Designing Research for Publication Anne Sigismund Huff, 2009 Abstract **Doing Research That Matters**

Marco Busi,2013-06-26 Doing Research That Matters looks at an old issue from a new perspective taking a fresh and cross disciplinary approach to learning how we can contribute with our work to shaping the future of management **Research**

Methods for Strategic Management Giovanni Battista Dagnino,Maria Cristina Cinici,2015-10-16 The field of strategic management has developed significantly since its birth from business policy and business planning in the 1960s Pioneering studies were essentially normative prescriptive and often based on in depth case studies The evolution of strategic management into a respected field of academic study resulted from the adoption of research methods previously employed in economics Today research in strategic management is likely to employ a mixture of methods borrowed from related and unrelated disciplines such as political sciences psychology neuroscience and behavioral economics which can be confusing to researchers new to the field This book provides the reader with a broad introduction to the array of qualitative and quantitative research methods required to investigate strategic management Throughout the book strong emphasis is placed on practical applications that transcend the mere analysis of the theoretical roots of single research methods The underlying result is a book that encourages and aids readers to learn by doing in applying the implications of each chapter to their own research This text is vital reading for postgraduate students and researchers focused on business strategy **Digital**

Dictionary Marie Cauli,Laurence Favier,Jean-Yves Jeannas,2022-09-21 Digital age digital society digital civilization many expressions are used to describe the major cultural transformation of our contemporary societies Digital Dictionary presents the multiple facets of this phenomenon which was born of computers and continues to permeate all human activity as it progresses at a rapid pace In this multidisciplinary work experts academics and practitioners invite us to discover the digital world from various technological and societal perspectives In this book citizens trainers political leaders or association members students and users will find a base of knowledge that will allow them to update their understanding and become stakeholders in current societal changes The SAGE Handbook of Research Management Robert Dingwall,Mary Byrne McDonnell,2015-08-17 The Handbook of Research Management is a unique tool for the newly promoted research leader Larger scale projects are becoming more common throughout the social sciences and humanities housed in centres institutes and programmes Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars They are responsible for the careers and professional development of others and for managing interactions with university administrations and external stakeholders Although many scientific and technological disciplines have long been organized in this way few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers and to provoke readers to think about how they might respond within their own contexts This book will be a standard

work of reference for new research leaders in any discipline or country looking for help and inspiration The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them *The Globalization Of Strategy Research* Joel Baum, Joseph Lampel, 2010-07-02 This volume brings together various emerging perspectives in strategy research for further interaction and debate Contributions address a range of issues related to the globalization of strategy research and chapters examine strategy theory methods and research as well as strategy as practice discourse and reflexive design *The Quest for Professionalism* Georges Romme, 2016 Early pioneers in management thinking such as Henri Fayol and Peter Drucker conceived of management as a science based professional activity that serves the greater good Today however many organizations are managed by people demonstrating anything but professionalism resulting in mismanagement of risks as well as a one dimensional focus on short term results The key thesis in this book is that *The Quest for Professionalism* must be revitalized because the societal costs and damage caused by managerial amateurism are huge The book is about how to address this grand challenge for example by exploring whether and how a shared professional purpose and a professional body of knowledge can be developed While most work in this area has previously focused on management education *The Quest for Professionalism* adopts an inside out approach implying management scholarship is the driving force behind any intrinsic transformation of the profession at large Without management scholars playing an active role in advancing science based professionalism in the mould of engineering and medicine any attempt to professionalize management practice is doomed to fail Moreover Georges Romme demonstrates the professionalization quest has to move away from the idea of management being confined to a few people at the top toward management as a technology for distributing power and leadership throughout the organization

An Introduction to Qualitative Research Maria K. E. Lahman, 2024-04-17 This engaging introduction to all aspects of qualitative research challenges students to consider how their research can be culturally responsive The first part of the book introduces the foundations including theory ethics and reflexivity with an emphasis on multiple methodologies from traditional to critical and cutting edge The second part covers practical guidance from writing proposals to data collection and includes a chapter dedicated to creating a culturally responsive relationship with research participants Finally readers engage with how the quality of research is enhanced how data are analyzed and how research accounts are created and disseminated Areas vital to the health of qualitative research are addressed including systemic racism and cultural humility with cutting edge suggestions offered in areas like hybrid research harnessing technology and use of social media Multiple identities are centered in examples throughout including race gender and those who are hard to reach or seldom heard in research Textboxes featuring scholars student researchers and community members invite readers into dialogue in an area that is contested swiftly shifting and always vibrant with potential Resources for instructors are available on a website to accompany the book

Learning with Damaged Colonial Places Theresa

Magdalen Giorza, 2021-05-10 This book offers a close and detailed account of the emergent and creative pedagogies of children learning together in a small not for profit preschool and the entangled becomings of their carers as well as the researcher artist author The mutually affecting and inseparable realities of the material and the discursive are made visible through lively and sensual pedagogical invention by a group of five year olds in the inner city preschool which is located in Johannesburg South Africa These small local stories are recognized in their emergence with global geopolitical realities The author makes a valuable contribution to post qualitative research through the use of visual research methods and non representational approaches to working with knowledge The book draws on the constantly evolving practices of Philosophy for Children P4C and Reggio Emilia both as pedagogical tools and as research methods Photographs and stills from video footage provide a sense of the relatively modest material environment of the school The book celebrates the considerable richness of the involvement of the children and the enormous possibilities offered by the world both inside and outside of the classroom when an enquiry led art based pedagogy is followed Drawings and other products created by the children in the study offer valuable insight into the depth and complexity of their engagement with their worlds both individual and collaborative

The Oxford Handbook of Sociology and Organization Studies Paul S. Adler, 2009 Organizations are a defining feature of the modern world and the study of organizations Organization Studies has become well established in both sociology departments and professional schools most notably business and management schools Organization Studies has long drawn inspiration from foundational work in sociology The sociological lens affords depth of insight into the technological economic cultural and political forces that shape organizations from both within and without In particular classical works in sociology have long energized organizational research primarily by suggesting ways of making sense of the ever accelerating pace of social change In recent decades however the field has lost interest in these sociology classics This trend reflects and reinforces an increasingly academic focus of contemporary Organization Studies Not only does this trend weaken Organization Studies engagement with the big social issues of our time but it isolates the field from the broader field of the social sciences The aim of this Handbook is to re assert the importance of classical sociology to the future of Organization Studies Alongside several thematic chapters the volume includes chapters on each of nearly two dozen major European and American theorists each of these chapter addressing a the ideas and their context b the impact of these ideas on the field of Organization Studies and c the potential future research these ideas might inspire The goal is not reverential exegesis but rather to examine how the classics can energize organizational research This wide ranging Handbook with contributions from leading American and European scholars will be a vital informative and stimulating resource for anybody undertaking research in teaching or interested in learning more about Organization Studies today About the Series Oxford Handbooks in Business Management bring together the world s leading scholars on the subject to discuss current research and the latest thinking in a range of interrelated topics including Strategy Organizational Behavior Public Management

International Business and many others Containing completely new essays with extensive referencing to further reading and key ideas the volumes in hardback or paperback serve as both a thorough introduction to a topic and a useful desk reference for scholars and advanced students alike

Tome 1: Manuscripts. »Codices«, Texts, Science and Medicine Steven M. Oberhelman, 2025-07-21 This three volume set of essays is dedicated to Alain Touwaide known for his far reaching investigations in fields such as ancient medicine botany pharmacy texts and manuscripts the classical tradition translation the history of science ethnopharmacology and plant therapies The essays penned by 80 international scholars and researchers and written in six languages are grouped into three broad categories Manuscripts Plants and Remedies to reflect Alain's main areas of research Each category is broken into subgroups such as manuscripts texts and science botany gardens materia medica pharmacy drugs archaeology medical traditions and continuity of scientific knowledge in the East and West The papers reach across many fields of scholarship science and medicine and are necessarily and fundamentally trans disciplinary trans chronological and trans geographic These volumes are not so much a Festschrift as an approach to Alain's work through many disciplines and methods a discussion of the current status of each field and an opening into new perspectives

The Oxford Handbook of Museum Archaeology Alice Stevenson, 2022-08-25 This Handbook provides a transnational reference point for critical engagements with the legacies of and futures for global archaeological collections It challenges the common misconception that museum archaeology is simply a set of procedures for managing and exhibiting assemblages Instead this volume advances museum archaeology as an area of reflexive research and practice addressing the critical issues of what gets prioritized by and researched in museums by whom how and why Through twenty eight chapters authors problematize and suggest new ways of thinking about historic contemporary and future relationships between archaeological fieldwork and museums as well as the array of institutional and cultural paradigms through which archaeological enquiries are mediated Case studies embrace not just archaeological finds but also archival field notes photographic media archaeological samples and replicas Throughout museum activities are put into dialogue with other aspects of archaeological practice with the aim of situating museum work within a more holistic archaeology that does not privilege excavation or field survey above other aspects of disciplinary engagement These concerns will be grounded in the realities of museums internationally including Latin America Africa Asia Oceania North America and Europe In so doing the common heritage sector refrain best practice is not assumed to solely emanate from developed countries or European philosophies but instead is considered as emerging from and accommodated within local concerns and diverse museum cultures

Of the Past, for the Future Neville

Agnew, Janet Bridgland, 2006-03-06 Conservation is a core value for most archaeological societies. It is highlighted in their codes of ethics, statements of mission and governance. In recognition of this, the World Archaeological Congress, with the Getty Conservation Institute and a consortium of other conservation organizations, brought together scholars working throughout the globe to discuss vital issues that affect archaeological heritage today. This volume presents the proceedings of the Conservation Theme at the Congress held in Washington D C June 22-26 2003. Among the topics discussed are: Innovative Approaches to Policy and Management of Archaeological Sites; Finding Common Ground: The Role of Stakeholders in Decision Making; Archaeology and Tourism: A Viable Partnership; Preserving the Cultural Heritage of Iraq and Afghanistan; Archaeology and Conservation in China Today; and Managing Archaeological Sites and Rock Art Sites in Southern Africa. These proceedings should do much to promote and strengthen the relationship between the disciplines of conservation and archaeology.
