Rents, Taxes, and Peasant Resistance Kathryn Bernhardt,2022 Righteous Revolutionaries Jeffrey A.

Javed,2022-09-07 A reexamination of one of the most violent and successful state building efforts in history China

Transformed R. Bin Wong,2018-10-18 The assumption still made in much social science research that Europe provides a universal model of development is fundamentally mistaken according to R Bin Wong The solution is not however simply to reject Eurocentric norms but to build complementary perspectives such as a Sinocentric one to evaluate current understandings of European developments A genuinely comparative perspective he argues will free China from wrong expectations and will allow those working on European problems to recognize the distinct character of Western development

Tigers, Rice, Silk, and Silt Robert Marks,1998-02-28 Challenging the conventional wisdom conveyed by Western environmental historians about China this book examines the correlations between economic and environmental changes in the southern Chinese provinces of Guangdong and Guangxi from 1400 to 1850 but also provides substantial background from 2CE on Robert Marks discusses the impact of population growth on land use patterns the agro ecology of the region and deforestation the commercialization of agriculture and its implications for ecological change the impact of climatic change on agriculture and the ways in which the human population responded to environmental challenges This book is a significant contribution to both Chinese and environmental history It is groundbreaking in its methods and in its findings **Of Camel Kings and Other Things** Roxann Prazniak,1999-01-14 From the perspective of village activists across China this book tells the stories of farmers and rural laborers who raised the banner of opposition to constitutional reform during the first decade of the twentieth century The author brings to life the stories of the Camel King of Zunhua county Qu Shiwen and the Four Mountains of Laiyang county and many others who criticized government modernization efforts known collectively as the New Policy Using county archives including oral histories as well as memoirs periodical literature missionary records and official documents both Chinese and foreign Of Camel Kings and Other Things constructs from fragmented sources a coherent historical view vital to our understanding of China s twentieth century crises and the dilemmas of modernity itself

Village China Under Socialism and Reform Huaiyin Li,2009-03-12 Village China Under Socialism and Reform offers a comprehensive account of rural life after the communist revolution detailing villager involvement in political campaigns since the 1950s agricultural production under the collective system family farming and non agricultural economy in the reform and everyday life in the family and community Li s rich examination draws on original documents from local agricultural collectives newly accessible government archives and his own fieldwork in Qin village of Jiangsu province to highlight the continuities in rural transformation Firmly disagreeing with those who claim that recent developments in rural China represent a radical break with pre reform sociopolitical practices and patterns of production Li instead draws a clear history connecting the current situation to ecological social and institutional changes that have persisted from the collective era

Marginality and Subversion in Korea Sun Joo Kim, 2013-11-01 In the history of Korea the nineteenth century is often considered an age of popular rebellions Scholarly approaches have typically pointed to these rebellions as evidence of the progressive direction of the period often using the theory of class struggle as an analytical framework In Marginality and Subversion in Korea Sun Joo Kim argues that a close reading of the actors and circumstances involved in one of the century s major rebellions the Hong Kyongnae Rebellion of 1812 leads instead to more complex conclusions Drawing from primary sources in Korean Japanese and classical Chinese this book is the most extensive study in the English language of any of the major nineteenth century rebellions in Korea Whereas previous research has focused on economic and landlord tenant tensions suggesting that class animosity was the dominant feature in the political behavior of peasants Sun Joo Kim explores the role of embittered local elites in providing vital support in the early stages to spur social change that would benefit these elites as much as the peasant class Later however many of these same elites would rally to the side of the state providing military and material contributions to help put down the rebellion Kim explains why these opportunistic elites became discontented with the state in the scramble for power prestige and scarce resources and why many ultimately worked to rescue and reinforce the Choson dynasty and the Confucian ideology that would prevail for another one hundred years This sophisticated groundbreaking study will be essential reading for historians and scholars of Korean studies as well as those interested in early modern East Asia social transformation rebellions and revolutions **Living Standards in the Past** Robert C. Allen, Tommy Bengtsson, Martin Dribe, 2005-03-24 Why did Europe experience industrialisation and modern economic growth before China India or Japan This is one of the most fundamental guestions in Economic History and one that has provoked intense debate The main concern of this book is to determine when the gap in living standards between the East and the West emerged The established view dating back to Adam Smith is that the gap emerged long before the Industrial Revolution perhaps thousands of years ago While this view has been called into question and many of the explanations for it greatly undermined the issue demands much more empirical research than has yet been undertaken How did the standard of living in Europe and Asia compare in the seventeenth and eighteenth centuries The present book proposes an answer by considering evidence of three sorts The first is economic focusing on income food production wages and prices The second is demographic comparing heights life expectancy and other demographic indicators The third combines the economic and demographic by investigating the demographic vulnerability to short term economic stress The contributions show the highly complex and diverse pattern of the standard of living in the pre industrial period The general picture emerging is not one of a great divergence between East and West but instead one of considerable similarities These similarities not only pertain to economic aspects of standard of living but also to demography and the sensitivity to economic fluctuations In addition to these similarities there were also pronounced regional differences within the East and within the West regional differences that in many cases were larger than the average differences between Europe and Asia This clearly

highlights the importance of analysing several dimensions of the standard of living as well as the danger of neglecting regional social and household specific differences when assessing the level of well being in the past The Great Leveler Walter Scheidel, 2025-05-20 How only violence and catastrophes have consistently reduced inequality throughout world history Are mass violence and catastrophes the only forces that can seriously decrease economic inequality To judge by thousands of years of history the answer is yes Tracing the global history of inequality from the Stone Age to today Walter Scheidel shows that inequality never dies peacefully Inequality declines when carnage and disaster strike and increases when peace and stability return The Great Leveler is the first book to chart the crucial role of violent shocks in reducing inequality over the full sweep of human history around the world Ever since humans began to farm herd livestock and pass on their assets to future generations economic inequality has been a defining feature of civilization Over thousands of years only violent events have significantly lessened inequality The Four Horsemen of leveling mass mobilization warfare transformative revolutions state collapse and catastrophic plagues have repeatedly destroyed the fortunes of the rich Scheidel identifies and examines these processes from the crises of the earliest civilizations to the cataclysmic world wars and communist revolutions of the twentieth century Today the violence that reduced inequality in the past seems to have diminished and that is a good thing But it casts serious doubt on the prospects for a more equal future An essential contribution to the debate about inequality The Great Leveler provides important new insights about why inequality is so persistent and why it is unlikely to decline anytime soon A Study of the Stability of Contemporary Rural Chinese Society Xing Ying, 2014-07-08 This book is the last work of the author's trilogy on Chinese rural politics. In the background of prominent social conflicts since the 1990s during China's social transformation the author conducted in depth comparative analyses of several conflicts to understand the changes in goals driving forces and operating systems in the Chinese rural group contentions His analyses also focused the changes in techniques and strategies of the governments stability maintenance as well as the complicated social and political consequences brought by these changes This book applies a very unique perspective vigor in the Chinese culture to understand contemporary rural contentious politics in an attempt to overcome the problem brought by sense and sensibility and the confrontation between power and morality in the current contentious politics studies And such a perspective successfully avoids the opposition between the transplanting school and rural school which pushes forward the frontier of research on contentious political theories and rural societies

Revolutionary Armies in the Modern Era S.P. Mackenzie,2013-01-11 This presents a major re evaluation of the standard view of revolutionary armies the range of attitudes towards the role of heroic individuals the formation and leadership of armies and the differences and similarities between such armies Beginning with an exploration of the New Model Army of the 1640s a force whose name itself seems to denote its revolutionary credentials the author presents ten case studies from around the globe including the American War of Independence The French Revolution The Zulu Boer War

the Waffen SS and the Viet Cong Through a detailed analysis of source material he examines the images connected with these armies both historical and recent and assesses these images in their socio political and nationalist contexts **Economic History of China** Richard von Glahn, 2016-03-10 The first comprehensive study of China s economic development across 3 000 years of history to be published in English State Formation in China and Taiwan Julia C. Strauss, 2020 An ambitious comparative study of regime consolidation in the revolutionary People's Republic of China and conservative The Development of Socialism, Social Democracy and Communism Mohamed Ismail Taiwan in the early 1950s Sabry, 2017-09-01 This book examines how socioeconomic and institutional factors shaped the development of Socialism and its two contending variants of Social Democracy and Communism investigating why each of these factions enjoyed varying levels of popularity in different societies between 1840 and 1945 **Quest for Power** Stephen R. Halsey, 2015-10-12 China s late imperial history has been framed as a long coda of decline played out during the Qing dynasty Reappraising this narrative Stephen Halsey traces the origins of China's current great power status to this so called decadent era when threats of war with European and Japanese empirestriggered innovative state building and statecraft Peasants without the Party Lucien Bianco, 2015-03-04 Exploring one of the most dynamic and contested regions of the world this series includes works on political economic cultural and social changes in modern and contemporary Asia and the Pacific The leading specialist on China's twentieth century peasant resistance reexamines in bold and original ways the question Was the Chinese peasantry a revolutionary force Where most scholarly attention has focused on Communist led peasant movements Bianco s story is one of peasant thought and action largely unmediated by modern political parties This volume pays particular attention to the first half of the twentieth century when peasant based conflict ranging from tax and food protests to secret society conflicts opium struggles inter communal conflicts and tenant protests over rent was central to nationwide revolutionary processes A Path Twice Traveled Paul A. Cohen, 2021-02-01 In this memoir Paul A Cohen one of the West s preeminent historians of China traces the development of his work from its inception in the early 1960s to the present offering fresh perspectives that consistently challenge us to think more deeply about China and the historical craft in general A memoir of course is itself a form of history But for a historian writing a memoir on one s career is quite different from the creation of that career in the first place This is what Cohen alludes to in the title A Path Twice Traveled The title highlights the important disparity between the past as originally experienced and the past as later reconstructed by which point both the historian and the world have undergone extensive change This distinction which conveys nicely the double meaning of the word history is very much on Cohen's mind throughout the book He returns to it explicitly in the memoir's final chapter appropriately titled Then and Now The Two Histories China Unbound Paul A. Cohen, 2003-09-02 This volume contains a number of articles on modern Chinese history and historiography written by one of the leading academic experts on the subject The author provides a critique of older approaches to nineteenth century history and offers powerful

reinterpretations of such key events in the recent history of China as the boxer rebellion Mao s ascension to power in 1949 and the process of political and economic reform in the post Mao era This is a strong collection which will be of enormous **Like Cattle and Horses** S. A. Smith, 2002-04-09 Exploration of the development interest to scholars of East Asian history of national and class identities among Shanghai workers claiming that nationalism had a greater hold on working class identity between 1895 and 1927 than class consciousness The Great Divergence Kenneth Pomeranz, 2021-04-13 A landmark comparative history of Europe and China that examines why the Industrial Revolution emerged in the West The Great Divergence sheds light on one of the great guestions of history Why did sustained industrial growth begin in Northwest Europe Historian Kenneth Pomeranz shows that as recently as 1750 life expectancy consumption and product and factor markets were comparable in Europe and East Asia Moreover key regions in China and Japan were no worse off ecologically than those in Western Europe with each region facing corresponding shortages of land intensive products Pomeranz s comparative lens reveals the two critical factors resulting in Europe's nineteenth century divergence the fortunate location of coal and access to trade with the New World As East Asia's economy stagnated Europe narrowly escaped the same fate largely due to favorable resource stocks from underground and overseas This Princeton Classics edition includes a preface from the author and makes a powerful historical work available to new readers
