children's books as a way to facilitate intercultural understanding and meet new literary voices. This volume follows *Children's Books from Other Countries* (1998), *The World through Children's Books* (2002), *Crossing Boundaries with Children's Books* (2006), and *Bridges to Understanding: Envisioning the World through Children's Books* (2011) and acts as a companion book to the earlier titles. Centered around the theme of the importance of stories, the guide is a resource for discovering more recent global books that fit many reading tastes and educational needs for readers aged 0-18 years. Essays by storyteller Anne Pellowski, author Beverley Naidoo, and academic Marianne Martens offer a variety of perspectives on international youth literature. This latest installment in the series covers books published from 2010-2014 and includes English language imports as well as translations of children's and young adult literature first published outside of the United States. These books are supplemented by a smaller number of culturally appropriate books from the US to help fill in gaps from underrepresented countries. The organization of the guide is geographic by region and country. All of the more than 800 entries are recommended, and many of the books have won awards or achieved other recognition in their home countries. Forty children's book experts wrote the annotations. The entries are indexed by author, translator, illustrator, title, and subject. Back matter also includes international book awards, important organizations, and research collections, and a selected directory of publishers known for publishing books from other countries.

A Measure of Success Christine Espin, 2012. Simple in concept, far reaching in implementation. Curriculum-Based Measurement (CBM) was developed in the 1980s as an efficient way to assess the progress of struggling students, including those with disabilities. Today, there are few areas of special education policy and practice that have not been influenced by CBM progress monitoring. The impact of CBM is reflected in recent education reforms that emphasize improvements in assessment and data-based decision making. Gathering an international group of leading researchers and practitioners, *A Measure of Success* provides a comprehensive picture of the past, present, and possible future of CBM progress monitoring. The book will be instrumental for researchers and practitioners in both general and special education, particularly those involved in the rapidly growing Response to Intervention (RTI) approach, an approach used to determine the performance and placement of students with learning difficulties. *A Measure of Success* presents a nuanced examination of CBM progress monitoring in reading, math, and content area learning to assess students at all levels, from early childhood to secondary school, and with a wide range of abilities, from high and low incidence disabilities to no disabilities. This study also evaluates how the approach has affected instructional practices, teacher training, psychology, and school psychology, educational policy, and research in the United States and beyond. Timely and unique, this volume will
