Architecture in Motion Robert Kronenburg, 2013-08-15 The idea that architecture can be portable is one that grabs the imagination of both designers and the people who use it perhaps because it so often forecasts a dynamic and creative solution to the complex problems of our contemporary mobile society while at the same time dealing with issues of practicality economy and sustainability *Architecture in Motion* examines the development of portable transportable demountable and temporary architecture from prehistory to the present day From familiar vernacular models such as the tent mobile home and houseboat to ambitious developments in military and construction engineering all aspects of portable building are considered Building on his earlier works *Portable Architecture* and *Houses in Motion* Robert Kronenburg compares traditional forms of building current commercial products and the work of innovative designers and examines key contemporary portable buildings to reveal surprising exciting and imaginative examples He explores the philosophical and technological issues raised by these experimental and futuristic prototypes By understanding the nature of transitory architecture a new ecologically aware design strategy can be developed to prioritise buildings that tread lightly on the earth and still convey the sense of identity and community necessary for an established responsible society This book provides a unique insight into this pivotal field of design

Portable Architecture Robert Kronenburg, 2007-06-07 Ideal for those who have been commissioned or are in competition who want to learn about the very latest developments and trends in the area New introductions to each section focus the remit of the book and make it a complete and comprehensive guide to the topic

Renzo Piano and Building Workshop Renzo Piano, 1989 **Architects Today** Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings

Renzo Piano Building Workshop Peter Buchanan, Renzo Piano, 1993 One of the acclaimed of his most designers generation Renzo Piano established his international reputation through his collaboration with Richard Rogers and Peter Rice on the Centre Pompidou in Paris The Renzo Piano Building Workshop has since completed projects as diverse as the gallery for the De Menil Collection in the USA and the Columbus International Exposition in Italy This series of three volumes covers his entire body of work to date Volume I features numerous case studies including the Bari Sports Stadium in Italy and the first stages of the Kansai Airport International Terminal in Japan Widely acclaimed on publication the book includes an authoritative introductory essay as well as specially redrawn drawings and plans

On Tour with Renzo Piano Renzo Piano, 2004-12 An intimate tour with Renzo Piano himself around his key buildings **Italy** Diane Ghirardo, 2013-02-15 Packed in its dense historic city centers Italy holds some of the most prized architecture and art in the world with which planners and politicians have had to negotiate as they struggle to cope with massive migration from the countryside to the city Early modern architecture coincided with a

sustained drive to transform a country that was still primarily rural into a modern industrial state and throughout the twentieth century architects in Italy have attempted to define the role of architecture within a capitalist economy and under diverse political systems In Italy Modern Architectures in History Diane Yvonne Ghirardo addresses these and other issues in her analysis of the last century of Italy's building practices Specifically she examines the post unification efforts to identify a distinctly Italian architectural language as well as the transformation of the urban environment in Italian cities undergoing industrialization in the late nineteenth and early twentieth centuries She challenges received interpretations of modern architecture and also looks at the subject of illegal building and current responses to ecological challenges In order to illuminate the full scope of the building industry in Italy her examples are drawn not only from the work of widely published architects in the largest cities but from throughout the peninsula including small towns and rural areas Insightful reading for those interested in Italian culture this book offers a new way of understanding the architectural history of modern Italy
