Seminar paper from the year 2006 in the subject Communications Theories Models Terms and Definitions grade 1 0

English abstract Altered pictures have always caused much controversy Even when photography was still in its infancy
manipulative arrangement was already an issue Nowadays digital photography in particular faces an erosion of trust because
newsmagazines and newspapers make frequent use of various manipulation techniques which fiercely challenges the shared
belief that photographs record the world objectively and truthfully Oddly enough even though a picture may lie it is still used
as evidence in the courtroom or understood as a valuable historical document In my analysis of photography's oscillation
between image and imagination with the two terms representing something traditionally thought of as real on the one hand
and something thought of as constructed on the other hand I want to address these questions and analyse how and what a
picture represents I argue that meaning is to a large extent constructed by the viewer and does not exist as an inherent
quality Consequently whether an altered picture is seen as fraud or merely as an optimisation is a very subjective matter and
strongly depends on contextual information The viewer's judgement is influenced by the path through which the image is
mediated and the context in which it is embedded but his judgement is also dependent on what the image means to him not
only on what he sees in it This is not to say that photographs can under no circumstances be used as evidence However what
can be said is that their truth value is often overestimated In any case manipulation is not a side effect that coincided with
the birth of digital photography Selection framing and other adjustments have always played an important role in film
photography After a gap *Photography and Philosophy* Scott Walden, 2010-03-29 This anthology offers a fresh approach to
the philosophical aspects of photography The essays written by contemporary philosophers in a thorough and engaging
manner explore the far reaching ethical dimensions of photography as it is used today A first of its kind anthology exploring
the link between the art of photography and the theoretical questions it raises Written in a thorough and engaging manner
Essayists are all contemporary philosophers who bring with them an exceptional understanding of the broader metaphysical
issues pertaining to photography Takes a fresh look at some familiar issues photographic truth objectivity and realism
Introduces newer issues such as the ethical use of photography or the effect of digital imaging technology on how we
appreciate images **Auto** Hans Hedberg, Gunilla Knappe, Tyrone Martinsson, Louise Wolthers, 2014 Today we are all
photographers Self portraits are everywhere and snapshots of our lives are circulated and shared frenetically on various
social media networks Distinctions are blurred not only between the private and public spheres but also between professional
and amateur photographic practices This calls for increased knowledge about the performative characteristics of digitised
and networked visual communication What are the limits of automation and what is the potential of virtuality Auto
