Bushman, 2024-01-26 Almost sixty years after Vatican II the question of its interpretation is as lively as ever While numerous theologies of renewal are advanced conspicuously absent is any serious erudition of the

text taken by Paul VI John Paul II and Benedict XVI as the hermeneutical key to understanding the Council's goal and method namely Paul VI's encyclical *Ecclesiam Suam* This study corrects this inattention and proposes that Pope Paul's logic of renewal is so profoundly a dimension of divine revelation and of the Church's life that it is not just one theology of renewal among many but the theology of renewal It is thus the key to understanding the Council's authentic pastoral character The logic of renewal sets personal spiritual metanoia as the center path of renewal preceded by the path of doctrinal penetration which assures that renewal is faithful to God and complemented by the path of reinvigorated mission which is the fruit of conversion As the first post Christendom ecumenical council Vatican II addressed the question What does it mean to be the Church of Christ at this point in history Its answer Become what you are Convert into a more perfect realization of your own mystery vocation and mission

*Outbreaks* Jerry D. Rose, 1982 From the Salem witch hunts and the storming of the Bastille to the Holocaust the Montgomery bus boycott and the People's Temple mass suicide extraordinary episodes of collective behavior fill our history books In *Outbreaks* Jerry D Rose examines the social conditions that generate panic nonviolent and violent protest religious revivals programs and the like and analyzes their connection to ordinary human behavior Rose begins with an overview of traditional theories and approaches that have been applied to collective behavior and then introduces his own framework Four chapters are devoted to the different categories of collective behavior Disasters when social systems are unable to sustain the resources required for their own continuation Protest when unusual or extralegal tactics are used to achieve a political goal Persecution when persons or behaviors viewed as threats to the social order are sought out and suppressed Renewal when people work to change what they see as a growth in moral indifference and corruption Each chapter examines the background causes of the episodes participation who starts or joins process how the episode develops and how the spectators participants and authorities interact and the consequences the success or failure of the action and its side effects and by products The final chapter revisits the realm of the general theory of collective behavior seeking new coherent empirically valid insights into the role of the episodic dimension in human behavior Rose brings the subject alive with numerous examples of collective behavior from the panic created by Orson Welles's 1938 Martian invasion broadcast to the eruption of Mount St Helens the Italian earthquake the Miami riots the Attica prison uprising the purges in revolutionary Iran and the growth of religious cults

### **Extinction Learning from a Mechanistic and Systems Perspective** Denise

Manahan-Vaughan, Onur Gunturkun, Oliver T. Wolf, 2016-08-08 Throughout their lifetime animals learn to associate stimuli with their consequences Following memory acquisition and consolidation circumstances may arise that necessitate that initially learned behaviour is no longer relevant The ensuing process is called extinction learning and involves a novel and complex learning procedure that involves a large number of neural entities While the neural fundamentals of the initial acquisition are well studied our understanding of the behavioural and neural basis of extinction is still limited and derives mostly from rodent data acquired through fear conditioning paradigms Fear conditioning and extinction in rodents is a spectacularly successful paradigm within behavioral neuroscience However in recent years new approaches have been emerging that examine the mechanisms of extinction learning in different settings that also involve appetitive models a broader comparative perspective a focus on other brain systems an examination of hormonal factors and conditioning of immune responses Only a broader analysis of the neural fundamentals of extinction learning will finally uncover shared and distinct mechanisms that underlie extinction learning in different functional systems The papers compiled in this Research Topic offer new and valuable insights into the mechanisms and functional implementation of extinction learning at its different levels of complexity and form the basis for new concepts and research ideas in this field

**Psychological Responses to Violations of Expectations: Perspectives and Answers from Diverse Fields of Psychology** Mario Gollwitzer, Anna Thorwart, Karin Meissner, 2018-03-19 From Pavlov's dog expecting food when hearing a bell to stereotypes as expectations about other people's behaviour from Bandura's self efficacy as expectation for success and failure of one's own behaviour to the predictive brain concept in current perception theories expectations have been a central construct in different areas of psychological research In each of these areas specific concepts theoretical approaches and

empirical methods have been developed to explain when and why expectations persist and when they do not. Many theories assume that expectations are likely to change in the face of disconfirming evidence. However, sometimes expectations persist even though they are empirically violated, suggesting that they can be sticky under certain circumstances. But what are these circumstances? And what are the psychological mechanisms that can explain why and when expectations persist or change after being confronted with expectation violating evidence? Each contribution of the current book offers insights into individuals' reactions to violations of expectations. They show that many pieces of the puzzle have been collected in the many sub disciplines of psychology and that putting them together in an integrative fashion stays a fascinating enterprise.

*The Oxford Handbook of Political Participation* Marco Giugni, Maria Grasso, 2022. The Oxford Handbook of Political Participation provides readers with up to date knowledge on the wide ranging topics covered in this field and considers the key theoretical and methodological pluralism in the area as well the most recent developments. One of the aims of this Handbook is to bring together two research traditions from political science and sociology bridging research in political sociology and social movement studies. Accordingly the Handbook mainly brings together authors coming from both the politics and sociology research traditions as well as key authors working on political participation coming also from other fields such as psychology, economics, anthropology and geography. The volume provides the first comprehensive up to date treatment of political participation in all of its varied expression; it covers a wide range of topics relating to the study of political participation both from a theoretical and methodological perspective; it brings together the political science and political sociology tradition on the one hand and the social movement sociological tradition on the other; it is sensitive to theoretical and methodological pluralism as well as the most recent developments in the field and includes discussions combining perspectives that have traditionally been treated separately in the literature as well as discussions of current trends and future directions for research in this field.
