**Housing America in the 1980s** John S. Adams,1988-05-16 Housing provides shelter in a variety of forms but it is also resonant with meaning on many other levels as a financial asset a status symbol an expression of private aspirations and identities a means of inclusion or exclusion and finally as a battleground for social change John Adams impressive new study explores this complex topic in all its dimensions Using census data and other housing surveys Adams describes the recent history of housing in America the nature of housing supply and demand patterns of housing use and selected housing policy questions Adams supplements this national and regional analysis with a remarkable set of small area analyses revealing how neighborhood settings affect housing use and how market forces and other trends interact to shape a neighborhood These analyses focus on a sample of over fifty urbanized areas including the nation s three largest cities New York Los Angeles and Chicago Special two color maps illustrate the dynamics of housing use in each of these communities Clearly and insightfully this volume paints a unique picture of the American housing landscape a landscape that reflects and regulates significant aspects of our national life A Volume in the Russell Sage Foundation Census Series      **1980 Census of Housing** ,1984

*Over the Edge* Martha M. Burt,1992-01-23 Often described as an emergency homelessness in America is becoming a chronic condition that reflects an overall decline in the nation s standard of living and the general state of the economy This is the disturbing conclusion drawn by Martha Burt in *Over the Edge* a timely book that takes a

clear eyed look at the astonishing surge in the homeless population during the 1980s Assembling and analyzing data from 147 U S cities Burt documents the increase in homelessness and proposes a comprehensive explanation of its causes incorporating economic personal and policy determinants Her unique research answers many provocative questions Why did homelessness continue to spiral even after economic conditions improved in 1983 Why is it significantly greater in cities with both high poverty rates and high per capita income What can be done about the problem Burt points to the significant catalysts of homelessness the decline of manufacturing jobs in the inner city the increased cost of living the tight rental housing market diminished household income and reductions in public benefit programs all of which exert pressures on the more vulnerable of the extremely poor She looks at the special problems facing the homeless including the growing number of mentally ill and chemically dependent individuals and explains why certain groups minorities and low skilled men single men and women and families headed by women are at greatest risk of becoming homeless Burt s analysis reveals that homelessness arises from no single factor but is instead perpetuated by pivotal interactions between external social and economic conditions and personal vulnerabilities From an understanding of these interactions Over the Edge builds lucid realistic recommendations for policymakers struggling to alleviate a situation of grave consequence for our entire society
