Reading Matters Narrative In The New Media Ecology:

Reading Matters Joseph Tabbi, Michael Wutz, 2018-05-31 The convergence of twentieth century narrative and technology is one of the most important developments in current literary study A decade after the founding of the Society for Literature and Science and the appearance of such influential books as Kathleen Woodward's *Culture of Information* and William Paulson's *The Noise of Culture* Joseph Tabbi and Michael Wutz have edited a landmark volume to summarize this still emerging field Twelve original essays and the editors' introductory overview show how these theoretical concerns can contribute to the practical study of narrative *Reading Matters* covers the range of contemporary literature from the canonical novels of high modernism and postmodernism through subjects new to the academic agenda such as cyberpunk and hypertext fiction In an age that has proclaimed the death of the novel many times over the contributors argue persuasively for the continued vitality of literary narrative By responding in ingenious ways to the capabilities of other media they assert the novel has enlarged and redefined its territory of representation and its range of techniques and play while maintaining its viability in the new media assemblage

Narrative Across Media Marie-Laure Ryan, 2004-01-01 Narratology has been conceived from its earliest days as a project that transcends disciplines and media The essays gathered here address the question of how narrative migrates mutates and creates meaning as it is expressed across various media Dividing the inquiry into five areas face to face narrative still pictures moving pictures music and digital media *Narrative across Media* investigates how the intrinsic properties of the supporting medium shape the form of narrative and affect the narrative experience Unlike other interdisciplinary approaches to narrative studies all of which have tended to concentrate on narrative across language supported fields this unique collection provides a much needed analysis of how narrative operates when expressed through visual gestural electronic and musical means In doing so the collection redefines the act of storytelling Although the fields of media and narrative studies have been invigorated by a variety of theoretical approaches this volume seeks to avoid a dominant theoretical bias by providing instead a collection of concrete studies that inspire a direct look at texts rather than relying on a particular theory of interpretation A contribution to both narrative and media studies *Narrative across Media* is the first attempt to bridge the two disciplines

Media Ecologies of Literature Susanne Beyerlipp, Ralf Haekel, Johannes Schlegel, 2022-11-03 This book explores the media ecologies of literature the ways in which a literary text is interwoven in its material technical performative praxeological affective and discursive network and which determine how it is experienced and interpreted Through novel approaches to the complex contingent and interdependent environments of literature this volume demonstrates how questions about the mediality of literature particularly in the wake of digitization shed a new light on our understanding of textuality reading platforms and reception processes By drawing on recent developments in advanced media theory *Media Ecologies of Literature* emphasizes the productivity of innovative reconceptualizations of literature as a medium in its own right In an intentionally wide historical scope the essays engage with
