Real Clothes:

Clothes John Harvey, 2014-12-05 Clothes protect our vulnerable skin and they keep us warm or cool They help us show that we are young or old rich or poor at work or play and whether we may be good to know But though they are basic much as food and shelter are and also may be beautiful they have long had a bad press in serious moral and philosophical writing The main reason for this is that they are external to us a cover we may hide behind and one on which some people spend too much money perfecting a pompous plumage of vanity also they and the fashions for them may not last long Nonetheless when we choose our own clothes we know the choice is a sensitive matter and far from being merely superficial John Harvey considers the overlapping values that clothes have for us Clothes both cover and advertise the bodies within them They help make us the men and women we are and help us to attract each other They enroll us in groups from our own circle to our generation worldwide and they show just how as individuals we want to be noticed Clothes like their wearers may compete in claiming power They may also on and off the catwalk compete to claim the spotlight In sum they show how we think we matter and they can matter themselves in ways that may be intimate and even crucial to us At all times clothes have demanded attention even when they have been castigated for their vanity and contemporary opinion is still divided Are clothes the most frivolous of consumer disposables or are they however extravagant art Though we wear and see them every day the value that they have for us is multiple and fugitive and hard to catch exactly Clothes attempts to sort the many coloured wardrobe which marks off mankind from other creatures *When Clothes Become Fashion* Ingrid

Loschek, 2009-08-01 When how and why do clothes become fashion Fashion is more than mere clothing It is a moment of invention a distillation of desire a reflection of a zeitgeist It is also a business relying on an intricate network of manufacture marketing and retail Fashion is both medium and message but it does not explain itself It requires language and images for its global mediation It develops from the prescience of the designer and is dependent on acceptance by observers and wearers alike *When Clothes Become Fashion* explores the structures and strategies which underlie fashion innovation how fashion is perceived and the point at which clothing is accepted or rejected as fashion The book provides a clear theoretical framework for understanding the world of fashion its aesthetic premises plurality of styles performative impulses social qualities and economic conditions

Fashion through History Giovanna Motta, 2018-06-11 This collection arises from an international fashion conference held at Sapienza University in Rome Italy in May 2015 It is dedicated to one of the main indicators of social change fashion analysed within various scientific fields historical periods and geographical areas It offers a comprehensive and detailed analysis of the world of clothes starting from a historical perspective religious clothes and traditional costumes and then exploring fashion theories and more recent approaches and developments in the media and advertisements The book analyses the clothing of various cultures including the Hittite peoples and the less explored fashion of Eastern Europe and it deals with craft traditions and national costume in different areas including China Greece Romania

and Georgia It also investigates the style of marginalized groups and youth movements and the interpretation of fashion in the studies and writings of sociologists philosophers and linguists such as Fausto Squillace and Christian Garve *Everyday Fashion* Bethan Bide,Jade Halbert,Liz Tregenza,2023-12-28 Ordinary clothes have extraordinary stories In contrast to academic and curatorial focus on the spectacular and the luxurious Everyday Fashion makes the case that your grandmother's wardrobe is an archive as interesting and important as any museum store From the moment we wake and get dressed in the morning until we get undressed again in the evening fashion is a central medium through which we experience the world and negotiate our place within it Because of this the ways that supposedly ordinary and everyday fashion objects have been designed manufactured worn cared for and remembered matters deeply to our historical understanding Beginning at 1550 the start of an era during which the word fashion came to mean stylistic change rather than the act of making each chapter explores the definition of everyday fashion and how this has changed over time demonstrating innovative methodologies for researching the everyday The variety and significance of everyday fashion cultures are further highlighted by a series of illustrated object biographies written by Britain's leading fashion curators showcasing the rich diversity of everyday fashion in British museum collections Collectively this volume scratches below the glossy surface of fashion to expose the mechanics of fashion business the hidden world of the workroom and the diversity and role of makers and the experiences of consuming wearing and caring for ordinary clothes in the United Kingdom from the 16th century to the present day In doing so it challenges readers to rethink how fashion systems evolve and to reassess the boundaries between fashion and dress scholarship

Personality, Design and Marketing Gloria Moss,2017-01-20 Gloria Moss reveals the extent to which design and advertising effectiveness can be improved through an understanding of the personalities of a range of stakeholders While the impact of demographic factors age class geographical location is the object of considerable research the impact of personality on production and preference aesthetics has been greatly overlooked It is only by grouping together research conducted on diverse fields that a larger picture of the impact of personality on design production and preference aesthetics can be constructed
