Abstract: *This paper evaluates real economic convergence (REC) for countries and regions within the European Union. The research aims to gather information about the socioeconomic evolution and development of the EU members and decide if the convergence was successful. Real economic convergence within the EU will be descriptively analysed at the national and regional levels using the real GDP and the GDP/Capita indicators. For a better understanding, the analysis considers the indicator poverty risk and social exclusion, and the two types of convergence will be examined comparatively. The research includes geopolitical maps of the European Union to compare the nations and regions at specific points in time, and the data used for the maps will be used to observe a graph representation of their evolution during the regarded timeframe. The graph evolution will be calculated with a simple regression line to mathematically ascertain the effectiveness of the regression.*

Key words: analysis, real economic convergence, regional, national, European Union.

1. INTRODUCTION

Real economic convergence at the country level is an increase in the proximity of national economies. However, this approach has only one direction. In other words, the aim is not to bring all the Member States of the European Union closer to the average because the above-average countries would suffer. The goal is to help countries below average grow as fast as possible to get closer to those above average. Countries above the EU average can also

Real Convergence in the European Union Christian Schmidt,1997 **Industry Agglomerations and Regional Development in Hungary** Cordula Wandel,2010 In context with the Eastern enlargement of the European Union this research deals with the effects of pre and post enlargement integration policies on industry concentration and regional development in Hungary Economic processes are analysed empirically and by means of regression analyses with a spatial perspective and in the framework of the new economic geography over a time span of almost two decades The results for the manufacturing industries and for regional specialization show which economic centres played a role for the economic development of the country over time The roles which agglomerations and regional specialization can play are discussed with a view to the problems of cohesion in Hungary the enlarged EU and future EU accession countries The conclusions also take into account the current political and academic debate regarding European regional policy National Competitiveness of Vietnam Hien Phuc Nguyen,2009 The author presents an empirical study on Vietnam s national competitiveness by using mixed methods research qualitative and quantitative with a combination of hard and soft data The result shows that production resources human infrastructure capital and natural resources have played the most important role in improving competitiveness productivity and living standard in Vietnam in the last two decades The author also analyzed and evaluated the competitiveness of the Vietnamese economy and pointed out the remaining weaknesses of competitiveness compared to the selected regional countries such as shortage of production resources supply a dominance of inefficient state owned enterprises and its slow reform and weak public institutions as well as inefficient government governance These weaknesses have led Vietnam s competitiveness productivity and economic growth to remain low especially compared to China Finally the author attempts to provide some recommendations enhancing the competitiveness productivity and citizens living standard in Vietnam in the long term *Exchange Rate Policy for MERCOSUR* Silvia Marengo,1998 The question as to the choice of the optimal exchange rate system to be adopted among MERCOSUR countries becomes critical if MERCOSUR states attempt to go further along the path of increasing their trade flows of goods and services The study contributes to filling this gap by providing some alternative answers to this issue The analysis has been based on three pillars a theoretical review of exchange rate systems a review of the European experience and an analysis of the Latin American experience Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen ,1998-03 **Kredit und Kapital** Werner Ehrlicher,Helmut Lipfert,1998 *Convergence, Cohesion and Integration in the European Union* R. has been an important accelerator of the drive for integration The second is that in contrast to the situation before 1985 when nation states dominated the move to integration grass roots pressure has been the dominant force since the Single European Act and the preparation for the single market **European Regional Convergence** Matthias Türck,2007

1 Introductory session 2 Past convergence within the European Union 3 Accession countries achievements in real convergence 4 Accession countries how to balance real and nominal convergence challenges for monetary and exchange rate policy 5 Does the financial sector contribute to real growth 6 Is there somebody left out in the cold prospects of CEE countries other than current accession countries 7 Policy challenges within the enlarged EU how to foster economic convergence *Convergence, Cohesion and Integration in the European Union* Robert Leonardi, 2001 Convergence After Divergence? Regional Growth in Europe Gabriele Tondl, 2001-08-29 Written by an economist who is specialized in growth theory and also an expert on European Integration the book looks at economic growth of EU regions from a theoretical as well as an empirical perspective It settles the issue in the context of EU integration and the EU's cohesion problem and provides systematic analytical growth theory arguments with respect to EU regional development This approach differs from the common view of the literature which stresses regional development theories and regional policies when looking at EU regional problems The volume provides unique rich empirical evidence of European regional problems and growth patterns and investigates growth and convergence of EU regions with the latest econometric panel data methods It offers new insights both for growth researchers and regional economists interested in developments in the European Union

Programme and the Center for European Integration Studies of the University of Bonn *Innovation and Regional Growth in the European Union* Riccardo Crescenzi, Andrés Rodríguez-Pose, 2011-06-17 This book investigates the EU's regional growth dynamics and in particular the reasons why peripheral and socio economically disadvantaged areas have persistently failed to catch up with the rest of the Union. It shows that the capability of the knowledge based growth model to deliver its expected benefits to these areas crucially depends on tackling a specific set of socio institutional factors which prevents innovation from being effectively translated into economic growth. The book takes an eclectic approach to the territorial genesis of innovation and regional growth by combining different theoretical strands into one model of empirical analysis covering the whole EU 25. An in depth comparative analysis with the United States is also included providing significant insights into the distinctive features of the European process of innovation and its territorial determinants. The evidence produced in the book is extensively applied to the analysis of EU development policies **Society and Economics in Europe** Savvas Katsikides, Hardy Hanappi, 2016-06-23 This book takes stock of the lessons to be learned from the experiences of different countries on their way to a transition into a unified Europe. It demonstrates how the project of a unified Europe is a social pilot project that is unique in human history both with respect to the sheer number of people involved and with respect to the cultural diversity it aims to turn into a progressive advantage. With no historical experience at hand the transition into a unified Europe is an exploratory process often risky but sometimes also surprisingly successful. To improve the chances of establishing a successful unification it is particularly important that we learn from the mistakes made so far and that we learn rapidly since the forces working against the pilot project of Europe will gain power very fast if the unification success slows down. And as the recent developments in Greece show the vision of the final goal itself can well change during this exciting quest. Apart from providing the pieces of a mosaic on which a more general theory can be built this book can be read as a collection of experiences mistakes as well as triumphs which should help the European learning process. The structure of the book mirrors Europe's diversity specific country studies are combined with more general chapters and quantitatively oriented econometric work is combined with qualitatively oriented sociological studies **The Impact of European Integration on Regional Structural Change and Cohesion** Christiane Krieger-Boden, Edgar Morgenroth, George Petrakos, 2008-03-31 Edited by three European editors and spanning across Europe this excellent study focuses on the effects of the European integration process on the inter regional division of labour in both western and Eastern European countries. Using extensive empirical analysis of the changes of regional specialization over a period of two decades observing its **Towards Convergence in Europe** Daniel Vaughan-Whitehead, 2019 This book aims to answer a number of important questions. To what extent have European countries converged or diverged with EU wide economic and social indicators over the past 20 years? What have been the drivers of convergence? Why do some countries lag behind while others experience continuous upward convergence? Why are these trajectories not always linear? Particular attention is paid to

the role of institutions actors and industrial relations focusing on the resources and strategies of governments employers and trade unions in nudging EU countries onto an upward convergence path
