Reading Retail A Geographical Perspective On Retailing And Consumption Spaces:

Reading Retail Michelle Lowe, 2002 *Reading Retail* captures contemporary debates on the geography of retailing and consumption spaces. It is constructed around a series of readings from key works and is designed to encourage readers to develop a sense of engagement with the rapidly evolving debates in this field. More than 60 edited readings are integrated into the text providing a guided route map through the literature and into the study of the geographies of retailing and consumption. The volume also introduces readers to the exciting and interdisciplinary developments unfolding in the new retail geography drawing on up to the minute research material from areas ranging from anthropology to business studies and tackling issues as diverse as retail internationalization and e-commerce. *Reading Retail* is unique in bringing together a huge range of perspectives on retailing and consumption spaces and will provide a key source text for students in this field.

Reading Retail Neil Wrigley, 2002 The geographies of retailing and consumption have become one of the key topics of the late 20th century both in terms of research and in terms of undergraduate teaching. This text provides students with an overview of this subject.

Retail Worker Politics, Race and Consumption in South Africa Bridget Kenny, 2018-05-23 This book argues that we need to focus attention on the ways that workers themselves have invested subjectively in what it means to be a worker. By doing so we gain an explanation that moves us beyond the economic decisions made by actors, the institutional constraints faced by trade unions or the power of the state to interpellate subjects. These more common explanations make workers and their politics visible only as a symptom of external conditions: a response to deregulated markets or a product of state recognition. Instead, through a history of retailing as a site of nation and belonging, changing legal regimes and articulations of race, class and gender in the constitution of political subjects from the 1930s to present day Wal-Mart, this book presents the experiences and subjectivities of workers themselves to show that the collective political subject, workers, is both a durable and malleable political category. From white to black women's labour, the forms of precariousness have changed within retailing in South Africa. Workers' struggles in different times have in turn resolved some dilemmas and by other turn generated new categories and conditions of precariousness all

the while explaining enduring attachments to labour politics Human Geographies of Stellenbosch Ronnie Donaldson, 2021-02-11 Amid a growing turn towards Southern cities South African urban geographers continue to remind us why and how to attend to local context and draw on theory from elsewhere Human Geographies of Stellenbosch Transforming Space Preserving Place edited by Ronnie Donaldson provides a deep look at crucial questions facing one of South Africa's most well known town cities Written from years of local knowledge by scholars at Stellenbosch University this volume asks what urban transformation means who it is for and the politically tantalising question of whether and how we might hold on to some of the old while aspiring towards the new In a global context in which we are all searching for how to justly remember our messy past how to decolonise and hold onto what makes places unique this volume will be of interest to scholars asking such questions in and beyond urban studies Advances in Commercial Geography Carlos Garrocho, 2020-03-02 Por primera vez se reúnen en una publicación los principales exponentes de la geografía contemporánea como Brian J L Berry Neil Wrigley Richard Shearmur Luc Anselin y Jim Simmons con el objetivo de analizar el pasado presente y futuro de la geografía aplicada a las actividades comerciales y de servicios Participan también destacados estudiosos mexicanos como Carlos Garrocho Jos Antonio Ivarez Lobato Tania Chávez y Zochitl Flores quienes abordan el contexto de las estructuras urbanas vinculados a los avances en el análisis espacial orientados a las actividades terciarias en el espacio intra urbano particularmente en ciudades mexicanas Los autores analizan casos de estudio con el objetivo de explorar el futuro de la geografía comercial dentro de las ciudades centrando su atención en las actividades terciarias Además el trabajo muestra que en realidad no parece haber un consenso hacia el significado de la geografía comercial Los autores señalan que los usos del territorio se refieren a empresas aglomeradas terciarias y destacan que un cluster es la colocación de las entidades económicas independientes relacionadas de alguna manera pero no están obligados por un solo propietario o administración específica junto con la proximidad a los mercados de trabajo el acceso a los clientes y los proveedores reducir los costos de búsqueda de los consumidores el seguimiento de los competidores la disponibilidad de infraestructura y tierras a utilizar la planificación etc **Geospatial Technologies and Advancing Geographic Decision Making: Issues and Trends** Albert, Donald P., 2012-03-31 The availability of geographically referenced data the proliferation of geospatial technologies and advances in spatial analytics have been a boom to applied geographers Geospatial Technologies and Advancing Geographic Decision Making Issues and Trends is a resource for private and public sector applied geographers engaged as geospatial technicians analysts scientists and managers It includes chapters that highlight the use of geospatial technologies to explore applied geographic issues and problems studies from economic geography urban geography population geography medical geography political geography geography of education geography of crime and transportation geography are considered **A Century of British Geography** Ron Johnston, Michael Williams, British Academy, 2003-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how

the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today s geographers

The Economic Geography of the UK Neil Coe,Andrew Jones,2010-08-24 With the UK still facing the repercussions of the 2007 economic downturn Coe and Jones text is a timely engaging discussion of the key issues facing the UK economy from a purely geographical perspective written by some of the leading academics in the field With pedagogical features to facilitate learning including further reading and chapter aims the text explores the complex connections that constitute the UK economy including the city and finance the uneven development of the UK the UK economy s links to the European Union and its wider ties to the global economy Written for geography students studying modules on economic geography and the human geography of the UK the text is a vibrantly written easy to understand analysis of the current and future challenges that face the contemporary UK economy Includes a preface by Doreen Massey **The Social Cost of Cheap Food**

Sébastien Rioux,2019-09-26 The distribution of food played a considerable yet largely unrecognized role in the economic history of Victorian and Edwardian Britain In the midst of rapid urbanization and industrialization retail competition intensified and the channels by which food made it to the market became vital to the country s economic success Illustrating the pivotal importance of food distribution in Britain between 1830 and 1914 The Social Cost of Cheap Food argues that labour exploitation in the distribution system was the key to cheap food Through an analysis of labour dynamics and institutional changes in the distributive sector S bastien Rioux demonstrates that economic development and the rising living standards of the working class were premised upon the growing insecurity and chronic poverty of street sellers shop assistants and small shopkeepers Rioux reveals that food distribution far from being a passive sphere of economic activity provided a dynamic space for the reduction of food prices Positing food distribution as a core element of social and economic development under capitalism The Social Cost of Cheap Food reflects on the transformation of the labour market and its intricate connection to the history of food and society **The Social Science Encyclopedia** Adam Kuper,2004-10-14

The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut

across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

Getting the Goods Edna Bonacich, Jake B. Wilson, 2011-03-15 In *Getting the Goods* Edna Bonacich and Jake B Wilson focus on the Southern California ports of Los Angeles and Long Beach which together receive 40 percent of the nearly 2 trillion worth of goods imported annually to the United States to examine the impact of the logistics revolution on workers in transportation and distribution Built around the invention of shipping containers and communications technology the logistics revolution has enabled giant retailers like Wal Mart and Target to sell cheap consumer products made using low wage labor in developing countries The goods are shipped through an efficient low cost intermodal freight system in which containers are moved from factories in Asia to distribution centers across the United States without ever being opened Bonacich and Wilson follow the flow of imports from Asian factories exploring the roles of importers container shipping companies the ports railroad and trucking companies and warehouses At each stage *Getting the Goods* raises important questions about how the logistics revolution affects logistics workers Drawing extensively on interviews with workers and managers at all levels of the supply chain on industry reports and on economic data Bonacich and Wilson find that in general conditions have deteriorated for workers But they also discover that changes in the system of production and distribution provide new strategic opportunities for labor to gain power A much needed corrective to both uncritical celebrations of containerization and the global economy and pessimistic predictions about the future of the U S labor movement *Getting the Goods* will become required reading for scholars and students in sociology political economy and labor studies

Retail Geography Shuguang Wang, Paul Du, 2020-05-26 The retail sector is an integral part of a national economy From the political economy perspective all consumer goods have surplus values locked up in them the surplus values are not realized until the consumer goods are purchased by consumers through various distribution channels As such retailing is the essential link between production and consumption The success of a retail business depends on two general factors the location of the retail outlet and management of the business Both factors are equally important If the business is located in the wrong place with the wrong customer base it will not generate expected sales Similarly if the business is poorly managed and operated it will not perform well even if the location is right Influenced by both traditional and new location theories Retail Geography is conceptualized and organized using the retail planning process as the framework The technical and methodological chapters help guide the reader with detailed descriptions of the techniques and are supported with practical examples to reflect the latest software development Retail Geography provides a state of the art summary and will act as a core textbook for undergraduate and graduate students of economic geography interested in specializing in retail and business geography The practical examples also make it a valuable handbook for practitioners in the field as well

as students of retail management and commercial real estate management **Social Research after the Cultural Turn** S. Roseneil, S. Frosh, 2012-01-12 This collection explores the contested meanings and diverse practices of social research in the context of contemporary theoretical debates in cultural and social theory addressing fundamental questions facing those working in the social and human sciences today *Urban Regeneration in the UK* Andrew Tallon, 2009-08-21 Exploring the streets of London Manchester Belfast Edinburgh or Cardiff one cannot help but notice the striking transformations taking place in the urban landscapes This prominent regeneration of urban areas in the UK and around the world has become an increasingly important issue amongst governments and populations The growing concern has been a result of the impacts of the decline of cities since the collapse of manufacturing industries and the heightening of global competition A range of innovative approaches to tackle urban problems have been taken over many decades to attempt to regenerate the fortunes of towns and cities across the UK This text provides an accessible yet critical synthesis of urban regeneration in the UK incorporating key policies approaches issues and debates The central objective of the book is to place the historical and contemporary regeneration agenda into context Section one sets up the conceptual and policy framework for urban regeneration in the UK Section Two traces policies that have been adopted by central government to influence the social economic and physical development of cities including early municipal interventions in the late nineteenth century community focused urban policies of the late 1960s entrepreneurial property led regeneration of the 1980s and competition for urban funds in the 1990s The penultimate section illustrates the key thematic policies and strategies that have been pursued by cities themselves focusing particularly on improving economic competitiveness and tackling social disadvantage These approaches are contextualized by discussions covering for example urban competitiveness policies and the focus on sustainable urban regeneration The final section summarizes key issues and debates facing urban regeneration and speculates upon future directions Urban Regeneration in the UK blends the approaches taken by central government programmes and cities themselves in the regeneration process The latest ideas and examples from across disciplines and across the UK's urban areas are illustrated This book provides a comprehensive and up to date synthesis that will fill a significant gap in the current literature on regeneration and will be a tool for students as well as a seminal read for practitioners and researchers *Urban Geography* Tim Hall, Heather Barrett, 2018-01-03 This revised fifth edition not only examines the new geographical patterns forming within and between cities but also investigates the way geographers have sought to make sense of this urban transformation It is structured into three sections contexts themes and issues that move students from a foundation in urban geography through its major themes to contemporary and pressing issues The text critically synthesizes key literatures in the following areas the urban world changing approaches to urban geography urban form and structure economy and the city urban politics planning regeneration and urban policy cities and culture architecture and urban landscapes images of the city experiencing the city housing and residential segregation transport and

mobility in cities sustainability and the city This edition builds on the success of the comprehensively revised fourth edition and provides revised chapters on transport mobility and urban futures with additional updating of readings and some case studies The book synthesises a wide range of literature on each subject and presents the material in a lively engaging way supported by an expanded range of student friendly features including exercises and suggestions for further study The Market Makers Gary G. Hamilton, Benjamin Senauer, Misha Petrovic, 2012-08-02 The huge expansion of new marketplaces and new retailers over the last fifty years has created a retail revolution These large and globally sophisticated retailers have harnessed the new technologies in communications and logistics to build consumer markets around the world and to create suppliers new types of manufacturers that provide consumers with whatever goods they want to buy These global retailers are at the hub of the new global economy They are the new Market Makers and they have changed the way the global economy works Despite the fact that this retail revolution unfolded right before our eyes this book is the first to describe the market making capabilities of these retailers In eleven chapters by leading scholars The Market Makers provides a detailed and highly readable analysis of how retailers have become the leading drivers of the new global economy *Economic Geographies* Ray Hudson, 2005-02-09 Integrating ideas of structure agency and practice this volume provides a detailed overview of recent key debates in economic geography and a discussion of the economy in terms of circuits flows and spaces that systematically relates the material to the cultural *Critical Perspectives on Suburban Infrastructures* Pierre Filion, Nina M. Pulver, 2019-05-06 Most new urban growth takes place in the suburbs consequently infrastructures are in a constant state of playing catch up creating repeated infrastructure crises in these peripheries However the push to address the tensions stemming from this rapid growth also allow the suburbs to be a major source of urban innovation Taking a critical social science perspective to identify political economic social and environmental issues related to suburban infrastructures this book highlights the similarities and differences between suburban infrastructure conditions encountered in the Global North and Global South Adopting an international approach grounded in case studies from three continents this book discusses infrastructure issues within different suburban and societal contexts low density infrastructure rich Global North suburban areas rapidly developing Chinese suburbs and the deeply socially stratified suburbs of poor Global South countries Despite stark differences between types of suburbs there are features common to all suburban areas irrespective of their location and similarities in the infrastructure issues confronting these different categories of suburbs
