Concept Maps

A concept map is a visual organizer that can enrich students' understanding of a new concept. Using a graphic organizer, students think about the concept in several ways. Most concept map organizers engage students in answering questions such as, "What is it? What is it like? What are some examples?" Concept maps deepen understanding and comprehension.

Why use a concept map?

- It helps children organize new information.
- It helps students to make meaningful connections between the main idea and other information.
- They're easy to construct and can be used within any content area.

How to use a concept map

Note: It is important that teachers spend time introducing younger students to charts and diagrams prior to using this strategy.

There are several ways to construct concept maps. Most include the following steps:

1. Model how to identify the major ideas or concepts presented in a selection of text as you read.
2. Organize the ideas into categories. Remind students that your organization may change as you continue to read and add more information.
3. Use lines or arrows on the map to represent how ideas are connected to one another, a particular category, and/or the main concept. Limit the amount of information on the map to avoid frustration.
4. After students have finished the map, encourage them to share and reflect on how they each made the connections between concepts.
5. Encourage students to use the concept map to summarize what was read.

Textbooks in School and Society Arthur Woodward, David L. Elliot, Kathleen Carter Nagel, 2013-08-21 Textbooks have been standard schoolroom fixtures for as long as most living citizens of this country can remember Many turn of the century students were introduced to reading through the moralistic McGuffey Readers and struggled through the rather drab and colorless pages of volumes on history geography and civics In contrast today s textbooks contain not only narrative content accompanied by colorful photographs and graphics but also section and chapter exercises that are extended through the use of worksheets and other materials Moreover the textbook and its related student materials are packaged together with teacher s editions and tests in grade level sets that amount to content area programs rather than mere texts
