Singleton Jr and Bruce C Straits employ a conversational writing style that is engaging and student friendly Using everyday examples to introduce chapters and clarify complex concepts they provide current research examples on such cutting edge topics as immigration family composition prosecutorial misconduct organized racism homelessness social inequality and education and alcohol consumption and grades Placing a unique emphasis on the research process the book helps students understand the logic and mechanics of social research giving them the tools and the power to evaluate the research of others and to conduct their own research Beginning with the introduction every chapter contains flowcharts of research processes As each diagram is presented the authors relate the specific method to the overall research process Then over the course of the chapter or section they flesh out each step This way they convey information about the nuts and bolts of research while ensuring that students do not lose sight of the logic of inquiry Comprehensive and up to date without attempting to be encyclopedic in its coverage The Process of Social Research provides a balance between qualitative and quantitative research taking a more integrated approach to describing the relationship between theory and research Research Timothy P. Taking Sides in Social Research Martyn Hammersley, 2005-08-12 In the past it was generally taken for granted that the goal of social research was the production of objective knowledge and that this required a commitment to value neutrality In more recent times however both these ideals have come to be challenged and it is often argued that all research is inevitably political in its assumptions and effects In this major contribution to the debate Martyn Hammersley assesses the arguments from the classic and still influential contributions of C Wright Mills Howard Becker and Alvin Gouldner to the present day He concludes that the case for partisanship is not convincing and that an intelligent and sceptical commitment to the principles of objectivity and value neutrality must remain an essential feature of research
