Balancing Act Daphne Spain, Suzanne Bianchi, 1996-06-26 A wonderful compendium of everything you always wanted to know about trends in women s roles both in and out of the home It is a balanced and data rich assessment of how far women have come and how far they still have to go Isabelle Sawhill Urban Institute Based primarily on the 1990 population census Balancing Act reports on the current situation of American women and temporal and cross national comparisons Meticulously and clearly presented the information in this book highlights changing behaviors such as the growing incidence of childbearing to older women and unmarried women in general and a higher ratio of women s earnings to men s The authors thoughtful analysis of these and other factors involved in women s fin de si cle balancing act make this an indispensable reference book and valuable classroom resource Louise A Tilly Michael E Gellert Professor of History and Sociology The New School for Social Research In Balancing Act authors Daphne Spain and Suzanne Bianchi draw upon multiple census and survey sources to detail the shifting conditions under which women manage their roles as mothers wives and breadwinners They chronicle the progress made in education where female college enrollment now exceeds that of males and the workforce where women have entered a wider variety of occupations and are staying on the job longer even after becoming wives and mothers But despite progress lower paying service and clerical positions remain predominantly female and although the salary gap between men and women has shrunk women are still paid less As women continue to establish a greater presence outside the home many have delayed marriage and motherhood Marked jumps in divorce and out of wedlock childbirth have given rise to significant numbers of female headed households Married women who work contribute more significantly than ever to the financial well being of their families yet evidence shows that they continue to perform most household chores Balancing Act focuses on how American women juggle the simultaneous demands of caregiving and wage earning and compares their options to those of women in other countries The United States is the only industrialized nation without policies to support working mothers and their families most tellingly in the absence of subsidized childcare services Many women are forced to work in less rewarding part time or traditionally female jobs that allow easy exit and re entry and as a consequence poverty is the single greatest danger facing American women As the authors show the risk of poverty varies significantly by race and ethnicity with African Americans most of whose children live

in mother only families the most adversely affected This volume contributes to the national dialogue about family policy welfare reform and responsibility for children by highlighting the pivotal roles women play at the intersection of family and work
