provoking look at how symbols of authenticity and defilement fashion social experience in surprising ways Exploring the many themes and ciphers that comprise this musical community this book interprets aesthetic resonances as a way to understand contemporary identity politics and social relations In the end this book develops a unique argument the internal composition of the community s music and sound moulds symbols that shape reflect and constrain social patterns of identity difference and transgression This book contributes to the sociology of sound and music the study of religion in popular culture and the role of aesthetics in everyday life It will be of interest to upper level students post graduate students and scholars of religion popular culture and philosophy

**Media Transparency in China** Baohui Xie, 2014-08-20 This book argues that the gap between the official transparency rhetoric and the censorship reality has demonstrated the discrepancy between what the Party is and what it claims to be Such a discrepancy is manifested by the reality that the reformed news industry a hybrid of market oriented commercialization and party state control has largely failed to deliver either the voice of the disenfranchised groups or the value of journalism To observe the discrepancy this book investigates the role of transparency in the Chinese news media Media transparency which goes beyond the issue of censorship and press freedom has been undermined by the consensus reached between the party state and the media on political and market control It is this mutually accommodating and benefiting scheme between power and profits that has been hollowing out the substance of the transparency rhetoric and distorting the Marxist idea of press freedom as freedom for all This book argues that the cause of such a gap between rhetoric and reality is rooted in the disjuncture of political representation of both the party state and the profit seeking media
