Real Estate Appraisal and Investment Sanders A. Kahn, Frederick E. Case, Alfred Schimmel, 1977 **Real Estate Appraisal** Sarah Sayce, Judy Smith, Richard Cooper, Piers Venmore-Rowland, 2009-02-11 The education of the real estate professional is changing and aligning itself more closely with the world of business This book takes a new approach to property appraisal by exploring the pricing mechanism in this changing context It develops the notion of the pricing mechanism in relation to property covers practical issues of comparison and the real problems in applying valuation theory explores calculations including social and environmental worth ignored in other texts As real estate professionals now advise both on strategic and operational aspects of built assets they must take into account practices of other investment markets and see investors as competitors to owner occupiers Both owner occupiers and investors have to assess accurately how their buildings perform but also be aware of wider sustainability issues and social and environmental responsibilities Real Estate Appraisal from value to worth meets these new demands by examining the latest techniques of the marketplace developing an understanding of both market appraisal and worth and highlighting the emerging role of sustainability as a driver for decision making in real estate Written by a group of highly experienced lecturers and professionals at the cutting edge of investment practice the book has an accessible style and authoritative coverage for both students and practitioners facing changes in established ways of working For supporting material please go to www.blackwellpublishing.com/sayce **Real Estate Appraisal and Investment** Sanders A. Kahn, 1877 **Investing in Real Estate** Michael J. Gilroy, 2013-06-21 The purpose of this book is to shed some light on the process of purchasing income producing property and to introduce you to a technique of making money derived from public information available in the Probate Court System that not one in one hundred people are aware of In other words I will explain in detail two different ways of making money using real estate as the vehicle The first and most popular way being of investing is to purchase real estate to hold for the long term The other method consists of purchasing updating and selling property within a 6 month time frame and generating a 30% return on investment This method can also be expanded into an options situation whereby the investor puts a property under contract to be sold to him by giving the seller a 1 000 00 deposit while signing a P S agreement After the agreement is signed by both parties and the investor has legal footing the investor locates a contractor and proceeds to sell the contract The time for performance in most agreements is ninety days Within that time frame the investor collects the difference between what his agreement says that he is paying and what his purchaser is paying him This transaction is accomplished by using an assignment If the investor sells his agreement for 5 000 00 in ninety days he will have effectively gotten an annualized profit ratio of 20 to 1 The other section of the book explains how to track and capitalize on public information available in the Probate Court System to generate a fantastic income **Real Estate Appraisal and Investment** Sanders A. Devaney,2021-01-06 Discover an insightful examination of the property investment appraisal process from leaders in the industry This book explains the process of property investment appraisal the process of estimating both the most likely selling price market value and the worth of property investments to individuals or groups of investors investment value Valuations are important They are used as a surrogate for transactions in the measurement of investment performance and they influence investors and other market operators when transacting property Valuations need to be trusted by their clients and valuers need to produce rational and objective solutions Appraisals of worth are even more important as they help to determine the prices that should be paid for assets even in times of crisis and they can indicate market under or over pricing In a style that makes the theory as well as the practice of valuation accessible to students and practitioners the authors provide a valuable critique of conventional valuation methods and argue for the adoption of more contemporary cash flow methods They explain how such valuation models are constructed and give useful examples throughout They also show how these contemporary cash flow methods connect market valuations with rational appraisals The UK property investment market has been through periods of both boom and bust since the first edition of this text was produced in 1988 As a result the book includes examples generated by vastly different market states Complex reversions over rented properties and leaseholds are all fully examined by the authors This Fourth Edition includes new material throughout including brand new chapters on development appraisals and bank lending valuations heavily revised sections on discounted cash flow models with extended examples and on the measurement and analysis of risk at an individual property asset level The heart of the book remains the critical examination of market valuation models which no other book addresses in such detail Improved Real Estate Appraisals and Investment Decisions Through Systems Analysis Donald Lee Vogel,1967 Real Estate Appraisal, Finance, Investment, and Business Management University of Florida.
