illuminate this uneven development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries Key themes include the role of manufacturing in growth the nature of structural change at different stages of development the role of manufacturing in employment creation alternative options for trade and industrial policy the key role of technology and technical change and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation Several chapters discuss individual country experiences with examples from India Mexico South Africa and Tanzania as well as an overview of African industrialisation This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development Offering inspiration and direction for future research this landmark volume will be of crucial importance to all development economics scholars and researchers

countries economic growth and economic development since 1960 the global economy and the Third World developing countries and international trade economics and development policy and poverty equality and development economists with a tenth concluding chapter This book synthesizes existing development economics literature in order to identify the salient issues and controversies and make them accessible and understandable The concern is to distinguish differences within the economics profession and between economists and non economists so that the reader can make informed judgments about the sources of these differences and about their impact on policy analysis and policy advice The book features explanatory text boxes tables and diagrams suggestions for further reading and a listing of the economic concepts used in the chapters
