[Why Psychosis Is Not So Crazy](#) Stijn Vanheule, 2024-09-17 An expert's guide to humanizing psychosis through communication offers key insights for family and friends to support loved ones during mental health crises Are we all a little crazy Roughly 15 percent of the population will have a psychotic experience in which they lose contact with reality Yet we often struggle to understand and talk about psychosis Interactions between people build on the stories they tell each other stories about the past about who they are or what they want In psychosis we can no longer rely on these stories this shared language So how should we communicate with someone experiencing reality in a radically different way than we are Drawing on his work in psychoanalysis Stijn Vanheule seeks to answer this question which carries significant implications for mental health as a whole With a combination of theory from Freud to Lacan present day research and compelling examples from his own patients and well known figures such as director David Lynch and artist Yayoi Kusama he explores psychosis in an engaging way that can benefit those suffering from it as well as the people who care for and interact with them
