Wolverton,2002-09-30 Is real property appraisal evolving or have all of the big ideas already been conceived This question has been circulating among the leaders of the Appraisal Institute during the past several annual meetings usually encountering little in the way of satisfying answers This is not too surprising because grand ideas and new knowledge do not typically evolve from off hand conversation They are the product of focused intellectual activity and hours of difficult work This unquenched thirst for new knowledge is the primary reason for assembling this collection of new manuscripts dealing with valuation theory which was financially underwritten by the Appraisal Institute Their generosity and willingness to partner with the American Real Estate Society made this collection of thoughtful and thought provoking essays possible They are the result of a global response to a worldwide call for papers and demonstrate that real estate valuation is indeed an international discipline The United States Australia and New Zealand Southeast Asia the Pacific Rim and Europe are all represented by this impressive collection of authors Together the eighteen essays that make up this volume demonstrate that there are a sufficient number of big ideas to challenge and improve the appraisal profession for years to come Real Estate Valuation Theory is organized around five categories of intellectual contribution to the whole appraiser decision making and valuation accuracy application of nontraditional appraisal techniques such as regression and the minimum variance grid method appraising contaminated property ad valorem tax assessment and new perspectives on traditional appraisal methods One common thread is that all of the papers are exceptionally well written and thought provoking *Urban Economics and Real Estate* John F.
