters Decisions made now about the content of reading and mathematics will have long term consequences not only for students and schools but for society as a whole Contributors include E D Hirsch Jr University of Virginia Gail Burrill Mathematical Sciences Education Board Michael T Battista Kent State University David C Geary University of Missouri Columbia Roger Shouse Penn State University Adam Gamoran University of Wisconsin Madison Richard Askey University of Wisconsin Madison Diane Ravitch New York University Catherine E Snow Harvard University Margaret Moustafa California State University LA Richard L Allington University of Florida William Lowe Boyd Penn State University a Translating Theory and Research Into Educational Practice Mark A. people learn to read opens onto the broader questions of what schools are really for and why so many of America's schools are faltering Why cant U teach me 2 read is a poignant vital book for the reader in all of us
