Damania, Michael Mackay, Selvadurai Dayanandan, 2018-09-03 Applied Mathematics and Omics to Assess Crop Genetic Resources for Climate Change Adaptive Traits focuses on practical means and approaches to further the use of genetic resources for mitigating the effects of climate change and improving crop production Genetic diversity in crop plants is being further explored to increase yield disease resistance and nutritional value by employing recent advances in mathematics and omics technologies to promote the adaptation of crops to changing climatic conditions This book presents a broad view of biodiversity and genetic resources in agriculture and provides answers to some current problems It also highlights ways to provide much needed information to practitioners and innovators engaged in addressing the effects of global climate change on agriculture The book is divided into sections that cover The implications of climate change for drylands and farming communities The potential of genetic resources and biodiversity to adapt to and mitigate climate change effects Applications of mathematics and omics technologies Genomics and gene identification We are in the midst of significant changes in global climates and its effects are already being felt throughout the world The increasing frequency of droughts and heat waves has had negative impacts on agricultural production especially in the drylands of the world This book shares the collective knowledge of leading scientists and practitioners giving readers a broader appreciation and heightened awareness of the stakes involved in improving and sustaining agricultural production systems in the face of climate change **Organization,**

Representation and Description through the Digital Age Christine M. Angel, Caroline Fuchs, 2018-03-05 Cataloging standards practiced within the traditional library archive and museum environments are not interoperable for the retrieval of objects within the shared online environment Within today's information environments library archive and museum professionals are becoming aware that all information objects can be linked together In this way information professionals have the opportunity to collaborate and share data together with the shared online cataloging environment the end result being improved retrieval effectiveness But the adaptation has been slow Libraries archives and museums are still operating within their own community specific cataloging practices This book provides a historical perspective of the evolution of linking devices within the library archive and museums environments and captures current cataloging practices in these fields It offers suggestions for moving beyond community specific cataloging principles and thus has the potential of becoming a springboard for further conversation and the sharing of ideas On the Wings of Modernism Robert Allen

Nauman, 2004 Nauman argues that contrary to the technological and teleological interpretations presented by the polemicists of international style modernism the academy's actual production was squarely grounded in bureaucratic and political processes He demonstrates that selection of both the site and the design firm was the result of political maneuverings involving the U S military leadership **BOOK JACKET** **Journal of Database Administration**, 1990

articles accepted for presentation during The Intelligent Information Processing and Web Mining Conference IIS IIP WM 04 held in Zakopane Poland on May 17 20 2004 Considerable attention is devoted to the newest developments in the area of Artificial Intelligence with special calls for contributions on Web mining This book will be a valuable source for further research in the fields of data mining intelligent information processing machine learning computational linguistics or natural language processing for search engines **Sanctioning Modernism** Timothy Parker, Monica Penick, Vladimir

Kulic, 2014-06-01 In the decades following World War II modern architecture spread around the globe alongside increased modernization urbanization and postwar reconstruction and it eventually won widespread acceptance But as the limitations of conventional conceptions of modernism became apparent modern architecture has come under increasing criticism In this collection of essays experienced and emerging scholars take a fresh look at postwar modern architecture by asking what it meant to be modern what role modern architecture played in constructing modern identities and who sanctioned or was sanctioned by modernism in architecture This volume presents focused case studies of modern architecture in three realms political religious and domestic that address our very essence as human beings Several essays explore developments in Czechoslovakia Romania and Yugoslavia and document a modernist design culture that crossed political barriers such as the Iron Curtain more readily than previously imagined Other essays investigate various efforts to reconcile the concerns of modernist architects with the traditions of the Roman Catholic Church and other Christian institutions And a final group of essays looks at postwar homebuilding in the United States and demonstrates how malleable and contested the image of the American home was in the mid twentieth century These inquiries show the limits of canonical views of modern architecture and reveal instead how civic institutions ecclesiastical traditions individual consumers and others sought to sanction the forms and ideas of modern architecture in the service of their respective claims or desires to be modern Eagle Mountain Landfill and Recycling Center Project, Riverside County ,1997
