Congress. Senate. Committee on Governmental Affairs. Subcommittee on Oversight of Government Management,1994 *An Empirical Investigation of the Role of Legal Origin on the Performance of Property Stocks Within the Context of a Tactical Asset Allocation Strategy* Christopher Shun,2005-07-06 The role of legal origin was first introduced in the Law and Finance Literature by La Porta et al 1997 in an original study of legal determinants of external finance Their study is timely given that investor protection is crucial because in many countries expropriation of minority shareholders and creditors by controlling shareholders or corporate insiders is extensive This dissertation intends to replicate the original La Porta et al 1997 study for Property stocks in 23 countries whose legal jurisdictions falls into the four of the legal fraternities established by La Porta namely English French German and Scandinavian The primary motivations for this thesis is that the Property stocks broadly captures several critical aspects of the original La Porta study Specifically Property stocks are very tangible assets that can

easily be collateralised due to the direct property underpinning the net asset backing of Property stocks. The end result of this research endeavour is to provide a framework for institutional portfolio investors to determine the appropriate countries whose real estate markets have the most favourable investor climate to facilitate a more attractive environment for institutional investors given the Means Variance Optimisation (MVO) methodology. A tactical asset allocation strategy will be employed to determine the three stages that a global investor should undertake to arrive at the optimum proportions of funds to invest in Common stocks or Real Estate stocks in any country firstly based on an Emerging Developed country analysis then secondly a geographic Regional analysis and finally on Legal Origin analysis to distil the appropriate proportions of funds that should be invested. This Dissertation has three original contributions which are as follows:

1. An Empirical investigation of role of Legal origin on the performance of Real Estate stocks within the context of a tactical asset allocation strategy. This dissertation studies the impact that Developed versus Emerging Regional markets and Legal Origin jurisdictions have on the results of the optimal MVO portfolios based on the highest Sharpe ratio and presents the research findings of this study at the Primary, Secondary and Tertiary levels. This dissertation is envisaged to fill the research gap between legal origin and the performance of Property stocks across four legal fraternities in 23 countries and make an original contribution in the Law, Finance and Portfolio Management Literature.
2. ACTIVE Ex Ante versus PASSIVE na ve portfolio management strategy. The original contribution is the application of this methodology to property stocks specifically within a Legal Origin and Regional market framework. Data is collated from 1984 to 2003, 20 years inclusive from 23 countries with specific reference to the Common and Real Estate stocks markets therein. A 5 year rolling Ex Post analysis is computed to determine the optimum allocation weights in a multi asset portfolio and subsequently an Ex Ante analysis next immediate year of the portfolio weights applied to an Actively managed portfolio. This portfolio will be compared with actual portfolio performance from 1989 to 2002, fifteen subsequent years to determine whether the Ex ANTE methodology which underpinned the Active management strategy is preferred over a Passive equal investment in each asset class strategy for real estate stocks portfolio management. The Ex Ante analysis will be undertaken at two stages: Firstly Legal Origin markets and Secondly Regional markets.
3. A replication of the Gordon et al 1995 study which determined the appropriate percentage based on the Markowitz Portfolio Theory (MPT) that should be invested in the Real Estate stock markets in 14 countries. The original contribution is the application of Gordon's methodology to the Legal Origin markets proposed by La Porta et al 1997. This research study encompasses 23 countries.

The New Enclosures: Critical Perspectives on Corporate Land Deals Ben White, Saturnino Borrás Jr., Ruth Hall, Ian Scoones, Wendy Welford, 2013-09-13. This collection explores the complex dynamics of corporate land deals from a broad agrarian political economy perspective with a special focus on the implications for property and labour regimes, labour processes and structures of accumulation. This involves looking at ways in which existing patterns of rural social differentiation in terms of class, gender, ethnicity and generation are being shaped by changes in land

use and property relations as well as by the re organization of production and exchange as rural communities and resources are incorporated into global commodity chains It goes further than the descriptive what and who questions in order to understand the how and why of these patterns It is empirically solid and theoretically sophisticated making it a robust and boundary changing work Contributors come from various scholarly disciplines Covering nearly all regions of the world the collection will be of interest to researchers from various disciplines policymakers and activists This book was originally published as a Special Issue of the Journal of Peasant Studies
