External Research. ER List United States. Department of State. External Research Division,1952 *China* Michael Dillon,2010-07-30 China's transformation in the last few decades has been perhaps the most remarkable and most controversial development in modern history Barely a century removed from the struggling and outdated Qing Empire China has managed to reinvent itself on an unprecedented scale from Empire to Communist state to hybrid capitalist superpower Yet the full implications of China's rapid march to modernity are not widely understood particularly the effects of China's meteoric rise on the nation's many ethnic minorities China A Modern History is the definitive guide to this complex contemporary phenomenon Deng Xiaoping's 1980s policy of reform and opening which saw China enter the world market is only the most recent in a series of dramatic shifts that have transformed Chinese society over the past 150 years China A Modern History explores these contrasts in detail while also highlighting the enduring values which have informed Chinese identity for millennia Michael Dillon's China A Modern History is essential reading for those interested in the past present and future course of one of the world's great nations Clearly and compellingly written this will stand as the best introduction to this spectacular and still unfinished story *Readings in Contemporary Chinese Literature: Stories* 李天,1968

James Ferguson,Rosita Dellios,2016-12-12 This book provides a timely analysis of the politics philosophy and history of Chinese power focusing on social strategic and diplomatic trends that have shaped China for over three thousand years Chinese elites have used the past to inform the present but have also

mobilized new ideas to address the country's rapid transition to global power. China's intellectual world can draw on a surprisingly pluralist legacy. When Chinese thinkers assess power, they bring to bear their classical legacy: the military classics, Chinese socialism, and Western political thought. There are also a number of intriguing formulations that give shape to the exercise of Chinese power. Among these are comprehensive national strength, stability preservation, soft power, asymmetric conflict, and counter intervention strategies. This book looks at key periods in Chinese history when attitudes to power evolved and at their current expressions. These include China's expanded use of think tanks to chart the future efforts at creating an eco civilization to balance growth and an extended set of security and information capabilities. From observing the centrality of power in today's international affairs, the book moves to the foundational concepts of Chinese governance: its belief in a strategic configuration of power as understood in military contexts, as well as its growing diplomatic and maritime engagement abroad. This analysis culminates in new ideas of functional multipolarity. Power is also deployed internally. China's use of nationalism as a major tool for state building and cohesion, the ongoing role of socialism, and the People's Liberation Army are all examined in this light. China's current strategic culture has shaped President Xi Jinping's search for a new model of power for China in the twenty-first century, an endeavor that will have serious implications for the future global order. This book provides an alternative perspective on China's trajectory towards a revised international system.

Modern Chinese Theologies Chloë Starr, 2023. *Chinese Theologies* introduces the vibrant development of Chinese theology in its many forms across the twentieth and twenty-first centuries. A Companion to Modern Chinese Literature Yingjin Zhang, 2015-08-07. This wide-ranging Companion provides a vital overview of modern Chinese literature in different geopolitical areas from the 1840s to now. It reviews major accomplishments of Chinese literary scholarship published in Chinese and English and brings attention to previously neglected important areas. Offers the most thorough and concise coverage of modern Chinese literature to date, drawing attention to previously neglected areas such as late Qing Sinophone and ethnic minority literature. Several chapters explore literature in relation to Sinophone geopolitics, regional culture, urban culture, visual culture, print media, and new media. The introduction and two chapters furnish overviews of the institutional development of modern Chinese literature in Chinese and English scholarship since the mid-twentieth century. Contributions from leading literary scholars in mainland China and Hong Kong add their voices to international scholarship.

Origins of Moral-political Philosophy in Early China Tao Jiang, 2021 This book rewrites the story of classical Chinese philosophy which has always been considered the single most creative and vibrant chapter in the history of Chinese philosophy Works attributed to Confucius Mozi Mencius Laozi Zhuangzi Xunzi Han Feizi and many others represent the very origins of moral and political thinking in China As testimony to their enduring stature in recent decades many Chinese intellectuals and even leading politicians have turned to those classics especially Confucian texts for alternative or complementary sources of moral authority and political legitimacy Therefore philosophical inquiries into core normative values embedded in those classical texts are crucial to the ongoing scholarly discussion about China as China turns more culturally inward It can also contribute to the spirited contemporary debate about the nature of philosophical reasoning especially in the non Western traditions This book offers a new narrative and interpretative framework about the origins of moral political philosophy that tracks how the three normative values humaneness justice and personal freedom were formulated reformulated and contested by early Chinese philosophers in their effort to negotiate the relationship among three distinct domains the personal the familial and the political Such efforts took place as those thinkers were reimagining a new moral political order debating its guiding norms and exploring possible sources within the context of an evolving understanding of Heaven and its relationship with the humans Tao Jiang argues that the competing visions in that debate can be characterized as a contestation between partialist humaneness and impartialist justice as the guiding norm for the newly imagined moral political order with the Confucians the Mohists the Laoists and the so called fajia thinkers being the major participants constituting the mainstream philosophical project during this period Thinkers lined up differently along the justice humaneness spectrum with earlier ones maintaining some continuity between the two normative values or at least trying to accommodate both to some extent while later ones leaning more toward their exclusivity in the political public domain Zhuangzi and the Zhuangists were the outliers of the mainstream moral political debate who rejected the very parameter of humaneness versus justice in that discourse They were a lone voice advocating personal freedom but the Zhuangist expressions of freedom were self restricted to the margins of the political world and the interiority of one's heartmind Such a take can shed new light on how the Zhuangist approach to personal freedom would profoundly impact the development of this idea in pre modern Chinese political and intellectual history

The Indigenization of Christianity in China I Qi Duan,2022-11-30 As the first volume of a three volume set on the indigenization of Christianity in modern China this book focuses on the presence of Christianity during the late Qing dynasty and the early twentieth century discussing the early waves of Christian influence key watersheds in its history Over the course of its growth in modern China Christianity has faced twists and turns in its embedding in Chinese society and indigenous culture This three volume book delineates the genesis and trajectory of Christianity's indigenization in China over the course of the nineteenth and twentieth centuries highlighting the actions of Chinese Christians and the relationship between the development of Christianity and modern Chinese history In this volume the author discusses early missionary works from both foreign missionaries and local churches both of which were influential in rendering Christianity more present and influential in China and which paved the way for further indigenization The book then expounds on the thoughts and practices of indigenizing Christianity prompted by historical events in the early twentieth century including the independent movement of the Chinese Christian Church and religious reforms that were undertaken to reach greater accommodation with Chinese society The book will appeal to scholars and students interested in the history of Christianity in China and modern Chinese history *Modern Chinese Parts of Speech* Guo Rui,2019-03-04 What is the essence of a part of speech Why is it difficult to classify parts of speech What are the bases and criteria for classifying them How should they be classified In doing so how should a conversional word be dealt with How should nominalization be treated These are just some of the questions answered in this book The classification of parts of speech in Chinese is a tough job due to the language's lack of morphological differences Based on the analysis of nearly 40 000 Chinese characters this book proposes

that essentially a part of speech is not of distributional type and that its intrinsic basis is an expressional function and the semantic type Essentially large categories such as substantive words predicate words and modification words are classes of words classified according to their expressional functions Basic categories such as nouns verbs and adjectives are classes that combine semantic types with syntactical functions In classifying parts of speech the book pays attention not to identifying a single distributive characteristic that is internally universal and externally exclusive but to clustering the grammatical functions that have the same classification value through the reflection representation relationship among distribution expressional function and semantic type distribution reflects expressional function and semantic type which are in turn represented as distribution thereby identifying the classification criteria It uses distributional compatibility and the correlation principle to analyze which distributional differences represent differences in parts of speech and which do not In this way grammatical functions that have equal classification values are collected into one equivalent function cluster each of which represents one part of speech The book uses four strategies to classify parts of speech namely the homogeneity strategy the homomorphical strategy the priority homomorphical strategy and the consolidation strategy It will be a valuable reference for Chinese linguistic researchers and students as well as Chinese learners

The Early Modern Travels of Manchu Mårten Söderblom Saarela, 2020-06-19 A linguistic and historical study of the Manchu script in the early modern world Manchu was a language first written down as part of the Qing state building project in Northeast Asia in the early seventeenth century After the Qing invasion of China in 1644 and for the next two and a half centuries Manchu was the language of state in one of the early modern world's great powers Its prominence and novelty attracted the interest of not only Chinese literati but also foreign scholars Yet scholars in Europe and Japan and occasionally even within China itself were compelled to study the language without access to a native speaker Jesuit missionaries in Beijing sent Chinese books on Manchu to Europe where scholars struggled to represent it in an alphabet compatible with Western pedagogy and printing technology In southern China meanwhile an isolated phonologist with access to Jesuit books relied on expositions of the Roman alphabet to make sense of the Manchu script When Chinese textbooks and dictionaries of Manchu eventually reached Japan scholars there used their knowledge of Dutch to understand Manchu In *The Early Modern Travels of Manchu* Mårten Söderblom Saarela focuses on outsiders both within and beyond the Qing empire who had little interaction with Manchu speakers but took an interest in the strange new language of a rising world power He shows how through observation inference and reference to received ideas on language and writing intellectuals in southern China Russia France Chosŏn Korea and Tokugawa Japan deciphered the Manchu script and explores the uses to which it was put for recording sounds and arranging words
