alternatives These tendencies have been reinforced by education policies such as No Child Left Behind which have narrowly defined ways of knowing as rooted in empirical science and apolitical forms of comprehension This book comes at a pivotal moment for radical teaching and for critical pedagogy bringing the radical debate occurring in social sciences and in activist circles where global protests have demonstrated the success that radical actions can have in resisting rigid state hierarchies and oppressive regimes worldwide to social studies education The Social Studies Wars Ronald W. Evans,2004-01-01

Murry R. Nelson,1994 This document contains a reprint of the 1916 The Social Studies in Secondary Education A Six Year Program Adapted Both to the 6 3 3 and the 8 4 Plans of Organization and Report of the Committee on Social Studies of the Commission on the Reorganization of Secondary Education of the National Education Association widely believed to be the most important document in the history of citizenship education in the United States It legitimated the term social studies to designate formal citizenship education and placed squarely in the field all of those subjects that were believed to contribute to that end While recognizing the importance of history and the social sciences as contributing to citizenship education the Committee s report recognized that citizenship education is something more than mastery of separate disciplines It recognized the study of social problems as a necessary part of the education of citizens and outlined a content for the social

studies that was widely adopted and has remained remarkably unchanged to the present This book includes annotations by Murry R Nelson the editor of the present document on the 1916 report Commentaries include 1 The Social Contexts of the Committee on Social Studies Report of 1916 Murry M Nelson and 2 Thomas Jesse Jones Doing God s Work and the 1916 Report Stephen T Correia The book also contains a 35 page select annotated bibliography from the ERIC database on social studies reform The table of contents of the 1915 report on The Teaching of Community Civics is included in an appendix Author DK

Social Studies Education in East Asian Contexts Kerry J. Kennedy,2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies
