Bowdoin Van Riper,2004 *Imagining Flight* is a history of the air age as the rest of us have experienced it on the pages of books the screens of movie theaters and the front pages of newspapers It focuses on the United States but also contrasts American ideas and attitudes with those of other air minded nations including Britain France Germany and Japan The Origins of Psychic Phenomena Stan Gooch,2007-02-07 Examines unexplained phenomena in psychiatric and psychological terms rather than occult terms Explores how the unconscious mind manifests paranormal phenomena Shows how the cerebellum the seat of the unconscious is the source of these energies subpersonalities and manifestations Identifies our neglected Neanderthal subconscious as responsible for the rising incidence of paranormal happenings Alien abduction poltergeist attacks incubi succubi split and multiple personalities possessions precognition spontaneous combustion the list of phenomena not just unexplained but ignored by mainstream science seems endless Yet the key to the origin of all these manifestations lies deep within our own brains In *The Origins of Psychic Phenomena* Stan Gooch explores the functioning of

the dream producing part of the brain the cerebellum and how the unconscious mind is able to externalize itself The cerebellum is the physical seat of the unconscious and was once equal to or even superior to the cerebrum as essential to our functioning In modern times it has been shunted into the subliminal yet the cerebellum continues to process our worldly experiences and reveals its concerns in misunderstood often frightening manifestations Gooch explains that Neanderthal Man possessed a much larger cerebellum than Cro Magnon Man and posits that the modern repression of the cerebellum s role in our consciousness has given rise to these supernatural phenomena Green Shakespeare Gabriel Egan,2006-09-27 Ecocriticism a theoretical movement examining cultural constructions of Nature in their social and political contexts is making an increasingly important contribution to our understanding of Shakespeare s plays Gabriel Egan s Green Shakespeare presents an overview of the concept of ecocriticism detailed ecocritical readings of Henry V Macbeth As You Like It Antony and Cleopatra and biological nature the supernatural and the weather a bold argument for a contemporary EcoShakespeare taking into account the environmental and political implications of globalization and intellectual property laws Crossing the boundaries of literary and cultural studies to draw in politics philosophy and ecology this volume not only introduces one of the most lively areas of contemporary Shakespeare studies but also puts forward a convincing case for Shakespeare s continuing relevance to contemporary theory Magical Use of Thought Forms Dolores Ashcroft-Nowicki,J. H. Brennan,2001 In this comprehensive reference manual two leading occult researchers present step by step instructions some never before in print for developing the most basic and essential skills for magical practitioners of any tradition creating thought forms through astral manipulation Magical Use of Thought Forms includes sections on the structure of reality and on new visualization techniques to build correct astral images for highly potent magical work from creating a Familiar or Guardian to building a Memory Palace Also revealed in this extraordinary guide The occult art of observation How to build up desire as fuel for a potent astral engine The three point location of occult power in the physical brain The creation of advanced astral structures including Godforms and angelics audial images and astral landscapes The most spectacular aspect of this book is the instruction given for the performance of the legendary alchemical experiment the creation of the homunculus an animated form that can last up to several hours **How to Do Things with Fictions** Joshua Landy,2012-07-06 Why does Mark s Jesus speak in parables Why does Plato s Socrates make bad arguments Why are Beckett s novels so inscrutable And why don t stage magicians even pretend to summon spirits anymore In a series of captivating chapters on Mark Plato Beckett Mallarm and Chaucer Joshua Landy not only answers these questions but explains why they are worth asking in the first place Witty and approachable How to Do Things with Fictions challenges the widespread assumption that literary texts must be informative or morally improving in order to be of any real benefit It reveals that authors are sometimes best thought of not as entertainers or as educators but as personal trainers of the brain putting their willing readers through exercises designed to fortify specific mental capacities from form giving to equanimity from reason to

faith Delivering plenty of surprises along the way that moral readings of literature can be positively dangerous that the parables were deliberately designed to be misunderstood that Plato knowingly sets his main character up for a fall that metaphor is powerfully connected to religious faith that we can sustain our beliefs even when we suspect them to be illusions How to Do Things with Fictions convincingly shows that our best allies in the struggle for more rigorous thinking deeper faith richer experience and greater peace of mind may well be the imaginative writings sitting on our shelves **Science**

Fiction: A Critical Guide Patrick Parrinder, 2021-05-18 This book first published in 1979 presents a portrait of science fiction as a distinct form of serious and creative literature Contributors are drawn from Britain America and Europe and range from well known academic critics to young novelists The essays establish the common properties of science fiction writing and assess the history and significance of a field in which critical judgements have often been unreliable The material ranges from the earliest imaginative journeys to the moon to later developments of British American and European science fiction **Different Engines** Mark Brake, Neil Hook, 2007-12-10 Since its emergence in the seventeenth century science fiction has been a sustained coherent and subversive check on the promises and pitfalls of science In their turn invention and discovery have forced fiction writers to confront the nature and limits of reality Different Engines explores how this fascinating symbiosis shapes what we see do and dream From Johannes Kepler's Somnium to Arthur C Clarke's 2001 science fiction has emerged as a mode of thinking complementary to the scientific method Science fiction's field of interest is the gap between the new worlds uncovered by experimentation and exploration and the fantastic worlds of the imagination Its proponents find drama in the tension between the familiar and the unfamiliar Its readers many of them scientists and politicians find inspiration in the contrast between the ordinary and the extraordinary Brake and Hook's Different Engines is a unique provocative and compelling account of science fiction as the arbiter of progress **Time Travel** David

Wittenberg, 2016-01-01 This stimulating contribution to literary theory reveals the deeply philosophical concerns and developments behind popular time travel sci fi London Review of Books In Time Travel literary theorist David Wittenberg argues that time travel fiction is not mere escapism but a narrative laboratory where theoretical questions about storytelling and by extension about the philosophy of temporality history and subjectivity are presented in story form Drawing on physics philosophy narrative theory psychoanalysis and film theory Wittenberg links innovations in time travel fiction to specific shifts in the popularization of science from nineteenth century evolutionary biology to twentieth century quantum physics and more recent multiverse cosmologies Wittenberg shows how popular awareness of new science led to surprising innovations in the literary time machine which evolved from a vehicle used for sociopolitical commentary into a psychological device capable of exploring the temporal structure and significance of subjects viewpoints and historical events Time Travel draws on classic works of science fiction by H G Wells Edward Bellamy Robert Heinlein Samuel Delany and Harlan Ellison television shows such as The Twilight Zone and Star Trek and other popular entertainments These are read alongside

theoretical work ranging from Einstein Schrödinger Stephen Hawking to Gerard Genette David Lewis and Gilles Deleuze Wittenberg argues that even the most mainstream audiences of popular time travel fiction and cinema are vigorously engaged with many of the same questions about temporality identity and history that concern literary theorists media and film scholars and philosophers
