Readings From Childhood Education:

A Point in Time ... Readings in Early Childhood Education Paula W. Smith, Verl M. Short, 1973 *Readings from Childhood Education*, 1966 Readings from Childhood Education James D. Quisenberry, E. Anne Eddowes, Sandra L. Robinson, Association for Childhood Education International, 1990 This anthology is the second volume of selected articles from the periodical *Childhood Education*. It includes 82 articles from 1964 to 1985 that represent many aspects of the child and the child's developmental environment. Articles by leaders in the field of childhood education, spokespersons in related fields, and teachers and parents are included. The first of the five major sections concerns the child. The articles in this section reflect the concerns and positions of the society in general, not a standardized, limited view of American culture, but a variety of subcultures and global points of view. The second section deals with the environments of the child's initial and fundamental learning experiences: the family, home, community, and world. The third section includes articles relating to the learning environment of the school. In the fourth section, the status of the profession and the directions in which it is moving are reviewed. The articles in the final section deal with issues concerning the future of childhood education. GLR **Handbook of Early Childhood Education** Robert C. Pianta, Susan M. Sheridan, 2015-08-12 Comprehensive and authoritative, this forward-thinking book reviews the breadth of current knowledge about early education and identifies important priorities for practice and policy. Robert C. Pianta and his associates bring together foremost experts to examine what works in promoting all children's school readiness and social-emotional development in preschool and the primary grades. Exemplary programs, instructional practices, and professional development initiatives and the systems needed to put them into place are described. The volume presents cutting-edge findings on the family and social context of early education and explores ways to strengthen collaboration between professionals and parents. *Contemporary Debates in Childhood Education and Development* Sebastian Suggate, Elaine Reese, 2012 *Contemporary Debates in Childhood Education and Development* is a unique resource and reference work that brings together leading international researchers and thinkers with divergent points of view to discuss contemporary problems and questions in childhood education and developmental psychology. **Handbook of International Perspectives on Early Childhood Education** Jaipaul L. Roopnarine, James E. Johnson, Suzanne Flannery Quinn, Michael M. Patte, 2018-02-21 The *Handbook of International Perspectives on Early Childhood Education* provides a groundbreaking compilation of research from an interdisciplinary group of distinguished experts in early childhood education, ECE, child development, cultural and cross-cultural research in the psychological sciences, etc. The chapters provide current overviews of ECE in Latin America and the Caribbean, the Middle East, Asia, Australia, Africa, Europe, the US, and Canada, and convey how ECE is multi-sectorial, multi-cultural, and multi-disciplinary, undergirded by such disciplines as neuroscience, psychological anthropology, cross-cultural human development, childhood studies, and political science. **Readings from childhood education** Margaret Rasmussen, 1966 Decolonizing Place in

Early Childhood Education Fikile Nxumalo, 2019-05-23 This book draws attention to the urgent need for early childhood education to critically encounter and pedagogically respond to the entanglements of environmentally damaged places anti blackness and settler colonial legacies Drawing from the author's multi year participatory action research with educators and children in suburban settings the book highlights Indigenous presences and land relations within ongoing settler colonialism as necessary yet often ignored aspects of environmental education Chapters discuss topics such as geotheorizing in a capitalist society absences of Black place relations and unsettling unquestioned Western assumptions about nature education Rather than offer prescriptive solutions this book works to broaden possibilities and bolster the conversation among teachers and scholars concerned with early years environmental education

Early Childhood Education Moncrieff Cochran, Rebecca S. New, 2007-01-30 Early childhood education has reached a level of unprecedented national and international focus Parents policy makers and politicians have opinions as well as new questions about what how when and where young children should learn Teachers and program administrators now find curriculum discussions linked to dramatic new understandings about children's early learning and brain development Early childhood education is also a major topic of concern internationally as social policy analysts point to its role in a nation's future economic outlook As a groundbreaking contribution to its field this four volume handbook discusses key historical and contemporary issues research theoretical perspectives national policies and practices

The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour, J. Kent Chrisman, 2016-03-15 The general public often views early childhood education as either simply babysitting or as preparation for later learning Of course both viewpoints are simplistic Deep understanding of child development best educational practices based on development emergent curriculum cultural competence and applications of family systems are necessary for high quality early education Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research accurate practical applications of research historical foundations and key facts from the field of contemporary early childhood education Through approximately 425 entries this work includes all areas of child development physical cognitive language social emotional aesthetic as well as comprehensive review of best educational practices with young children effective preparation for early childhood professionals and policy making practices and addresses such questions as How is the field of early childhood education defined What are the roots of this field of study How is the history of early childhood education similar to yet different from the study of public education What are the major influences on understandings of best practices in early childhood education

Contemporary Perspectives on Literacy in Early Childhood Education Olivia Saracho, Bernard Spodek, 2002-04-01 This volume identifies and critically analyzes research studies related to the critical skills environments and adult interactions that contribute to young children's literacy development The volume reminisces on

the reformation that has emerged in the language and literacy education of young children Prior to the 1960 s few studies were available on pre first grade literacy Then studies began to emerge in the 1960 s focusing on the reading readiness paradigm and on the conventional assumption that literacy development was only introduced when children experienced formal reading instruction in school Sulzby Teale 1986 Fortunately Durkin 1966 found that there were children reading before first grade and determined that the reading readiness paradigm was theoretically and pragmatically incongruous Others followed Durkin s footsteps Sulzby and Teale 1986 identify the following concepts about young children s acquisition of literacy learning 1 Literacy development originates well before children are introduced to formal instruction 2 The notion that reading precedes writing or that writing precedes reading is a fallacy 3 Literacy blooms in real life settings and by performing real life activities that are used to get things done 4 The purposes of literacy for young children are as important in learning about writing and reading as are the dimensions of literacy 5 Children s cognitive development is important to their acquisition of literacy during the years from birth to six 6 Children learn written language when they actively engage in their world Competent teachers throughout the United States suggest that prior to attending school children have acquired a distinctive culture collection of experiences and group of abilities Vacca Vacca 2000 Many prekindergarten children have been in a group setting for three and four years such as a child care setting where teachers and caregivers teach them reading and writing
