sixteen suitcases and a red hatbox. Joining him in the detention center were fifty one senior Nazis of whom Goering was the dominant figure. To ensure that the captives were fit for trial at Nuremberg the US army sent an ambitious army psychiatrist Captain Douglas M Kelley to supervise and evaluate them. To Kelley it was the professional opportunity of a lifetime to discover a distinguishing trait among these arch criminals that would mark them as psychologically different from the rest of humanity. But Kelley's quest would prove to be a dangerous one. The more he spoke with the Nazi captives the more he began to understand and appreciate their perspective and the more he would fall for their charms.

Anti-Semitism and Psychiatry
H. Steven Moffic, John R. Peteet, Ahmed Hankir, Mary V. Seeman, 2020-02-25

Following World War II and the exposure of the concentration camps psychiatry turned its attention to a vast range of cultural concerns with results that seemed to indicate a decline of stigma over time. However it is now clear that whatever drives prejudices especially in the case of anti-Semitism was just dormant and perhaps not fully understood. Hate crimes and anti-Semitism broad recently re-emerged in Europe and the United States followed shortly thereafter. The US Federal Bureau of investigation reports that New York City which is still considered the most Jewish friendly region in the US experienced a 22% spike in anti-Semitic hate crimes in 2018 alone with more extremes in other regions of the country. Neo-Nazi groups have grown stronger in the United States and abroad often resulting in organized acts of violence. The recent Tree of Life synagogue shooting in Pittsburgh PA demonstrated that these acts are not limited to one on one interactions but sometimes as prolific large scale acts. The medical community is not immune from biases either. The Cleveland Clinic recently fired a young doctor after she publicly declared her wishes to inject Jewish patients with lethal substances which is only one of many hateful comments she made on social media over the course of several years. Psychiatrists in particular grapple with this as they try to serve patients of both Jewish and non-Jewish descent who struggle to process these acts of hate. Despite all of this there is no training and no resource to guide medical professionals through these challenges. The editors of the recent Springer book *Islamophobia and Psychiatry* recognize this gap in the literature and seek to develop another high quality text to meet this need. Written by expert clinicians in global regions where these incidents are most prevalent the book seeks to be neither political nor opinion based instead the text takes an innovative cross cultural psychiatric interaction similar to what was done with Springer's new *Islamophobia* book. Coverage will range from foci on the social psychiatric aspects of anti-Semitism to how it may in turn infuse clinical encounters between patients and clinicians. Written by experts in this area the insight and expertise of psychiatrists from a variety of cultural and religious backgrounds will focus on what psychiatrists need to know to combat the negative mental health impact that increasingly rise out of this particular phenomenon. Such a multi-cultural psychiatric approach has never been taken before for this topic. This discourse is the foundation for the primary goal of this book to develop the tools needed to improve clinical outcomes for patients. Hence this book aims to present an updated comprehensive bio-psychosocial perspective on anti-Semitism at the interface of clinical psychiatry.
